LIGHT GAUGE STEEL

We are focused on creating light gauge steel framing that considers the entire building process to ensure flexibility post installation. Our light gauge steel frames are fabricated using only the best materials and our team of highly skilled craftsmen are second to none when it comes to quality and attention to detail.

No matter what your requirements are, Easy Frames can fabricate and install a steel frame to suit your needs. We have a wide range of experience in both commercial & residential projects, so you can be rest assured that we will be able to meet your specific requirements.

STRUCTURAL STEEL

At Easy Frames, we specialize in fabricating structural steel for commercial as well as residential buildings. Our range of products includes beams, columns, cleats, plates and more. Our fabrication facility is equipped with state-of-the-art machinery and qualified staff to operate and provide installation services to our clients. This allows us to offer a full range of metal fabrications, installation services and sheet metal products to meet the diverse needs of our clients and provide a holistic service.

PLASMA CUTTING

Plasma cutting can be used to cut a wide range of structural steel shapes, including beams, channels, angles and tubes. It is a versatile process that can be used for both straight cuts and complex shapes. It is also a relatively fast and efficient method of cutting making it a popular choice in many industries.

Our high definition plasma cutting technology is capable of cutting mild (structural) steel upto 60mm in thickness. Our system is designed and engineered to produce the sharpest, highest-quality cuts possible using plasma.

A FASTER, SMARTER AND BETTER WAY TO BUILD
