GCB MEDICAL SUPPLY

# Isolation Gown

## Levels 1 - 4

---

GCB Medical Supply offers a variety of Isolations gowns. Including levels 1-4, which incorporate a range of protections for your caregivers needs. Our gowns provide an assortment of styles for specific applications around your care facility.

In regulation with the FDA, our level one and two gowns are considered a type one medical device and are identified as an isolation gown. Our level three and four gowns are considered a type two medical device and identified as a surgical gown or a surgical isolation gown based on the zone testing requirements.

Level	Application	Description	Test Requirements	Test	Results
1	Basic care, standard hospital unit	<b>Minimal risk</b> Provides a slight barrier to small amounts of fluid penetration	One test is conducted to assess barrier protection performance *data on file	Water AATCC 42	Water impact $\leq 4.5$ g
2	ICU, Pathology lab, blood draw, suturing	<b>Low risk</b> Provides a barrier to larger amounts of fluid penetration through splatter and some fluid exposure through soaking	Two tests are conducted to assess barrier protection performance *data on file	Water AATCC 42 Pressurizing AATCC 127	Spray impact $\leq 1.0$ g Hydrostatic pressure $\geq 20$ cm
3	Emergency Room or trauma cases	<b>Moderate Risk</b> Provides a barrier during arterial blood draw, inserting an Intravenous (IV) line	Two tests are conducted to assess barrier protection performance *data on file	Water AATCC 42 Pressurizing AATCC 127	Spray impact $\leq 1.0$ g Hydrostatic pressure $\geq 50$ cm
4	Operating Room	<b>High Risk</b> Provides a barrier during surgery or other fluid intense procedures. Used when pathogen resistance is needed or infectious diseases are suspected.	One test is conducted to measure the resistance performance *data on file	ASTM F1671	Pass
