

NON-PROFIT HOUSING AVOIDS \$10,000 IN WATER DAMAGE WITH AlertAQ™

Colin MacIntosh is Property Services Director with the House of Friendship, a charitable social service agency that manages a number multifamily and community buildings. Colin would usually find out about water damage at a property after getting a phone call in the middle of the night. Since he installed Alert Labs water intelligence solutions, the House of Friendship has saved over \$10,000 by avoiding water damage costs caused by leaking hot water heaters and other water problems at the Eby Village apartment building.

“Now, I’m getting an advanced text warning from the AlertAQ platform I know we’re catching something before the storm hits,”
