

*The Completely Indispensable*

# DISPOSABLE PASTRY BAGS

A-ROO Company has been an Innovator for almost fifty-years providing unique contoured and conical shaped plastic film packaging for highly perishable floral and produce items, as well as packaging for Supermarket Bakery Departments and Independent Bakeries. We have over twenty-years of manufacturing experience making the very best disposable decorating pastry and piping bags available anywhere – right here in the USA in our AIB rated food contact packaging facilities.

# An Inside look at Quality

When we say our Disposable Pastry Bag is “Completely Indispensable” it is a reference to the extreme quality standard that has been honed after over two decades of experience in making them and over one billion being made. Our Quality Assurance steps allow you to have the ultimate confidence that your use and experience while decorating using our Pastry Bags will be unparalleled and trouble-free every single time. All steps are performed by our experienced Operators and Supervisors. Additionally, all steps and related Quality Control documentation must withstand regular audits by our Quality Assurance Personnel.

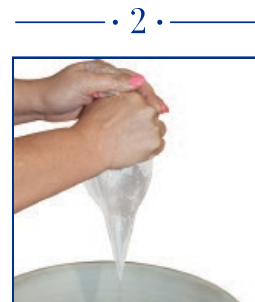

## STEP 1 : *Mechanical Air Pressure Testing of the Film Substrate*

We test at frequent and regular intervals throughout production to ensure that the film and seals meet our high standard. This step is very specific and has set burst values that must be maintained, ensuring maximum performance with every single decorating operation performed. Our Disposable Pastry Bags are the strongest in the industry – we know, we have tested them all.

## STEP 2 : *Water Testing of the Seals*

As shown to the right, we water test at frequent and regular intervals throughout production to detect any potential small “pin holes” in the seals. We have very specialized converting equipment and our sealing apparatus is also quite unique and special. As an extra quality assurance step we always want to be certain that our seals are maintaining a high standard of uniformity and function. Our film is strong - our seals are even stronger.

## STEP 3 : *Hand Tension / User Simulation Testing*

With the same frequency and diligence as steps one and two a regular examination and simulated use is performed on the production line by pulling down the top of the pastry bag with hand tension in a cuffing type method as many users would do keeping frosting free from the outside portion of the bag while filling. This step gives us the opportunity to examine the overall function of the bag and the seals in a similar manner to how our professional users ultimately experience and use the bag.

Each Inner Dispenser Box comes individually shrink wrapped to further ensure you that your A-Roo Disposable Pastry Bags have arrived to you in perfect, unadulterated and contaminate free condition.

Our most popular standard fully recyclable proprietary A-Roo Disposable Pastry Bags are available in three sizes, each coming in a very easy-to-use, space friendly dispenser box. Today's demands on the professional pastry decorator in a commercial environment call for a product that meets and exceeds those demands on all levels.

Our Disposable Pastry Bags meet these demands and are a product of proven reliability with over one billion produced over the last two decades. Our easy-to-use bags are made to consistently meet the high quality standards that professional decorators require while still maintaining their superior dispensing ability.

A-Roo Disposable Pastry Bags are very cost effective as they are made on state-of-the art manufacturing equipment in a very high efficiency production environment. One hundred percent of all the components used in these bags are made in the USA and are fully recyclable. Our Disposable Pastry Bags satisfy potential FSMA requirements as they are manufactured in an AIB rated facility.

Our unique dispenser box contains 100 bags that easily dispense just one bag at a time; but not more than one at a time. The inner dispenser boxes are all packed six per Master Case. There are three standard sizes to choose from : 12 inch (30.4 cm), 18 inch (45.7 cm) and 21 inch (53.3 cm). Other sizes and materials are available on a custom basis. Our entire program has good ergonomics in mind. Our largest Master Case that includes six inner dispenser boxes with product weighs less than sixteen pounds.

Our minimum order is One Master Case but all orders are subject to other minimum order and credit requirements. Please consult an A-Roo Sales Professional for information and specifications on :

- Pallet Pack Out and Configuration
- Master Case Pack Out and DIMS (SKU)
- Inner Dispenser DIMS

## Close-Up on Other Packaging for Bakery

We have been in the flexible packaging business for almost fifty-years and for the last thirty-five years we have specialized and focused much of our energy on innovative packaging for the produce and floral industry. Before and during that time we have been a skilled provider of packaging to fresh produce, fruit and vegetable growers, processors and retailers.

In addition to our “indispensable”, disposable pastry piping and decorating cone bags we also either make or distribute these other equally fine and unique products. Please inquire with an A-ROO Sales Professional for further details on any of them.

A-ROO Company also works with specific Vender Partners on some of the other listed packaging products. These Vender Partners have been developed and selected because of their commitment to quality manufacturing and process standards and business principles.
