

Realize Immediate Value

UNPRECEDENTED PRODUCTION & CAPACITY PLANNING

Decision-Grade Analytics at your Fingerprints

ketteQ's Production and Capacity Planning solution maximizes manufacturing efficiency and productivity with real-time company-wide visibility of inventory, production capacity, and raw material constraints with material requirements planning (MRP) functionality. Available and Capable-To-Promise (ATP/CTP) logic anticipates and manages order delivery commitments.

Built on Salesforce and AWS clouds, ketteQ is the only comprehensive planning solution that seamlessly synchronizes sales forecasts and orders with available inventory and capacity for the most accurate plan to improve sales revenues, reduced obsolescence, and increased planner productivity and manufacturing efficiency.

Increased Sales Revenue

Reduced Obsolescence

Increased Planner Productivity

Increased Manufacturing Efficiency

Unmatched Manufacturing Production & Capacity Planning Automation

Built on an architecture that leverages Salesforce and AWS clouds, ketteQ is not only secure and scalable but easily integrates with an organization's existing ERP, CRM, TMS, and legacy systems to deliver connected intelligence across regions, departments, and even external stakeholders.

By utilizing always-on AI / ML analytics, ketteQ set inventory plans for every product, across the network, that optimized the product mix and echelon relationships. The advanced analytics then carries into the replenishment plan that considers the timing and mixes needed to best accommodate supply capacity constraints and lead times. The result is a plan that coordinates all stakeholders across the network to deliver the best results for sales and finance.

ketteQ's workflow and dashboard features remove supply chain capacity blind spots, reducing time and errors with automated and streamlined processes for sales and operations and integrated business planning decisions, notification, and approval systems.

- ✓ **Manufacturing Capacity Planning (MRP)**
- ✓ **Available and Capable To Promise (ATP/CTP) Logic**
- ✓ **Multi-level Bill Of Material (BOM) Supported**
- ✓ **Identified Process Bottlenecks**
- ✓ **Weekly Planning Buckets and Production Plan Dashboards**
- ✓ **Support of Multiple Units of Measurement**
- ✓ **Scenario Management**

ketteQ has done all the groundwork for you so that you can reap the benefits. Let us show you how you can elevate your existing Supply Chain planning & execution. To learn more about our products and services, visit us at ketteq.com/contact.
