

Participate in TEFCA and the CalHHS DxF

Join the nation's only dual-designated QHIN and QHIO for secure nationwide data exchange

With our designation as a QHIN at the federal level and QHIO in California, Health Gorilla enables organizations to participate seamlessly in government-endorsed data exchange frameworks, offering a secure way to exchange comprehensive patient data with most healthcare providers.

Participate in TEFCA and comply with California's DxF

Health Gorilla is the only dual-designated QHIN & QHIO, enabling organizations to capture state & federal government incentives.

Make patient data actionable for care teams

Ingested patient data is normalized, de-duplicated, and organized into a longitudinal record, actionable for care teams.

Access more than just EHR data

Health Gorilla offers value-add data solutions not offered by any other QHIN, including national ADTs alerts, lab ordering automation, and more.

In-house tech & customer support

Health Gorilla employs engineers and customer support staff full-time, resulting in responsive support, knowledgeable solution architects, and quicker time-to-value.

Capture proposed incentives from CMS and HHS for participating in TEFCA through our QHIN.

Federal agencies have proposed financial incentives for organizations that participate in TEFCA, including an increase to MIPS scores and opportunities to increase CMS reimbursement. In addition, compliance with the CalHHS DxF by the January 31st deadline may help organizations avoid potential financial penalties.
