

SURTERRA

PREMIUM CANNABIS

PRODUCT GUIDE | VOL 1

WE GOT YOU

The world of cannabis can be intimidating, but have no fear – Surterra is here to make sure you find the highest quality products at affordable prices, all day, every day.

Looking for flower? Look no further. Craving edibles? Come get a taste. Are vapes your thing? Vape all day. From low-THC tinctures to potent concentrates and everything in between, whatever you're looking for, we got you.

Visit any of our locations across Florida and talk to one of our knowledgeable guides. They're ready to help you take the first steps on your cannabis journey, answer questions, suggest products, and make sure you're on your way to living your very best life.

DISPENSARY**

SMOKABLES

This is probably the type of cannabis you're most familiar with. Smokables are consumed by burning the cannabis flower and inhaling the smoke.

Our expert growers choose strains based on terpenes, cannabinoids, and overall medicinal benefits. They listen to patient feedback, look for what the community is lacking, and curate a variety that meets everyone's needs. And if they don't find what they're looking for in an existing strain, they'll breed one themselves.

FLOAT PREMIUM INDOOR FLOWER

These top-tier strains are grown in our state-of-the-art indoor cultivation facility, meticulously monitored from seed to harvest, then hand-trimmed and packed in airtight glass jars to provide the freshest, most potent flower experience possible.

FLORIDA DEP FLOWER

"Dep" is short for "light deprivation," which means the flower is grown in a greenhouse that manipulates the sun's natural light cycles. Florida Dep is a quality, affordable option that's consistently available in a variety of strains, ideal for anyone looking for a more cost-effective flower choice.

WHOLE FLOWER | 3.5 G

EDIBLES

Edibles are a great way to use cannabis without smoking or inhaling it. They're discreet enough to consume around anyone who doesn't enjoy cannabis themselves, and available in a variety of dosage options so you can partake in as much or as little as you like.

Also, they're delicious. Seriously. Our kitchen uses ingredients like luxurious Belgian chocolate and bright, natural fruit flavors to make our edibles so tasty you'll almost wish they weren't dosed.

TOPICALS

These products are absorbed through the skin, typically applied directly to an area causing pain or discomfort. Most consumers don't feel psychoactive effects from topical products.

The Fix Balm is made with soothing cannabinoids and cooling menthol to bring almost immediate relief to sore muscles or aching joints. Surterra Wellness Lotion and Patches are formulated to deliver the potential healing power of THC & CBD in a low-key, easy to use way.

If you're interested in the benefits of cannabis without the "high," our topicals should be at the *top* of your list.

AVAILABLE IN A VARIETY OF CBD : THC RATIOS

ORAL & SUBLINGUAL

Products that are consumed orally that aren't considered food or beverages fall into one of these two categories. Sublingual products are absorbed through the lining of the mouth, while oral products must pass through the digestive system.

Our tinctures, drops, and Theragels all consist of carefully formulated ratios of cannabinoids & terpenes. They're designed with specific effects in mind, so you can get the results you need in a quick and simple way.

Try adding a few drops of tincture to your morning coffee to stay medicated and motivated all day long, or include Theragels in your nighttime routine to encourage that restful and restorative sleep you've been dreaming about.

INHALABLE

These are concentrated forms of cannabis consumed through inhalation by applying heat to the product without burning it. These products are great for anyone who enjoys the instant onset and effects you can expect from flower or pre-rolls, but doesn't want to inhale smoke or leave a cloud lingering around them.

Inhalable concentrates can be made using fresh, flash-frozen plants (aka "live") or with cured plant material (like the flower buds you're familiar with). This material goes through extraction processes that are unique to each product – some are made using chemical solvents while others are produced using solventless techniques like screens and ice baths.

Our selection of concentrates appeals to novices and connoisseurs alike. The mad scientists – er, extraction experts – in our labs start with the best plant material and use a variety of innovative techniques to create some of the cleanest, purest concentrates on the market.

VAPES

Vapes contain different forms of liquid-like cannabis oils and can be made using specific strains or a blend of cannabinoids & terpenes.

Available in disposable vape pens, cartridges & pods.

CONCENTRATES

A cannabis concentrate is a highly potent product made by extracting key elements – like terpenes, cannabinoids and flavonoids – from the rest of the plant materials, usually under high temperatures and pressure.

WHAT'S CBD?

Also known as cannabidiol, CBD is one of the main molecular compounds found in the cannabis plant. It works differently than THC, which is why CBD-forward products typically don't cause the "high" you expect from cannabis.

CBD may help treat symptoms of:

- ♦ **INFLAMMATION**
- ♦ **SEIZURES**
- ♦ **INSOMNIA**
- ♦ **ANXIETY**
- ♦ **GASTROINTESTINAL CONDITIONS**
- ♦ **MIGRAINES**
