Our story-based approach to immersive learning

People learn better by doing. With VR training, learners are fully immersed in a virtual, safe and distraction-free environment where they can practice for complex situations in a consistent, repeatable way. Storytelling adds emotion to trainings and improves retention, as emotional events are likely to be recalled more often and with more clarity and detail.

Our story-based approach to training combines advanced learning theory, behavioral and cognitive science, and spatial design into an interactive and highly effective learning experience. Learners are in control of their own story and are free to make their own choices in a hands-on way. This way, they can learn by experiencing the consequences from their choices.

"Learning from a well-told story is remembered more accurately, and for far longer, than learning from facts and figures."

Peg Neuhauser, Organizational Psychologist

Guidance at every step of your journey

We'll help you every step of the journey to implement VR training in your company. Get up and running quickly with product onboarding and workshops. Stay on track with a joint impact plan and regular health check-ins.

storytelling

● 360° filming techniques
for beginners

● Implement VR training
into your business

● Advanced 360° filming
& production

● Advanced immersive
storytelling

Create your first immersive scenario

Discover the capabilities of Warp Studio in this workshop designed to simplify your transition into the world of immersive scenario creation.

- **Introduction to immersive scenarios:** understand the essence of creating engaging, interactive experiences.
- **Warp Studio:** explore the heart of immersive storytelling.
- **Scenario flow & choices:** learn how decisions shape narratives and boost engagement.
- **Hands-on experience:** craft your first scenario under expert guidance.

The basics of immersive storytelling

Unlock the secrets of immersive storytelling in this workshop, where we'll show you how to easily create powerful VR training stories.

- **Storytelling basics:** learn key storytelling components, from story elements to understanding conflicts.
- **Unique frameworks:** discover our exclusive frameworks and dedicated worksheet.
- **Hands-on:** delve into interactive non-linear storytelling and master short active questions
- **Modern storytelling:** grasp age-old structures and tweak them for today's interactive tales.

360° filming techniques for beginners

Become a master in the art of immersive video creation with our comprehensive 360° filming workshop.

- **Foundations:** delve into the essentials of 360° filming, from equipment to camera settings.
- **Our distinct method:** uncover our specific approach to pre-production, from planning to site visits.
- **Engage & learn:** participate in a VR training scenario, understanding the nuances of on-set filming.
- **Post-production mastery:** navigate the post-filming landscape, from stitching to publishing, ensuring your videos stands out.

Implement VR training into your business

Create impact by implementing VR on all organizational levels. From teamwork to scenario distribution, we discuss your use case in-depth and define next steps for internal growth.

- **Teamwork:** define team responsibilities and manage spreading the word internally.
- **Devices and maintenance:** discuss device options most fit to your use case and their maintenance.
- **Trainees engagement:** discover different distribution ways and how to engage trainees with VR scenarios.

Warp VR workshop bundle

Our train-the-trainer creator bundle combines different workshops as a fast-track to learn how to create & produce story-based VR training scenarios.

Master the art of crafting interactive VR narratives from basics to advanced techniques. Delve deep into Warp Studio's functionalities, grasp 360° filming essentials, and adapt age-old storytelling for modern VR. Equip yourself to seamlessly integrate VR into your business, enhancing team dynamics and trainee engagement.

Advanced 360° filming & production

Elevate your 360° filming skills with this intensive workshop tailored for those ready for the next step.

- **Precision audio:** master separate audio recording for sound clarity.
- **Editing mastery:** dive into video and audio effects for more impact.
- **Advanced stitching:** perfect seamless 360° videos with advanced techniques and tools.
- **Crew dynamics:** utilize a professional film crew for faster productions.
- **AI in filming:** how to use AI for slow-motion.
- **Warp Studio tools:** optimize trainees experience with initial orientation.

Advanced immersive storytelling

Take your storytelling to the next level with advanced methods that captivate your audience throughout.

- **Setup mastery:** utilize setups and payoffs for intricate tales.
- **Character depth:** strategies for creating lifelike characters.
- **Building suspense:** engage your audience from start to finish.
- **Tailored challenges:** balance engagement and comprehension.
- **Narrative twists:** add unexpected layers effectively.
- **Real dialogues:** craft conversations that truly resonate.

“Warp VR’s support team did a terrific job!”

”I just finished my 2nd homework for review tomorrow with the support team. This helps me to imagine how trainees would respond and what questions we can best ask them. Warp VR’s support team did a terrific job in explaining this to us. Much appreciated!”

Adinin Talip, Head of HSSE/SP Learning at Brunei Shell Petroleum

Speed up with help from experts

Build immersive learning experiences your employees will love with a little help from our community of experts in instructional design, media production & implementation.

Contact us for detailed information and prices.

- **Script writing** - create story-based immersive scenarios with expert advice on writing & storytelling
- **Filming & production** - improve the filming process from pre- to post-production
- **Review sessions** - improve your scenarios and ensure a smooth rollout & adoption of VR training in your company
- **Other services** - casting, video effects & CGI, lighting, makeup, styling, location scouting for filming, hardware

Script writing

Create story-based immersive scenarios with expert advice on writing & storytelling.

Collaborate with one of our scenario experts and write story-based immersive scenarios according to the needs of your business.

The scenarios will be created using a multidisciplinary approach which includes the topic of interest, why it is important, who it will be made for and how it will affect your business. You'll also learn more about storytelling, asking the right questions, creating dialogues for actors and setting the right challenges for the best learning impact.

Filming & production

Learn everything you need to know about filming, including hiring & preparing actors, finding locations, working with actors, editing, adding visual effects and stitching.

Our experts can help you film the perfect immersive scenario for your business.

In the pre-production phase, we can assist you in finding, hiring and preparing actors for their roles, as well as discovering and booking the right locations.

During filming, we bring an experienced 360° filming crew to ensure a high quality result.

In the post-production phase, we help you edit, stitch and upload all media to Warp Studio.

Review sessions

Ensure a smooth rollout & adoption of VR training in your company, expand to other business units or departments, and learn how to convince management.

If you've created a scenario but feel like you could use an extra pair of eyes and feedback before continuing, our immersive and story-based scenario experts can give you a hand.

During a review session, one of our immersive learning experts will review your scenario and provide you with feedback to help you improve it.

- If not filmed yet - give you handy tips and tricks to get it ready for filming.
- If already filmed - review the recordings and point out what might need updating.

“A great success story.”

“The collaboration with Warp VR was really great, because we worked together as a team. We knew exactly what we wanted to achieve and it was clear who was doing what. For me as Head of Learning & Development, it's important to get really good support from the very beginning until the end. So far it's been a great success story regarding collaboration and most important the outcome.”

David Gezzele, Head of Learning & Development at Erste Bank
