

Systems Engineer

Joint Base McGuire-Dix-Lakehurst

Who we are:

Altagrove delivers smart and innovative technology solutions that create competitive advantages for our customers and their missions. Our focus areas include Space, Connectivity, Cyber, Cloud, Analytics, and Research & Development. As we continue to grow, Altagrove is actively recruiting for a Systems Engineer to join our energetic and entrepreneurial team that is executing on a variety of projects that are technology oriented. A successful candidate will bring a core area of expertise and a passion for learning and implementing new ideas in a start-up environment.

Follow us at - <https://www.linkedin.com/company/altagrove>

What you will do:

- Develop and manage complex, end-to-end network/system design and integration, coordinating closely with Core Engineering, Solutions Engineering and Program Management.
- Provide technical analysis and detailed network design including network diagrams, as-built documentation, resource planning, and associated hardware and software requirements.
- Execute independently in client-facing environment.
- Design, plan, and execute network and/or system laboratory and demonstration exercises.
- Support planning, testing, documentation, and delivery of new product offerings.
- Display excellent writing, presentation, and verbal communication skills.
- Independently create compelling, client-facing deliverables.
- Provide excellent analytical skills, consulting approach, and attention to detail.
- Bring a technical aptitude and ability to learn technical concepts.
- Use proficiency with Microsoft Word, PowerPoint, Excel, and Project.
- Must be flexible to travel periodically in support of customer engagements and conferences.

What you will bring:

- Executes with an entrepreneurial spirit with a willingness to go the extra mile on behalf of our customers and their missions.
- Seeks the energy of a start-up environment and the opportunity to be a significant contributor to early-stage company growth activity.
- Consistently seeks to learn new concepts – both technical and programmatic – and quickly incorporates innovative ideas and methods into project execution.
- Contributes directly to proposals describing Altagrove solutions and the value proposition.
- Initiates routinely scheduled performance metrics reports and coordinates technical functions required to support the customer and the Altagrove team.
- Assists with data analysis and development using a variety of data resources in order to support the preparation of cyclical reports.
- Requires background investigation and ability to gain US security clearance.
- US citizenship required.
