

Service mesh without the stress

From the creators of **Linkerd**, Buoyant Cloud is a full management solution for Linkerd. Connect your existing open source Linkerd deployment to Buoyant Cloud, and let it do the hard work of operating, monitoring, and managing Linkerd for you.

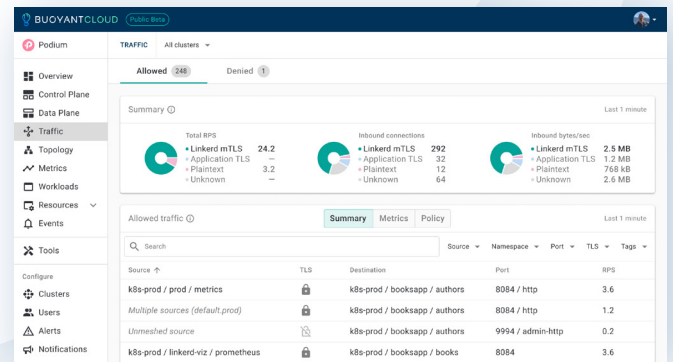

Automated Linkerd health monitoring and alerting

Buoyant Cloud automatically monitors the health of your Linkerd deployment across all clusters, sending you critical alerts before they become production-facing issues.

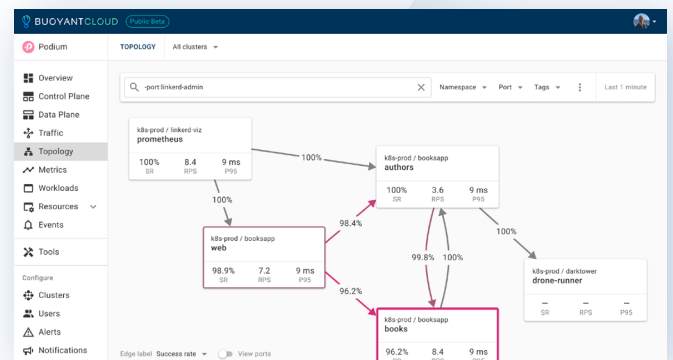

Zero trust security

Buoyant Cloud provides live, at-a-glance audits of all TLS and plaintext traffic across the mesh and human-readable analysis of authorization policies, allowing you to easily ensure your security and regulatory requirements are being met.

Full lifecycle management

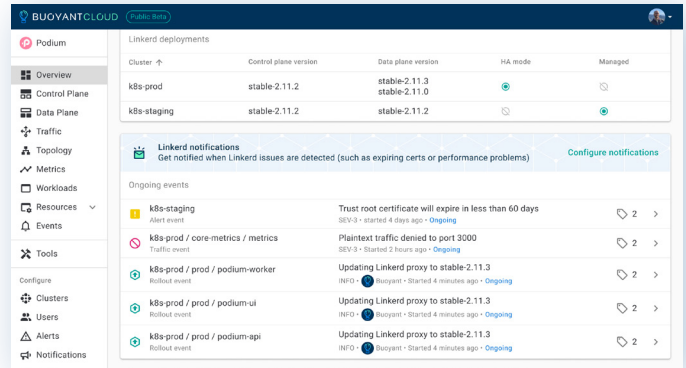

Buoyant Cloud automates Linkerd upgrades across control plane, data planes, and clusters, allowing you to spend your time on more important tasks. regulatory requirements are being met.

Enterprise ready

For enterprise customers, a Buoyant Cloud subscription provides additional critical enterprise features, including 24x7 Linkerd on-call coverage, enterprise SSO support, authorization policy auditing, and more.

	Open source Linkerd	Open source Linkerd + Buoyant Cloud	Open source Linkerd + Buoyant Cloud (Enterprise)
Zero-config mutual TLS	⦿	⦿	⦿
gRPC and HTTP load balancing	⦿	⦿	⦿
HTTP metrics	⦿	⦿	⦿
Identity-based authorization policy	⦿	⦿	⦿
Multi-cluster communication	⦿	⦿	⦿
Automated cross-cluster failover	⦿	⦿	⦿
Single page of glass dashboard		⦿	⦿
Linkerd health monitoring and alerting		⦿	⦿
mTLS traffic auditing		⦿	⦿
Policy violation alerting		⦿	⦿
Fully automated Linkerd upgrades and rollbacks		⦿	⦿
Fully automated certificate rotation (roadmap)		⦿	⦿
Policy analysis			⦿
24x7x365 Linkerd on-call support			⦿
SSO (ActiveDirectory, Okta, etc)			⦿
Service mesh solutions architecture review			⦿
Quarterly business reviews, access to maintainers, and more			⦿
