COMPANY

A·ROO

Green Thumbs are a rare commodity this day and age. When you mention plants most people say, "If I could only keep mine alive".

Now, with the MINI GREENHOUSE, they can.

Ship and display three mini pots, in this sturdy Mini Greenhouse. Not only is the container protective and functional, it's also attractive.

Some benefits of the Mini Greenhouse :

- *Maximized plant protection*
- *Ensured delivery of quality product*
- *Light and Sturdy*
- *Cost Conscious*
- *Flexible and Fast*
- *Durable Self Locking Package*
- *Excellent Display of Product*
- *Available in multiple shapes and sizes*

But wait there's more.

Inspire confidence in the end consumer. Life is hard enough, without worrying about crushing Grandma's mini plants .

The Mini Greenhouse includes a watering tray, that is sure to make Grandma happy.

The Watering tray provides a firm foundation for the pots, and it makes watering a snap.

Once Grandma has the plants at home she can place them, watering tray and all, wherever she wants.

Instead of watering each plant separately, all she needs to do is pour a little water into the tray and the plants absorb it from the roots up.

If desired the plants can be removed from the watering tray, for display, and then occasionally returned for easy watering.

A-ROO's full service design department can provide you with personalized Labels to fully brand your Mini Greenhouse. 🦘
