# Eltherington leisure solutions

## About us

Eltherington has supplied the leisure home and caravan industry for more than 60 years.

Throughout this time we have been focused on supplying reliable, innovative and high quality solutions, which has earned us a place as the Partner of Choice for leading companies in the sector.

We offer a range of standard and bespoke products including exterior cladding, windows, doors and ancillary products for touring caravans, motor homes and holiday homes.

## Why work with us?

### Product Innovation

We strive to remain at the forefront of innovation offering solutions across the entire external holiday home industry. This includes numerous cladding choices, glazing options as well as a plethora of ancillary products.

### Proven Performance

All our holiday home solutions are manufactured to the highest standards and are designed to help customers bring their inspirational designs to life. Our specialist fabrication capabilities allow us to manufacture an extended range of bespoke designs.

### Quality Assurance

We have a wealth of experience including accreditations in quality management (ISO9001), environmental standards (ISO14001) as well as health & safety standards (ISO 45001). This allows us to be benchmarked against other suppliers. In addition we are members of NCC & BH&HPA.

# Glazing solutions

## Our systems

Eltherington has supplied the leisure industry with bespoke glazing systems since the 1980's and were the first company to introduce UPVC systems into the Holiday Home Leisure sector. Eltherington celebrated their 60 Year Birthday in 2020.

Our diverse product range ensures that solutions are available to suit both aesthetic and technical requirements for holiday and residential park homes. We are one of the leading window and door manufacturers to the holiday home industry. Offering quality and value, Eltherington products are available in an ever expanding range of styles, designs, colours, and finishes, and are manufactured to the highest standards.

## What we can offer:

- Four bespoke caravan glazing systems
- Custom manufactured sizes
- Double and triple glazing
- Coloured and woodgrain laminate foils
- Single, French, bi-fold and in-line sliding doors
- Fixing solutions up to 170mm wall thickness
- Cockspur and espagnolette hardware

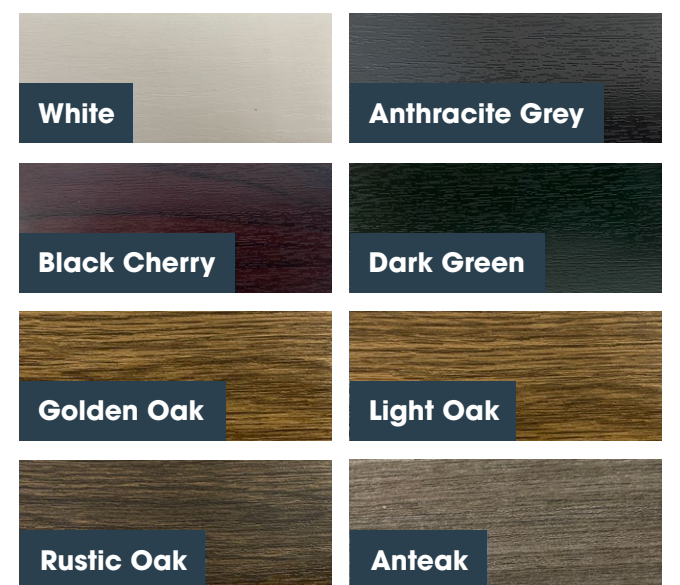

Easy to maintain,  
tough & durable.

## Windows

Our windows are fit-for-purpose and are aesthetically pleasing. They are secure, uPVC windows are a cost-effective and popular window material.

Our uPVC windows are available in a range of core colours which include; white, anthracite grey, green and an additional range of bespoke customer woodgrain colours. All foil colours are available in a woodgrain finish. Available with double or triple glazed options.

# Vista system

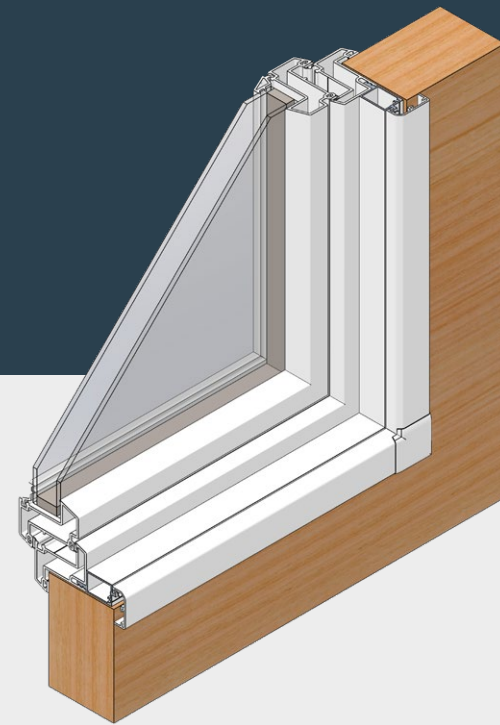

Vista is available to give our customer a full range of standard fixed, opening and optional glazing styles includes Low E.

