

SAFARI VEHICLES SEATING PLAN

The TAT Luxury Land Cruiser has three rows, 7 seats, 1 seat next to driver in the front and a removable roof, this vehicle is spacious, comfortable and perfect for long days in the Tanzanian wilderness. The cruiser includes outlets to charge your phone, laptop, and/or camera, comfortable seat cushions, a refrigerator cooler for cold drinks and snacks, and seat-back storage for binoculars, phones, etc.

The detachable roof of the cruiser is perfect for a better view of the wildlife. When standing in the cruiser looking out into the park, you feel almost no separation between you and the animals in front of you. This along with easily opened sliding windows, allows you to feel close to Tanzanian wildlife without the danger.

Tanzania Adventure Tours also provides unlimited mileage for your safari. You decide when to head back or keep pursuing that family of big cats, not the mileage gauge.
