

Empower your Front Line Workers.

Developed with the help of industry leaders, MindForge is a software platform that allows you to establish a communication network with your field personnel and put just-in-time information and education in the palm of their hand. With efficient knowledge sharing across all crews, you will save time, increase your work quality, and empower your workforce to stay safe.

Unify **safety, quality** and **production.**

MindForge brings operations, safety and quality under one roof because all of these components are essential to success.

There are two parts to MindForge: **The Platform** and **The Content.**

The Platform:

Add your employees and subcontractors to The Platform, organize them into teams and communicate.

The Content:

Upload your content or pull from our marketplace content with more than 200 videos, assign it and track completion.

Deliver successful projects by utilizing tools that **rapidly share knowledge and information with your field crews.**

Send Alerts + Announcements to the Field

Close communication gaps with quick updates pushed out to the field, taking productivity to the next level.

Two-Way Text Communication

Get questions answered quickly, test your crew's knowledge, and engage in conversations with our Two-Way Chat feature.

Assign Just-in-Time Training

Using MindForge, stay on top of the ever-changing jobsite by giving your crew on-demand training, refreshers, and guides for specific tasks.

Rapidly Onboard Workers

Onboarding codes allow you to rapidly add employees and trade partners to the system so you can start communicating right away.

Achieve Performance Excellence with MindForge.

Developed with the help of industry leaders, MindForge is a software platform that allows you to establish a communication network with your field personnel and put just-in-time information and education in the palm of their hand. With efficient knowledge sharing across all crews, you will save time, increase your work quality, and empower your workforce to stay safe.
