#### **Business Overview**

- 1. Growth in sales and profitability is as per budget. Margins have improved due to continious focus on credit control, inventory management and better product mix.
- 2. Export sales have been slower than anticipated, would remain to be slow in this financial year. The distribution infrastructure creation mainly in Africa is as per schedule but product registrations in various countries is going on slower than anticipated, a situation beyond our internal control. This slower growth in exports would be compensated by higher domestic sales, thereby hoping to achieve the FY17 targeted sales.
- 3. The company has launched its Brucella vaccine for cattle, becoming the second producer in India of the vaccine. Brucella has a good market in India as well as internationally, in our target areas.
- 4. Nepal plant has commerced commercial production on 15 November 2016.
