

Template for business card design

Side One

Side Two (Optional)

Tips for Success

Use only pure black for artwork

Minimum line width of .25pt, or .003"

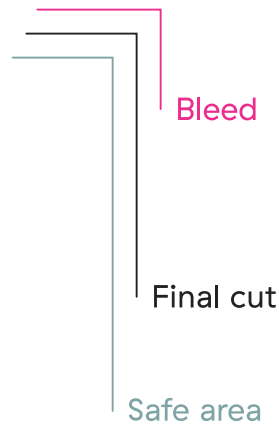

Do not use opacity on any type or art

Use font size 6pt or larger

Outline all type before submitting

Scan and save line art at 1200 DPI

Avoid heavy ink areas wider than .25"

Bleed

If you choose to have art extend beyond the edge of your card ("bleed"), make sure it extends out to this line.

Final cut

This is roughly where the edge of your card will be cut.

Safe area

Keep art inside this line, unless it intentionally bleeds off the edge of the card.
