

Shop Through Us to Save the Planet This Christmas

Go Paperless

In addition to having the option to donate toward eco-projects, we also encourage employers to solely use ecards as their means of rewards to avoid paper production of Christmas cards. Every year 1 billion Christmas cards are put in the bin, which comes at a pretty high environmental cost, using up to **280 million tonnes of carbon** just for spreading some Christmas cheer.

Send a Gift Card

By sending a gift card, you'll be saving wrapping paper and won't be adding to the 100 million rolls the UK gets through each Christmas - approximately 227,000 miles of the pretty paper stuff. That's enough to wrap the equator nine times!

Donate a Tree

Even if you have to use the odd bit of wrapping paper or receive a Christmas card here and there, you can give back to the planet by donating a tree through us today!
