## Bleed

If you choose to have art extend beyond the edge of your card ("bleed"), make sure it extends out to this pink line.

## Trim

This is roughly where the edge of your card will be cut.

## Safe Area

Keep art inside this line, unless it intentionally bleeds off the edge of the card.

## Tips for Success

- Use only pure black  
RGB: #221F20  
CMYK: C0/M0/Y0/K100
- Outline all strokes and type before submitting (the most frequent cause of print delay)
- Minimum line width of 0.25pt or .003"
- Avoid heavy ink areas of art wider than 0.25" or 18pt (additional cost if multiple print runs are required)
- Use font size 6pt or larger
- Do not use opacity on artwork
- For line art, scan and save at 1200 DPI
