

BLACKMAX Iron®

Roofing Granules

Product Specifications

MineralTech Gulf Coast Abrasives, LLC supplies roofing granule products to the shingle manufacturing industry in the United States market. We take pride in the partnerships we have developed since 2011 and work diligently with manufacturers to meet all their specifications.

MineralTech delivers premium quality roofing granules that are a critical raw material used in the production of asphalt roofing shingles.

We supply the following BLACKMAX Iron® roofing granule products:

- MineralTech BLACKMAX Iron® Headlap Granules (16/40)
- MineralTech BLACKMAX Iron® Surfacing Products (20/40)
- MineralTech Back Surfacing Granules (50-Silica)

All MineralTech roofing products are sourced from an environmentally sound process. MineralTech can make a variety of different sizes to meet your custom needs.
