

PRODUCE BAGS & SLEEVES

Why bags or sleeves over tray wrapping or clam shell packaging?

Your produce looks better, fresher and more natural in a crisp clear bag or sleeve. It is more economical than other forms of packaging and provides a re-usable container for the consumer. It also causes less stress on the environment – bags and sleeves have less impact (weight) per item than other forms of packaging and all are recyclable.

Special features for bags and sleeves can be implemented upon request, such as: ventilation, anti-fog, re-closable tape, headers and special shaped seals. For more information, contact an A-ROO Company Sales Representative.
