

Manufacturing + the DevOps Revolution

The Fourth Industrial Revolution continues to drive digital transformation and supply chain automation across the manufacturing industry. The advent of COVID-19 has forced the industry to ramp up its innovation – with 67% of manufacturers accelerating their digital projects as a result of the pandemic. The “Click today, deliver tomorrow” culture of online shopping compels manufacturers to react to evolving customer needs in real-time across durable goods, industrial manufacturing and heavy machinery.

Challenge: Unleashing Unmatched ROI from the Cloud

To thrive in today's manufacturing marketplace, enterprises must deliver seamless, omni-channel customer journeys. But traditional manufacturers are often hampered by legacy infrastructures, siloed teams and disconnected data. The best way to keep your business agile and deliver customer-centric experiences is through a multi-cloud platform that powers the entire end-to-end buyer journey: marketing, quote, order, delivery, billing and post-sales service.

Solution: The #1 DevOps + Testing Solution for the Cloud

Across the globe, manufacturers leverage Copado to unleash Continuous Integration and Continuous Delivery (CI/CD) and Robotic Testing across Salesforce, SAP and multi-cloud environments. Copado is the only vendor on the market with a specialized DevOps compliance solution embedded within its platform – helping you stay in line with ISO, GDPR, CCPA and more.

Copado Manufacturing Customers

Copado Features

Faster Time to Deployment

Copado's platform is proven to reduce cycle times and help development teams unlock continuous integration and delivery.

AI-Powered Speed + Quality

Robotic software testing catches bugs early, eliminates QA bottlenecks and proactively optimizes code quality.

Security + Visibility

Version control, merge conflict resolution and metadata backups provide end-to-end pipeline traceability and make it easy to roll back changes.

Governance + Compliance

Release approvals, audit trail, quality gates and real-time monitoring derisk cloud environments and make governance a breeze.

User-Friendly for Pro-Code Developers + No-Code Admins

Cloud-native UI enables your team to work directly within Salesforce and SaaS platforms – accelerating adoption and clearing the way for collaboration.