Vista is a market leading option for our customers. Options including sliding patio, bi-fold and French doors. This allows our customer to create full range of requirements to satisfy their customer trends. Our Vista range is custom made for leisure accommodation having market leading fixing and trimming systems paired with 'line side' delivery.

## A versatile & multifunction glazing system.

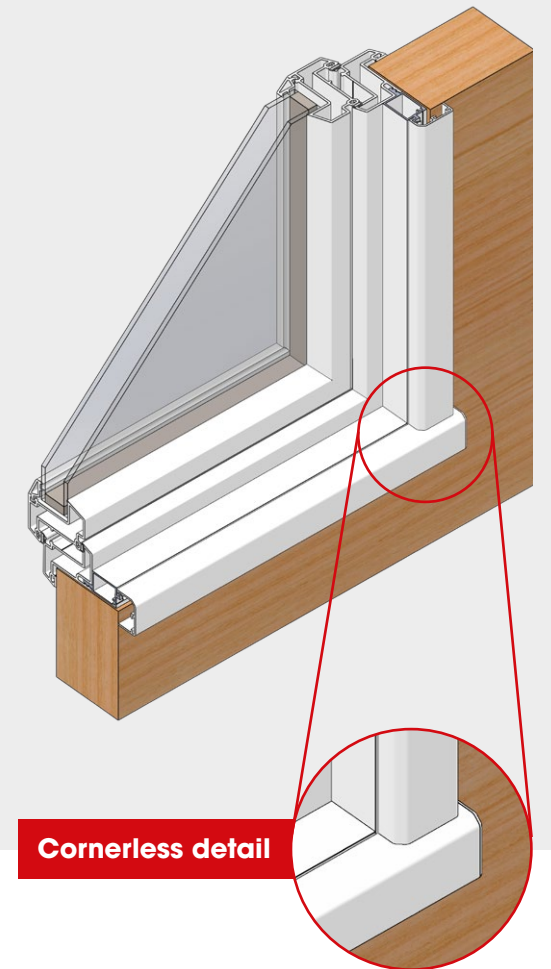

Vista system in grey

## Designed to compliment the Vista range.

Vista+ system in grey

Cornerless detail

## Vista+ system

Vista+ complements the Vista range and provides our customers with optional internal architrave styles.

For the customer that wishes to create differentiation in their internal finish. Vista+ range is cornerless and is custom made for the leisure industry having market leading fixing and trimming systems paired with 'line side' delivery.

