

# Healthcare + the DevOps Revolution

Winds of change continue to buffet the healthcare space – from on-demand virtual visits to contact-free prescription deliveries. Telehealth appointments have increased 38x since the pre-COVID-19 baseline, while more than half of Americans own at least one medical wearable. Today’s healthcare consumers have high digital expectations and a flood of apps and technologies to choose from.

## Challenge: Driving Maximum ROI from the Cloud

Across the health and life sciences landscape (payers, providers, pharmaceutical companies and medical device manufacturers), innovations in direct-to-consumer and direct-to-doctor experiences are driving seamless omni-channel experiences.

From panoramic patient views to electronic medical records to evolving HIPAA rules, healthcare firms must find a way to accelerate software development without ramping up compliance or cybersecurity risks.

## Solution: The #1 DevOps + Testing Solution for the Cloud

Across the globe, healthcare companies leverage Copado to unleash Continuous Integration and Continuous Delivery (CI/CD) and Robotic Testing across Salesforce, SAP and multi-cloud environments. Our platform is fully compliant with ISO, HIPAA and GDPR – helping you stay in line with shifting local and national healthcare regulations.

# Copado Features

## Governance + Compliance

Release approvals, audit trail, quality gates and real-time monitoring derisk cloud environments and make governance a breeze.

## Security + Visibility

Version control, merge conflict resolution and metadata backups provide end-to-end pipeline traceability and make it easy to roll back changes.

## AI-Powered Speed + Quality

Robotic software testing catches bugs early, eliminates QA bottlenecks and proactively optimizes code quality.

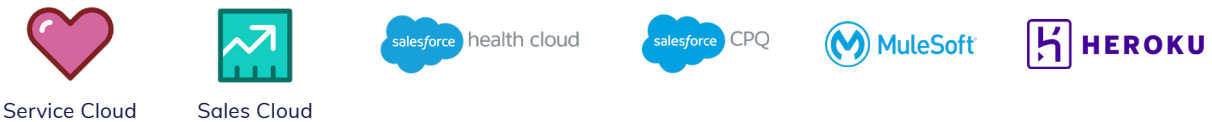

## Faster Time to Market

Copado's platform is proven to reduce cycle times and help development teams unlock continuous integration and delivery.

## User-Friendly for Pro-Code Developers + No-Code Admins

Cloud-native UI enables your team to work directly within Salesforce and SaaS platforms – accelerating adoption and clearing the way for collaboration.

## Multi-Cloud Integrations

## Results: 95% Faster Deployments + 307% ROI

Our next-generation DevOps and Robotic Testing platform is designed to drive digital transformation and end-to-end ROI for healthcare payers and providers, pharma firms and medical device manufacturers.

**20x** FASTER SOFTWARE DEPLOYMENTS

**90%** REDUCTION IN MEAN TIME TO RECOVER

**78%** FEWER PRODUCTION FAILURES

**\$6M** IN BUSINESS BENEFITS PER COMPANY
