

# FACT SHEET

Alert Labs provides water and A/C intelligence that helps businesses protect people and buildings, lower costs and increase efficiency.

Proudly designed and built in North America, our solutions combine award-winning, commercial-grade cellular-connected sensors that require no WiFi with cost-saving and sustainability insights from our AlertAQ intelligence platform.

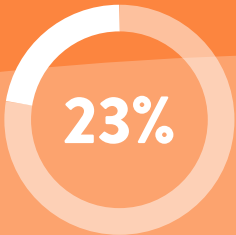

We partner with property managers, building owners, insurance companies, municipalities, schools and other organizations throughout North America.

## MISSION

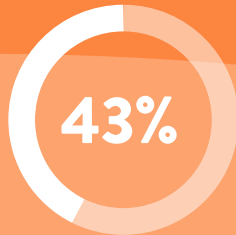

To build easy-to-use, effective and reliable smart building technologies that help lower utility costs and minimize damage.

## SOLUTIONS

- **AlertAQ** water and A/C intelligence platform
- **FLOWIE & FLOWIE-O** water flow sensors
- **FLOODIE** flood sensor
- **HUMIE** humidity and temperature sensor
- **SENTREE** air conditioning monitoring system
- **SHUTTIE** automatic water shut-off valve

of Alert Labs customers find a leak within the first month

average rise in water costs over the past decade

of a home's energy bill can be due to air conditioning

of buildings that use Alert Labs sensors have discovered leaks

## WORLD WATER DAY 2022

**10,000+**  
leaks detected

**28.9 BILLION**  
pounds of CO<sub>2</sub>e saved

**5 BILLION**  
gallons of water saved

**25+ BILLION**  
gallons of water tracked annually

**\$250k** average cost of flood at a luxury condo

1 in 4 toilets leak. In a 100-unit apartment, the annual cost is

**\$27k**

**146%** average ROI, for Alert Labs solutions, across all building types and industries
