

Darktrace Products & Services

Almost 8,800 organizations rely on Darktrace to reduce risk and minimize cyber disruption.

Darktrace's product suite is powered by AI that learns every detail of your unique environment, building an evolving understanding of "self" to spot subtle deviations indicative of a vulnerability or threat. For every interaction across your digital ecosystem, Darktrace asks - Is this normal? - based on raw datapoints and AI-enhanced data features. Understanding you is the key to illuminating and interrupting the full range of cyber-threats, from novel attacks to insider threats.

Self-Learning AI sits behind every component of the Cyber AI Loop™, empowering bespoke, comprehensive, always-on, and continuously evolving security solutions based on mathematical models unique to each individual organization, regardless of size or complexity. No two organizations are the same, and their security solutions shouldn't be either.

Darktrace PREVENT™

Harden defenses inside and out

Darktrace PREVENT empowers security teams to reduce cyber risk by prioritizing vulnerabilities and hardening defenses proactively.

Darktrace DETECT™

See attacks instantly

Powered by a bespoke, continuously evolving understanding of you, Darktrace DETECT delivers instant visibility of threats – even those using novel malware strains or new techniques.

Darktrace RESPOND™

Disarm in seconds

Darktrace RESPOND uses its understanding of your bespoke organization to take precise and targeted action, interrupting cyber-attacks, without disrupting regular business operations.

Darktrace HEAL™

Be ready, recover quickly

The HEAL product family – scheduled for general availability in 2023 – will allow organizations to recover in the event of a cyber-attack by returning systems to a trusted operational state.

Darktrace Cyber AI Analyst™

Bringing the human into the loop

Darktrace's Cyber AI Analyst sits at the heart of the Cyber AI Loop, connecting the dots between single events to build a picture of the wider security incident, before presenting this to human teams. As a result, triage time is cut by an average of 92%, helping security teams to understand instantly what happened and why.

Darktrace Mobile App

Neutralize threats while on the move

The Darktrace Mobile App empowers security teams to investigate and respond to threats while in transit. Designed for maximum flexibility, the Mobile App increases the speed of threat mitigation by offering push notifications of in-progress attacks, while enabling organizations to triage incidents and neutralize threats no matter what the time or situation.

Comprehensive protection wherever you need it

Cloud

Apps

Email

Endpoint

Network

Zero Trust

OT

For every major partner and service including:

Darktrace technology works for organizations of all sizes and can be brought to any environment, protecting email and cloud services, endpoints, zero trust technologies, and IT/OT networks.

Rather than looking at each of these areas in isolation, Darktrace's cross-platform visibility and analysis gives it the context it needs to understand the full picture of a cyber-attack.

Darktrace services

Ask the Expert: Darktrace Cyber Analysts deliver rapid feedback and expert mediation advice, with easy to use chat functionality and 24/7 assistance.

Proactive Threat Notification: With this around-the-clock, comprehensive threat notification service, customers are contacted immediately in the event of attack. Over 1,000 customers large and small make use of PTN, delivered by Darktrace Security Operations Centers (SOCs) in Cambridge (UK), San Francisco, and Singapore.

About Darktrace

Darktrace (DARK.L), a global leader in cyber security artificial intelligence, delivers complete AI-powered solutions in its mission to free the world of cyber disruption. Its technology continuously learns and updates its knowledge of 'you' for an organization and applies that understanding to achieve an optimal state of cyber security. Breakthrough innovations from its R&D Centers have resulted in over 145 patent applications filed. Darktrace employs over 2,200 people around the world and protects c.8,800 organizations globally from advanced cyber-threats.
