## CO COPADO

Copado Compliance Hub

Compliance. Simplified.

Automatically detect compliance violations every time you make a Salesforce release

Compliance takes many forms. Some are mandated compliance regulations like HIPAA or GDPR while others may be internal company standards like password policies. With Copado Compliance Hub, you can easily create compliance rules without any coding and schedule automatic compliance checks to enforce compliance with every Salesforce release.

No Coding Required

Use a preconfigured rule or easily configure new compliance rules with no coding. Rules can be reused across all your Salesforce orgs.
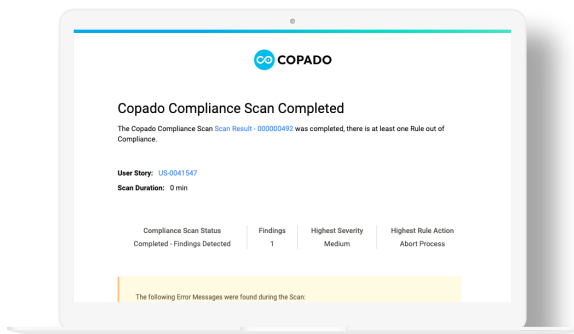

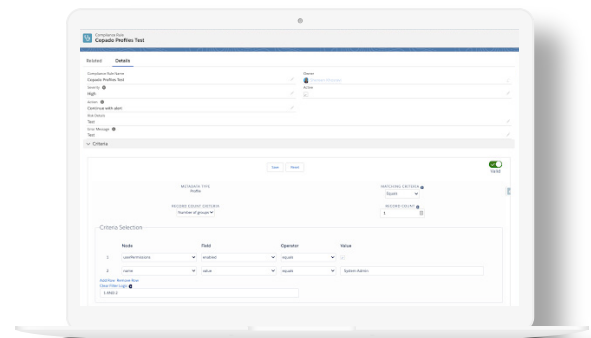

Automate Compliance Checks

Schedule compliance scans as part of your CI/CD DevOps process to proactively identify compliance violations before each committed change. Receive detailed email alerts for quick action.

Compliance Health Dashboard

Check your Salesforce compliance health at any time. Run reports for audits, track compliance violations and proactively mitigate risk.
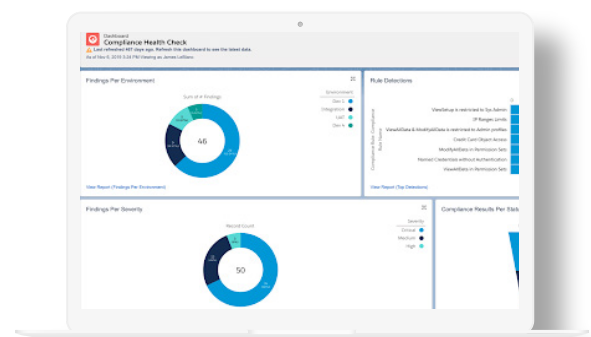

Copado Compliance Hub allows you to integrate compliance into your DevOps lifecycle so you can proactively manage compliance risks with simplicity.

By year-end 2022, 60% of organizations...will have integrated compliance as code...improving their lead time by at least 20%.
