

Data Strategy & Reporting Implementation

Goal:

To create accurate, timely, and reliable reports, which allow Blue Medical Group's physicians and administrative leaders to drive accountability, make informed strategic decisions, and improve performance

Client: Blue Medical Group*

Independent Physician Group

Location: Midwest

of Physicians: 265+

of Specialties: 40+

of Locations: 60+

*Please note that Blue Medical Group is a pseudonym

Hurdles:

- **No formal data strategy** plan with siloed reporting across departments
- **No single source of truth** enterprise data warehouse

- **Limited key metric calculation documentation and standardization**
- **No defined monthly validation process**
- **Wanting to develop data analytics capability** to support transition to value-based payment and MSO services to community partners

Friendly Referral Rates

Results:

- **Developed** a coherent **data strategy process** in collaboration with Blue Medical Group
- **Created a single source of truth** to better understand performance and opportunities
- **Implemented a data strategy platform** to produce accurate & reliable management reports
- **Provided** the flexibility and **capability to incorporate new data sources**, e.g., third-party claims data for value-based care analytics
- The data strategy platform enabled Blue Medical Group to **identify significant network fidelity opportunities** for specific specialties

Ancore's Approach to Analytics

Reporting aligned with strategic priorities

Actionable metrics informing decisions and aligned with accountability

Comparison to trusted internal and external benchmarks

Single source of truth for transparent reporting

Empowering physicians and operators where they are

Celebrate success, drive accountability