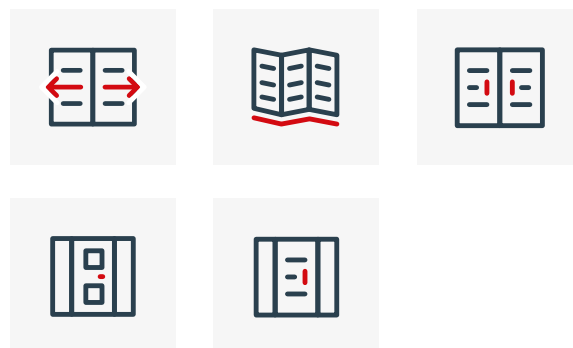

DWS system in grey colour

## Deep wall system - DWS

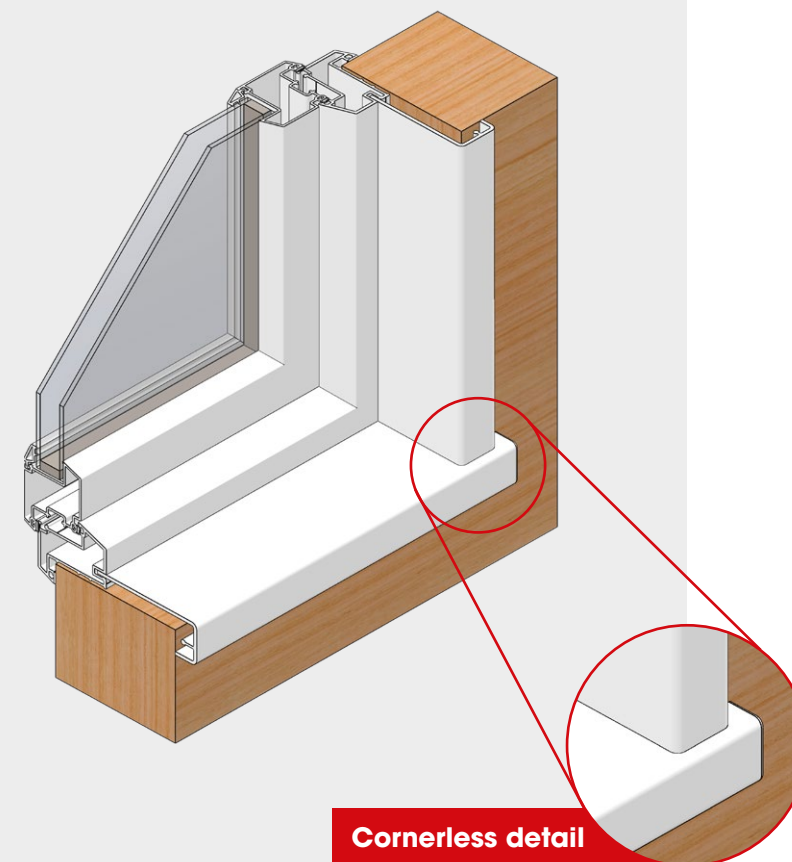

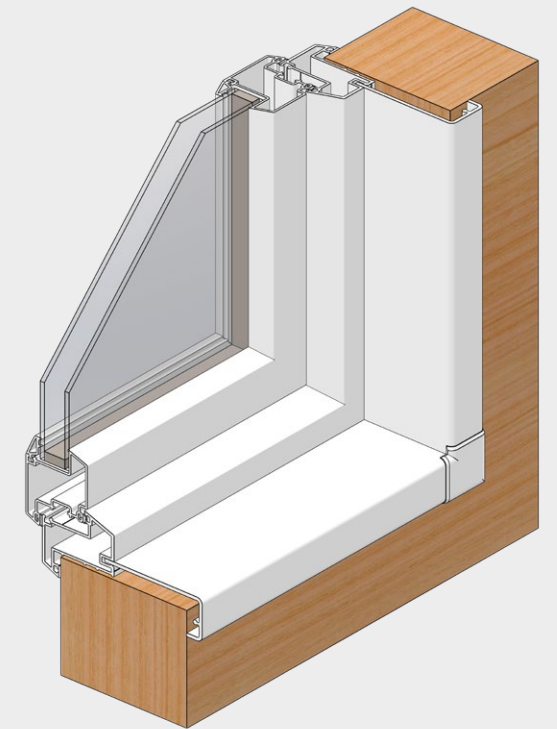

Our Deep Wall System offers all the benefits of our Vista and Vista+ systems with the added advantage of market leading fixing solutions up to 170mm wall thickness.

Our bespoke design proprietary glazing system enables customer flexibility for wall section widths from 81mm to 170mm+ and removes the need for additional aluminium fixing trims required for traditional deep wall applications.

## A bespoke & flexible glazing system.

DWS is available in the same range of colour options as our Vista and Vista+ systems.

Cornerless detail

## DWS<sup>+</sup>

Looking for a unique cornerless system similar to Vista+ with the added benefits of DWS.

DWS+ offers the same features as DWS with a unique cornerless internal architrave solution.

# Our glazing systems are designed specifically for the leisure home industry.

- A wide range of sizes, styles and finishes
- 20mm rebated frame for face sealing
- Rapid fixing systems and internal trims.
- Patented corner covers provide an industry leading secure fixing
- Two sash options – Slimline and vented
- Glass options to meet all requirements

# Door solutions

Whether you are looking for a stylish bi-fold, traditional sliding doors, elegant French designs, or a practical single door, we are here to help.

