

FLOW DOWN

WHAT IS FLOW DOWN

Flow down is a functionality in our auditing software, Audit. It allows you to send auditing questionnaires all the way down to the bottom of your supply chain. When you send an audit to a supplier, our software allows them to pass the audit on to their suppliers, effectively pushing it down the chain.

YOUR SUPPLY CHAIN. YOUR VALUES.

With Flow down you can send policy documents, such as your Code of Conduct, all the way to the bottom of your supply chain in an easy and effective way. You will gain an overview of how many sub-suppliers have answered the audit, and how many steps the audit has been passed along.

GET AN OVERVIEW OF YOUR ENTIRE SUPPLY CHAIN

This functionality gives you an overview of both suppliers, and sub-suppliers. You can at any time view how far the audit has been passed on, and if it has been answered.

EASILY HOLD RELEVANT SUB-SUPPLIERS ACCOUNTABLE

Flow down makes it possible to hold both suppliers and sub-suppliers accountable. Ensure that your policy documents and values are agreed upon throughout the supply chain.

LOCK QUESTIONS, SO THAT CRITICAL PARTS ARE NOT CHANGED

When you create an audit with Flow down, you have the opportunity to choose which questions will be locked as the audit is passed on, and which can be changed. This allows your suppliers to make adjustments and customisation, while also giving you the power to ensure that specific demands or criteria are addressed.

EVERYTHING GATHERED IN THE SAME PLACE FOR YOU AND YOUR TEAM

Orixе provides you with all the necessary information you need to comply with supply chain legislation and due diligence processes, and gathers this in one place so that all members of your team have a continual overview of relevant data.
