

Central teeth extraction

with Sponge Zengraft and UniCrown

CLINICAL CASE BY

by Dr. Ira Reiz, DMD

Dr. Reiz has been practicing Dentistry for over 25 years and takes pride in treating all patients with the highest quality dental care, and will bring his caring dedication to our practice. He graduated from UMDNJ/Rutgers University in 1991 and has extensive knowledge in all latest dental technology and material sciences.
Gaithersburg, MD

Central teeth replacement. UniCrown LC was chosen as a temp crown material, bonded to adjacent teeth until the patient is healed. Layered for higher esthetics. SpongeZengraft plug for the post-extraction socket, no membrane used! The site is sutured with PGA sutures.
