

ENSPCT.

Leading Digital Transformation of Field Services and Inspections

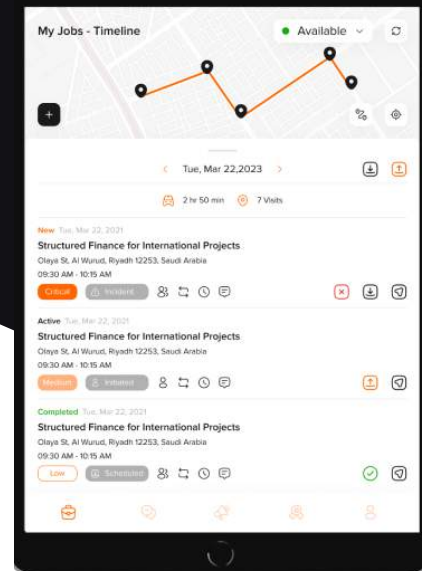

ABOUT ENSPCT

ENSPCT PROVIDES SMART SOLUTIONS TO OPTIMIZE FIELD SERVICE OPERATIONS AND TRANSFORM OUTDATED PROCESSES THROUGH DIGITAL CAPABILITIES

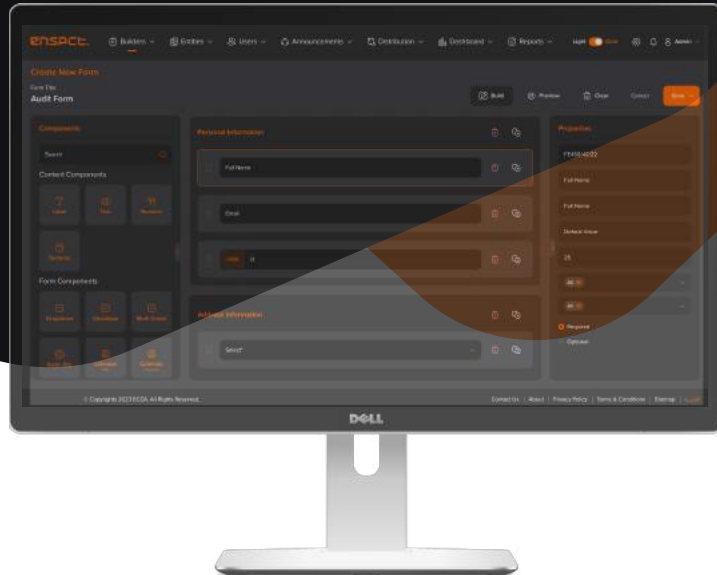

- Our software empowers field teams with the tools needed to improve efficiency, connect deskless workers, and keep pace with today's digital landscape.
- With Enspct, organizations can automate workflows, manage mobile workers, enable risk-based audits, and conduct remote inspections. We are leading the change in digitally transforming field services and inspections.

MOBILE WORKFORCE MANAGEMENT

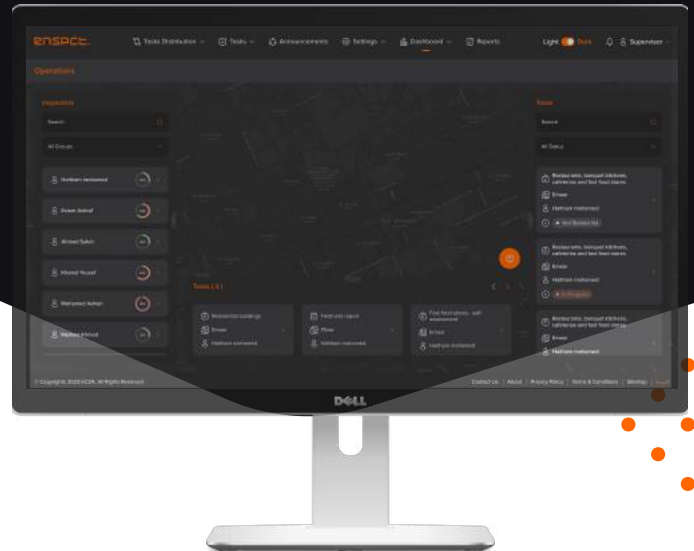

- Our software provides powerful mobile capabilities to manage your dispersed field workforce.
- Technicians can access schedules, jobs, forms, and reporting right on their mobile devices.
- Location tracking allows real-time visibility into field worker movements and activity.
- Mobile messaging and push notifications keep everyone connected.
- Teams stay coordinated with shared calendars, automated dispatch, and integrated scheduling.

MODERNIZING PROCESSES

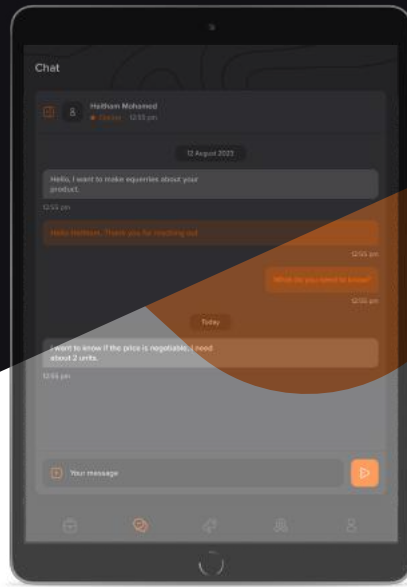

- Enspct helps modernize legacy field service processes through digital transformation.
- We migrate paper-based forms, checklists, and procedures to automated digital workflows.
- Mobile capabilities keep field workers connected and productive with modern tools.
- Real-time data replaces outdated reporting and analytics.
- **Our software provides the digital infrastructure to bring your field processes up to date with today's technology landscape.**