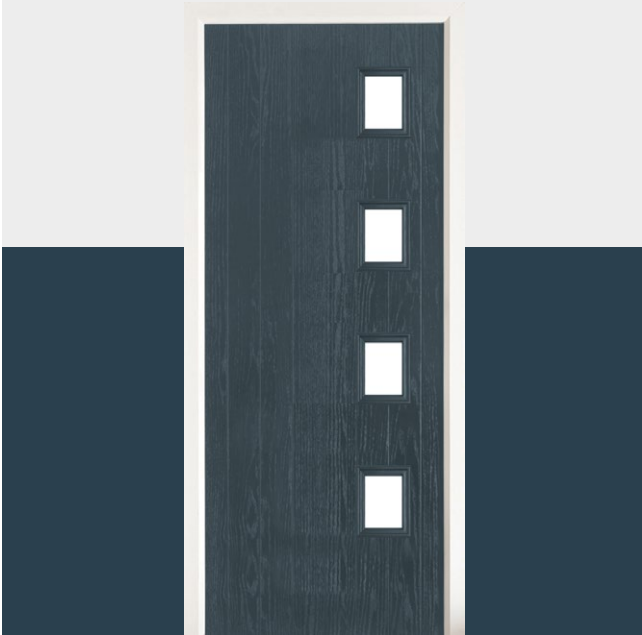

We understand that absolute security and an appealing design are top of the list when specifying doors. uPVC doors are the most popular choice for UK holiday home customers. As a material, uPVC is affordable, easy to maintain and incredibly durable making it a great option for doors. Particularly when compared to high-end materials such as timber and aluminium.

## Composite Doors

High quality domestic specification composite doors.

Our composite doors benefit from the aesthetic, traditional appearance of wooden doors without regular maintenance needed to keep them looking great with greater thermal efficiency. Our composite doors are available in a wide choice of colours and styles.

## Bi-fold Doors

Balance style with security, elegance, and durability. The definitive opening to the outside world.

These modern doors can be fully opened and folded back on themselves to provide the greatest access to the outside garden or patio, all year round.

## French Doors

A contemporary take on a classic style.

This is an ideal replacement door solution that can suit any style of holiday home due to its flexible design. Available in many sizes with locking systems that give you peace of mind.

## Single Door

Providing you with strength, security and peace of mind.

A low maintenance door which is well insulated, more stable than timber and comes with a multipoint locking system.

## Sliding Doors

Offers sophistication with a picture frame view.

Our sliding doors offer complete functionality if you are looking for a solution which can simply be pushed to one side bringing the outdoors in when required.

## Finishes

Natural PVCu white – RAL9011

Renolit MBAS foil - White, Golden Oak, Black Cherry, Dark Green, Anthracite Grey & Rustic Oak in stock. Other colours to order and subject to minimum order quantities.

Specialist painting to Pantone, RAL or BS specifications.

## Bead Styles

Sculptured or chamfer

## Logistics

Doors are delivered in custom stillages suitable for most production environments

# Cladding solutions

## Our solutions

Eltherington has supplied aluminium cladding to the leisure industry for over 60 years.

Our painted solutions use durable, long lasting, tried and tested polyester. Intricate lock roll formed jointing method eases installation and keeps out the rain.

Our range of aluminium 3000-5000 series specification and wide colour range offer our Leisure clients huge choice.

Our five cladding profiles are offered in a range of colours, emboss finish styles and varying levels of gloss and low gloss to cover all customer requirements.

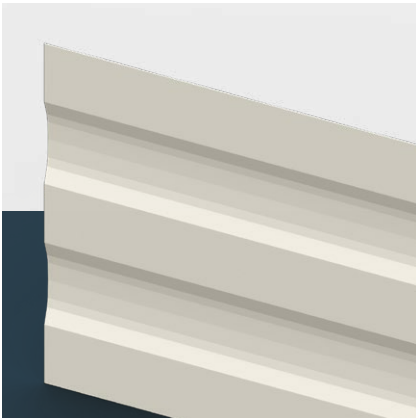

To complement our extensive range of cladding solutions Eltherington offer solutions for roofing panels, trim fittings and bargeboard kits in a range of finish colours and textures.

Panels can be specified with lock roll pockets for jointing and include folds to accommodate finishing details.

Trims options include starter strips, internal and external corners, barge boards, fascia, soffits, louvres and custom-made solutions.

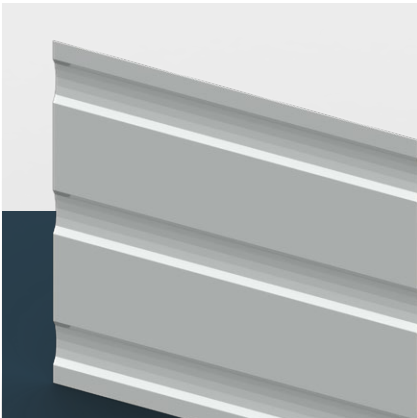

Eltherington can provide assistance with specification and development of prototype homes, through to tailored line side delivery of kitted parts to your production facility.

