ABOUT US

We are Proteon Software. Our mission is to create world class membership portals for non-profits, associations, and other federated organizations. We all admire the glamorous work of charities, non profits and their donors, but to do this work they need business-class tools and processes that enable them to get things done. We believe that people have all the knowledge they need to create the solution perfect for them, and they need only be provided the tools and the processes necessary to make them a reality. Our vision is a world where non-profits aren't held up by dated tools or old membership management methods. We envision a world where technology is seamless, and gets out of people's way and allows them to pursue their work on their terms.

Michael Holstein
Founder & CEO

23+ year expert veteran of IT and project management. Founded Proteon Software to provide websites for autism charities, to help his two autistic sons and other people with autism heal. During the rare times he's not working, he can be found in Columbus, Ohio spending time with his family.

in

Shannon Gulanen
Chief Operating Officer

Shannon has been an account manager with Proteon for the last three years. When she's not taking client calls at all hours of the day, she can be found in Columbus cheering her twin children on in basketball and football.

in

Arbind Bhagat
Chief Engineer

Arbind Bhagat is the chief engineer, the core of all our tech solutions. He is also highly involved in the open-source software community. He is a great team leader and he manages the tech team so well. He has worked at Proteon for seven years, and been in IT for the last 12.

in

Lenny Burkett
Designer

Lenny is a designer with a variety of experience. After graduating with a degree in graphic design, Lenny began working on everything he could; from illustration and animation to branding and web design. He is a designer that is constantly learning.

Dipendra Bhagat
Content Manager

Dipendra builds and migrates websites for the Proteon team. He's been at Proteon for seven years, and in the IT industry for 16.

Manny Larcher
Marketing Director

Manny has had the opportunity to work with brands and mentors to hone and develop skills in brand management & growth, sponsorship consulting, retail development, strategic planning, account management and brand activation. Manny enjoys helping others find purpose in their work.

Dark Rhino Security Acquires Proteon Software

PRESS RELEASE **UPDATED: AUG 15, 2019**

COLUMBUS, Ohio, August 15, 2019 (NewsWire.com) - Dark Rhino Security Inc., cybersecurity consulting firm has acquired Proteon Software, an open source-based high-security web and mobile development company, as of July 19, 2019. Proteon software serves the majority of the PMI chapters around the globe with its technology and services.

"The goal of this acquisition is to create a stronger company with the best parts of Dark Rhino Security and the proven parts of Proteon Software to provide a level of expertise and competence that is not normally seen in the cybersecurity area," said Kevin Casey, the CEO of Dark Rhino Security.

This decision was based off five key factors: to increase overall local and global market share, overcome entry barriers in critical markets and have additional resources in Europe, decrease time to market, add to existing and develop new capabilities with a diversified global team.
