Work Experience

Product Design Consultant

November 2019 - Present, San Francisco/Los Altos

- CAD modeling, 3D printing, Graphic Design
- Transforms ideas into high-quality designs
- Combines business insight with technical creativity
- Delivers exceptional, diverse client results

Mushroom / Founder + Design Director

May 2020 - Present, Los Altos

- Founder of Mushroom, leading the entire process of hardware product design and engineering.
- Utilized Solidworks and Fusion 360 for creating precise and integrated manufacturing-ready models.
- Leveraged Keyshot to produce visually captivating representations, enhancing user experience.
- Developed a cohesive brand identity, effectively communicating the product's unique value proposition.
- Crafted design guidelines, including product renders, website design, pitch deck, and logo.
- Created a comprehensive visual identity reflecting the company's core values and differentiation.
- Established a strong brand strategy, setting the company apart from competitors.
- Successfully created a compelling product resonating with the target audience.
- Built a robust brand identity through experience as founder and designer at Mushroom.

Education

San Francisco State University

BS Industrial Design

08.2017 - 05.2020

I acquired valuable hands-on experience in the design field, including knowledge of the design process, proficiency in design software, skills in prototyping and collaboration.