# PVC-U Cladding

---

**Authentic textured  
cladding designed  
for holiday homes.**

---

For over 20 years our cladding systems have been used to easily refurbish, transform and modernise holiday homes providing a stylish maintenance free solution.

We offer two brands of foam board – VinyClassic and Kestrel. The VinyClassic range is our widest board at 334mm wide and 6 metres in length. Offering five standard colours with the added option of five special order colours giving our largest colour range. The Kestrel range comes in two widths, our 270mm featheredge and 300mm shiplap both 6 metre in length with six standard colours.

---

## Why choose a PVC-U cladding system?

Eltherington's textured ranges successfully imitates timber providing authentic textured wood effect PVC-UE features, yet it can be installed using traditional wood installation skills, practices and tools.

Our products offers quick and easy installation and comes complete with a full range of accessories. They are available in a variety of colours providing an effective yet stylish external cladding solution.

Our successful textured ranges, provides a stylish and effective means to protect and decorate the exterior of homes and other buildings without the need for continual costly maintenance and painting.

# Kestrel's PVC-UE Cladding

## About Kestrel

For over 20 years Kestrel has been manufacturing a full range of PVC-UE cladding products.

PVC-UE Cladding is completely unaffected by damp, rot, decay, frost and is resistant to attack from insects. All of our products are manufactured using Calcium Organic stabilisers, guaranteed to give the best colour resistance.

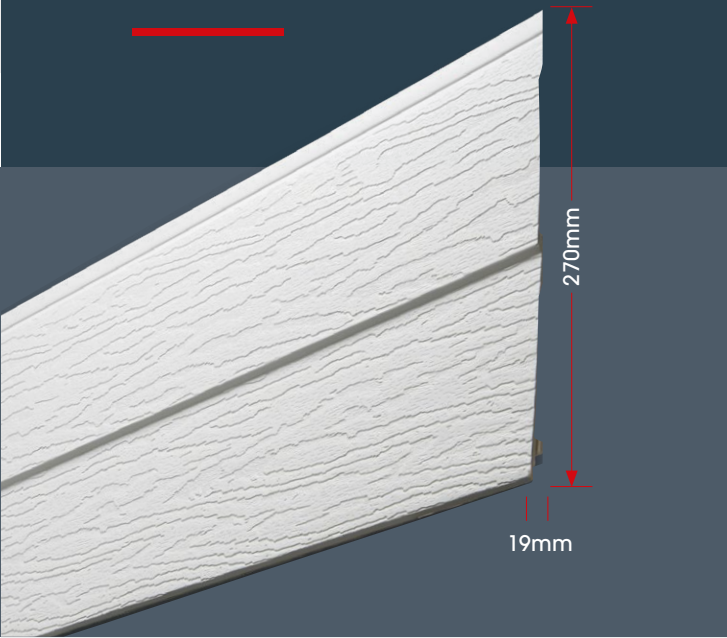

270 PVC-U Cladding

## Kestrel's cladding products offer the following benefits:

- Kavex® range provides an authentic textured wood effect
- Insulating capabilities
- Easy maintenance
- Complete range of product finishing trims and accessories
- Simple and rapid installation
- Low installation costs
- PVC-UE cladding is completely unaffected by damp, rot, decay, frost and is resistant to attack from insects
- All of our products are manufactured using environmentally kind Calcium Organic stabilisers, guaranteed to give the best colour resistance
- BBA approval
- Manufactured in the UK to ISO 9001, ISO 14001 and BES6001
- Wide range of colours and styles
- Fully guaranteed
- All cladding products offer a lower thermal conductivity than timber, concrete, mineral fibre boards or brick

## 270 PVC-UE Cladding

## 300 PVC-UE Cladding

### Product Details

The 300mm Double textured shiplap cladding is perfect for covering larger areas quickly.

LAUNCHING 2023

## Introducing the next generation caravan cladding system

## VinyClassic - Twice as simple, twice as stable.

When the classic aesthetic of wood meets the cutting-edge design and robust functionality, what you get is the VinyClassic facade.

Unparalleled in its design, ease of installation, and durability, our latest PVC-U caravan cladding system revolutionizes what it means to blend style with substance. Explore what sets the VinyClassic apart in the world of caravan cladding systems.

## Why choose VinyClassic?

### Design & Installation

The VinyClassic facade distinguishes itself with an authentic textured wood effect, amplified by its unique textured wood effect middle spacer. Notably, this facade profile boasts a substantial cover width of 334 mm, making it exceptionally suitable for the swift installation of expansive areas.

