

# HALLWORTH

## ODYSSEY

A collection of lighting inspired by celestial bodies, space, dreams, things far and away. 'Odyssey' is a continuous exploration into the intrigues of other worlds.

## A51

A51 is inspired by a rocket booster's center core perceived from a distance, and nods to the highly-classified, "Area" we can only imagine. Engine-turned glass diffusers in perforated aluminum cans provide a mechanical counterpoint to elegant shadows and soft light it emits in a radial pattern.

## SPECIFICATIONS

Materials: Powdercoated aluminum cans with perforations.  
Engine turned glass diffusers.

Dimensions: 11'-4" L | 4'-3" W

Wattage: Max. 25 watts
