

CREW CONNECT

Lets You Access Your Systems with any Internet-Enabled Device

Being informed about the condition and performance of the machine at all times and everywhere on board can quickly save a lot of money. And the data access that is possible everywhere also makes the whole thing convenient.

KEY FEATURES

- Visualization of live operational data and warning messages
- Report generation with operational KPIs including nautical and machinery data
- High resolution graphs for all primary signals
- Add live values to customized containers
- Usage of Hoppe calculation and analysis library
- Automatic detection of operation mode (harbour/sea)
- Fuel consumption matrix for different consumers and fuel grades
- User and access management for individual configuration and thresholds
- HOWEB functionalities with day- and night view and remote updates

OUR PRODUCT RANGE

CONTROL SYSTEM

- Valve Remote Control
- Anti-Heeling
- FLUME Box Tank — Roll Damping
- INTERING U-Tank — Roll Damping
- Dock Control
- Floating Condition Control

MEASURING SOLUTIONS

- Tank Content Measurement
- Bunker Management
- Draught Measurement
- Dynamic Draught and Floating Monitoring
- Maihak Shaft Power Meter
- Maihak SHaPoLi
- Fuel Consumption Measurement
- Electronic Inclinator

INFORMATION SERVICES

- Performance Monitoring
- Crew Connect
- Fleet Connect

FLEET SERVICES

- Technical Support
- Spare Parts
- Service On Board
- Retrofit