### Environment & Manufacturing

All our products, including the VinyClassic facade are crafted using environmentally kind Calcium Organic stabilisers, ensuring enduring colour resistance. Manufactured with precision in Germany, the product stands as a testament to quality and environmental consciousness.

### Durability & Maintenance

With its remarkable insulating capabilities, the VinyClassic facade stands as a durable choice, especially when considering the PVC-UE cladding's resilience against damp, rot, decay, frost, and insect attacks. Maintenance is straightforward, and the facade is further augmented by a comprehensive range of product finishing trims and accessories.

### Efficiency & Choice

Beyond its durability, the VinyClassic facade offers superior energy efficiency, boasting a lower thermal conductivity than traditional materials. Clients are also spoilt for choice with an extensive colour range, ensuring the facade caters to diverse aesthetic preferences, all while being fully guaranteed.

### AVAILABLE COLOURS

### SPECIAL ORDER COLOURS

A new innovative cladding system.

We believe this is one of the most innovative cladding systems ever. Providing a host of benefits for manufacturers, dealers, parks and the end consumer.

Why choose CoreLux?

Performance

CoreLux is a high-grade A1 fire rated aluminium cladding. It performs as well as other top tier cladding solutions but in addition CoreLux is fully capable for use with 5-metre site pitch spacing's.

Supported by a suite of supplements and accessories, CoreLux A1 can be fitted effortlessly with subtle and flush fit corners and joints. Featuring rapid installation with the innovative Quick-Rail assembly.

Durability

CoreLux's class A1 fire rating allows for close 5-metre spacing, meaning you can fit more leisure homes in your holiday park.

Showing extreme strength; CoreLux A1 boasts a thicker 0.7mm high performing alloy aluminium plank. Meaning your holiday homes can easily withstand general mistreatment or extreme weather.

Aesthetics

Its two-tone wood texture effect replicates that of other high end cladding systems, enhancing the quality of this bespoke cladding. Exclusively produced in eight core colours: Cliffside, Timberwolf, Almond, Acadia, Barnwood, and Cedar. CoreLux Life is available in Champagne and Sandstone.

The first and only Secret-Fix metal cladding system with no visible joints or fixings. CoreLux A1 promotes a higher-end and more pleasing final aesthetic.

Longevity

The composition of CoreLux A1 uses system-leading UV protection coatings; preventing fading, degrading and expansion.

This deluxe, lightweight aluminium is infinitely recyclable and features an exclusive 10-year product warranty.

A versatile colour palette.

# Metal Fascias

Our metal fascias offer an extensive range of materials, colours and finishes.

Each component can be made up to 6m in length. We offer a rapid lead time and a competitive solution versus GRP. There's no tooling or mould costs, and we have multiple fixing solutions available. Our fascias provide high performance, extreme durability and UV resistance.

Starting with five standard designs, our metal fascias can be customised on request.

