

Zetwerk automates its ESOP Management processes for scale using Qapita.

For Zetwerk, it is important to have full control over equity awards reporting and have ability to securely share ESOP data with the leaders across the businesses.

A black and white photograph showing a close-up of a complex mechanical assembly. Several interlocking gears of different sizes are visible, along with various metal components, bolts, and a cylindrical shaft. The lighting creates strong highlights and shadows, emphasizing the textures and metallic surfaces of the machinery.

ABOUT ZETWERK

ZETWERK is a universal manufacturing network powered by new-age technology.

It is transforming the world of traditional manufacturing by helping customers reduce costs, optimize suppliers and execute production faster.

COMPANY SIZE

1,000+ employees, Unicorn

LOCATION

Bengaluru, India

INDUSTRY

Industrial Machinery Manufacturing

USE CASE

Automation, Security, Scalability

KEY FEATURES USED ON QAPITA

User Rights and Roles, Reports

SINGLE, AUTOMATED PLATFORM

Zetwerk were faced with a challenge of having to collate data from various sources on an earlier platform for the purpose of internal reporting to business leaders who required visibility over their teams' equity awards.

Qapita's best-in-class Custom Rights and Roles functionality allowed the team at Zetwerk to leverage the platform's reporting engine to provide the right level of information for all its internal stakeholders in a secure manner, ensuring strict confidentiality of employee data.

The custom roles and rights feature gives the administrators the ability to create tailored access levels, so the team members can only view only the information relevant for them.

"A hyper growth startup like Zetwerk which believes in wealth creation for our employees needs solutions that scale and Qapita has been the right fit for us"

- Ginu Nair, Vice President - Human Resources
