Station 6 founder and CEO Tony Tackaberry, Glass Entertainment CEO and exec producer Nancy Glass and **Anchor** Entertainment founder and CEO Ethan Goldman were among those at the RealScreen Summit in Austin, Texas last week, where consolidation, budget cuts and an increasing need for shows to meet the requirements of algorithms were among the topics of conversation.

The trio of execs spoke to Clive Whittingham there about these trends and others shaping the factual space, how they as producers are navigating them and how they see the next 12 months playing out.

C21FM is live 24/7, with a block of interviews starting at 10am BST every day [HERE](#).