## Technical data

**Material and thickness** - Galvanised Steel (0.5 mm) and Painted Aluminium (1.0 mm)

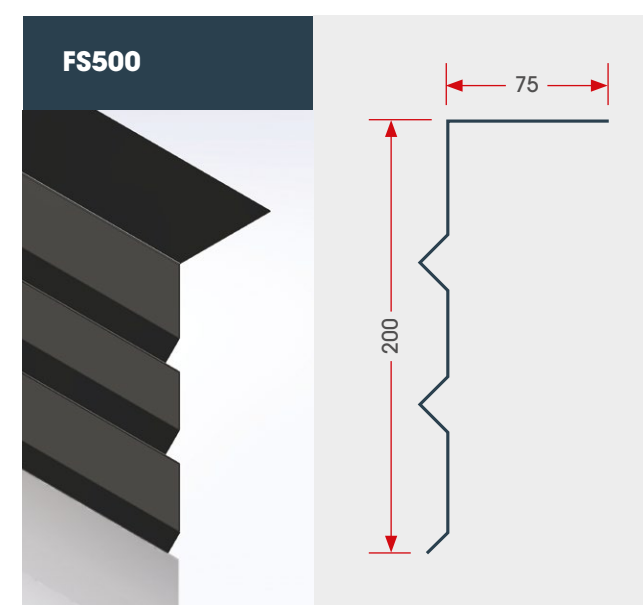

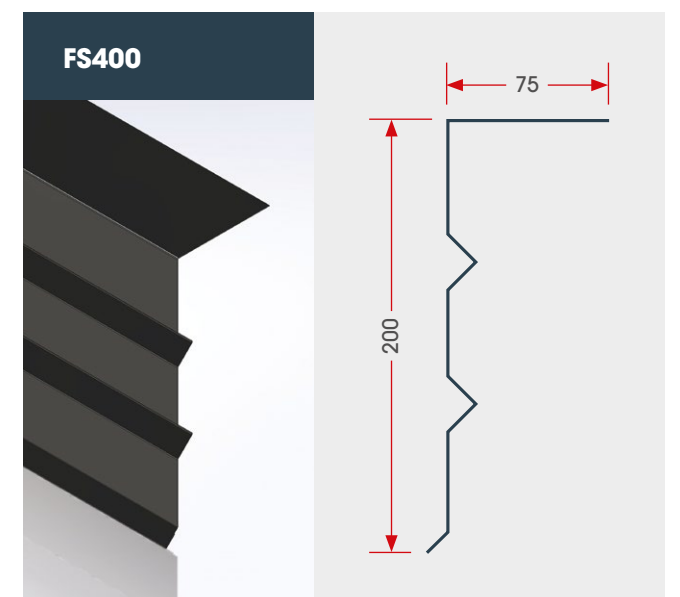

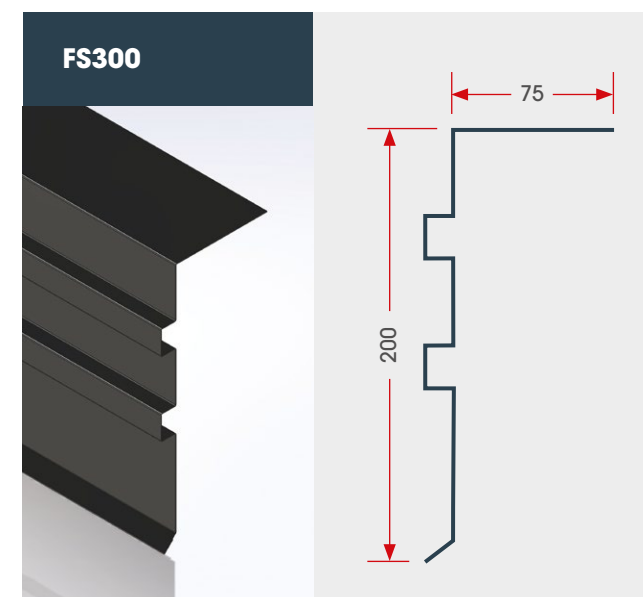

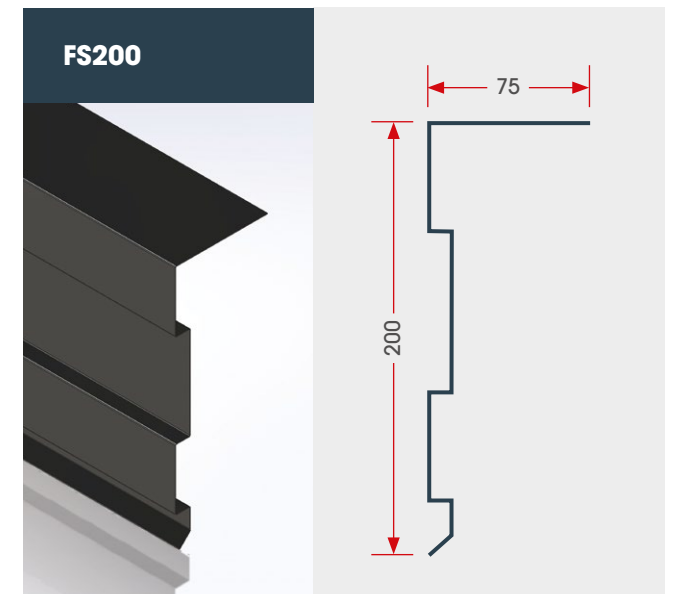

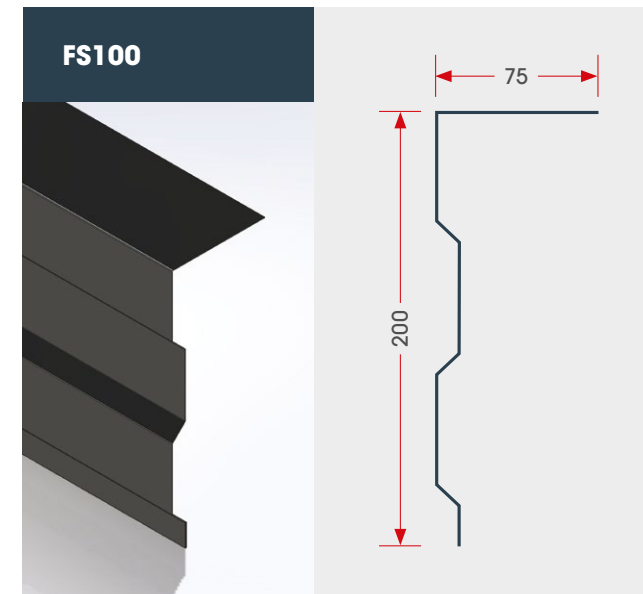

**Dimensions** - Nominal Variable up to 6m in length

**Colour** - Anthracite Grey (RAL 7016), Pure White (RAL 9010) and Bespoke options are available

**Tapered Option** - Yes

**End Cap Option** - Yes

**Centre Crest Option** - Yes

## About StrongCore

Eltherington offer a variety of solutions for the manufacturers of touring caravans.

These include side panels, roof panels, extrusions (including curved awning rails), treadplate and an array of aluminium ancillaries.

## Why choose StrongCore

- A high performance alloy aluminium which is up to 10% harder than traditional caravan panels
- Provides exemplary corrosion resistance, especially in coastal locations
- Provided in a range of RAL colours plus metallic options
- Provided with profiled detail to meet customer unique designs
- StrongCore will provide additional protection from indentation

For large aluminium panels, we can supply StrongCore, up to 2620mm in width and 7500mm in length.

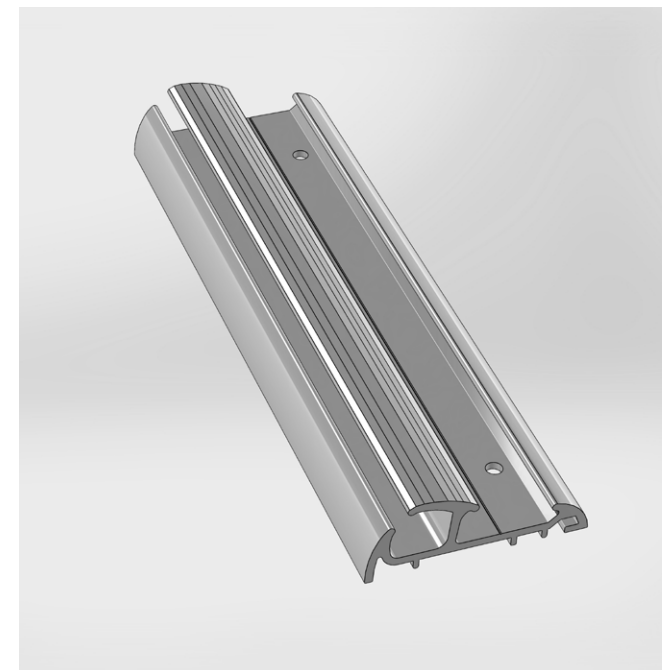

# Awning Rails

Awning rails are used to attach awnings and canopies to caravans, they can be fixed in position using screws, rivets or fixings.

Our state-of-the-art manufacturing facility has specialist machinery to create both straight and curved awning extrusions. The hydraulic CNC bending machine is developed for the accurate bending of profiles. We work with our customers to ensure we achieve the best possible fit with line side delivery with this high quality and efficient production process.

**Precision in Every Bend.**

# Feature panels now available

Bespoke designs of feature panels to personalise your design.

Our range of feature panels enables us to show case our extensive range of manufacturing capabilities from punched detail, castellated formed detail, feature welding, roll forming and fabrication. The feature panel you select will enhance your product, personalise your design trend and marry to the features of other products including the windows and bargeboards.

## Eltherington leisure products accreditation.

### Quality - ISO 9001

ISO 9001 is a standard of requirements against which our Quality Management System is evaluated. We are actively advertising our company's commitment to quality, traceability, continual improvement and customer satisfaction.

### Environmental - ISO 14001

ISO 14001 environmental management system indicates to our stakeholders and customers that this business is committed to reducing our environmental impact, as well as reducing costs associated with waste management.

### Health and safety - ISO 45001

ISO 45001 is a standard of requirements against which our Health & Safety Management System can be evaluated. We are required to identify the risks associated with our operations and mitigate their impact.