OPERATIONS OPTIMIZATION

- Our software optimizes overall operations for field teams through data-driven insights and automation.
- Custom reporting and analytics provide visibility into performance.
- Workflow automation increases efficiency by standardizing processes.
- Predictive scheduling optimizes job allocation and technician routing. Real-time alerts notify managers of critical issues.
- **Enspct gives you the tools to continuously improve and refine field ops.**

DESKLESS CONNECTIVITY

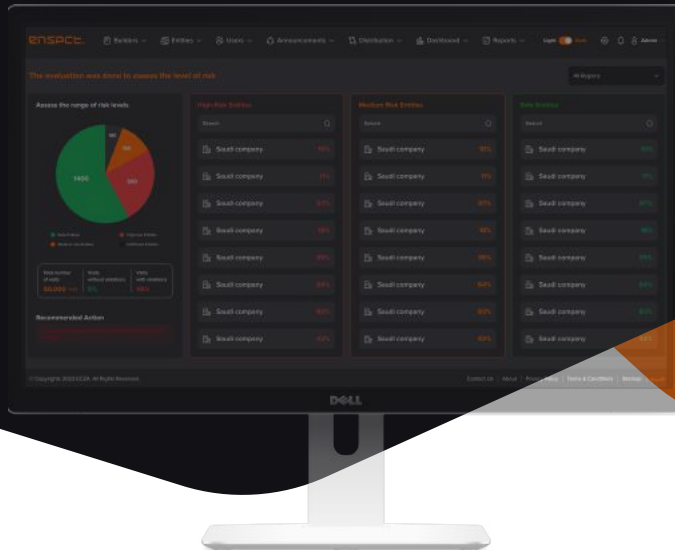

- Enspct connects your disparate deskless workers across the field and back office through shared data and collaboration tools.
- Instant messaging,, and file sharing break down information silos.
- Integrated workflows ensure continuity between office and field. Automated data syncing gives everyone real-time access to critical information.
- **Mobile access keeps field workers continuously connected.**

REMOTE INSPECTIONS

- With Enspct, field teams can conduct remote, virtual inspections when on-site visits are not feasible.
- Our mobile apps allow submission of photos, videos, annotations, and more to document site conditions.
- Digital checklist forms standardize data collection. Chat, and file sharing enable real-time collaboration.
- **Virtual inspections reduce costs and enable inspection of remote sites.**

RISK-BASED AUDITS

- Enspect enables risk-based auditing to optimize inspections.
- Customizable risk scoring profiles allow you to focus audits on high-risk areas.
- Automated scheduling takes risk profiles into account when allocating inspections.
- Mobile auditing tools provide guided workflows for consistent execution.
- **Real-time visibility into audit findings and analytics help continuously improve risk models**

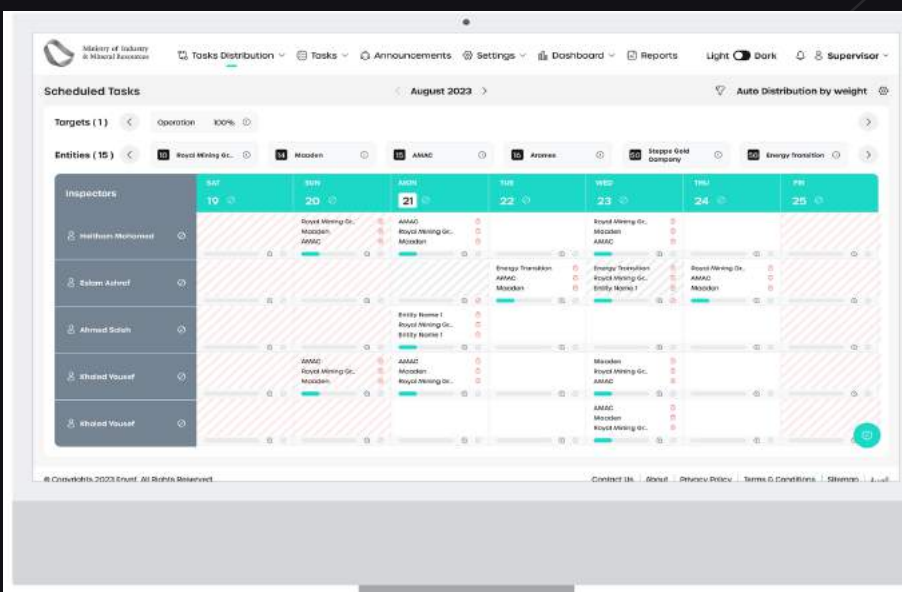

Testimonial

MINISTRY OF INDUSTRY & MINERAL RESOURCES

The ministry is experiencing a significant transformation towards paperless inspection, field scanning and violations detection.

By implementing our integrated field management solution, paperwork and administrative tasks are now completed quickly and efficiently. In addition, on-field agents wouldn't need to fill out paperwork orders, but instead they can utilize our mobile field service app to input all their information, including any work order data, and inspection checklists, all from one device.

ZAKAT, TAX, AND CUSTOMS AUTHORITY

Through our collaboration with domain experts, we have delivered an integrated technological solution for ZATCA. This solution empowers decision-makers to assign teams, closely monitor performance, and conveniently access well-organized inspection results, all at their fingertips. Thanks to the operational room furnished by Enspct, they can now identify and respond to violations more effectively.
