

40X MORE EFFICIENT THAN HEPA FILTERS

Installed at your home's point of entry, this revolutionary machine uses patented DFS filtration technology to circulate fresh, contaminate-free, air throughout your entire home. It's fitted in with your HVAC system resulting in lower pressure drop, and higher energy savings.

In a 2020 survey, 70% of home-buyers ranked a home's "health" as equally or more important than aesthetics, longevity and cost. At TruAQ, we couldn't agree more. That's why we developed our Super V whole-house air cleaner.

FEATURES

- Filtration unit capacity - 2000 CFM
- Point of entry medical-grade air cleaning
- Greater than Merv 16 efficiency with half the pressure drop
- Microbial inhibition property
- Lock tight filtration seal - all air must pass through DFS filter
- Award-winning patented DFS technology
- Deactivates mould, viruses, fungi and bacteria inside the filter
- Most energy-efficient whole-house air cleaner
- Up to 3 years of filter life (50% cycle duty)
- 211 sq ft of filter media coverage

DIMENSIONS

- Filter status light
- Pressure switch monitor
- Power consumption - 4 watts
- Dimensions - 27" x 24" x 14"
- Weight with filters - 69 lbs, 31.3 kg

EFFICIENCY

Removing PM 5.0	up to 100%
Removing PM 2.5	up to 99.99%
Removing PM 0.5	up to 99,87%
Removing PM 0.3	up to 99,61%
Removing PM 0.007	up to 99%

PRESSURE DROP

AIR FLOW RATE	DIFFERENTIAL PRESSURE
2000 cfm	0.27 inWG
1600 cfm	0.19 inWG
1400 cfm	0.16 inWG
1200 cfm	0.13 inWG
1000 cfm	0.11 inWG
600 cfm	0.07 inWG
400 cfm	0.04 inWG
