

Are you protecting your hybrid environment from ransomware and data loss?

Extend Okta's industry-leading identity and access management to the immutable, ransomware-proof backups managed by HYCU Protégé data protection platform.

The power of HYCU + Okta

The statistics are sobering. A ransomware attack occurs every 11 seconds with more than 36M attacks in just the first half of 2022 alone.

While a recent ransomware survey¹ finds that 63% of enterprise organizations are increasing spending on detection, prevention, and recovery, and that organizations are beginning to understand the importance of having air-gapped or immutable backups in the event of an attack or breach, data protection workloads remain at risk across many organizations.

When you combine the power of Okta's Identity Management Platform with HYCU's visionary multi-cloud data protection platform,² organizations can be confident that 1) data protection workloads are protected against ransomware events and 2) only those who are authorized to manage air-gapped and immutable backups have access to data protection workloads and can set backup and recovery policies.

Integration benefits

Minimize the impact of data loss

Protect the backups of your mission-critical data from accidental deletion and malicious deletion/corruption/encryption by leveraging HYCU's immutable, ransomware-proof backup and recovery capabilities. And by using Okta to manage access, protect unauthorized users from accessing HYCU. (You can find detailed information about HYCU Protégé [here](https://www.hycu.com/download/state-of-ransomware-preparedness).)

Prevent unauthorized users from accessing HYCU to delete, remove, or modify HYCU backup and restore policies to ensure backups and restorations are readily available in the event of an attack or breach.

Centralize and streamline user access and management

Add and remove HYCU users easily with single sign-on capabilities and create granular permissions for backup and restore based on policies.

THE INTEGRATION ALLOWS ORGANIZATIONS TO:

Recover backup data from ransomware attacks via HYCU's air-gapped and immutable backups.

Protect backup data by limiting its access to users via Okta's centralized authentication and HYCU's multitenancy with RBAC.

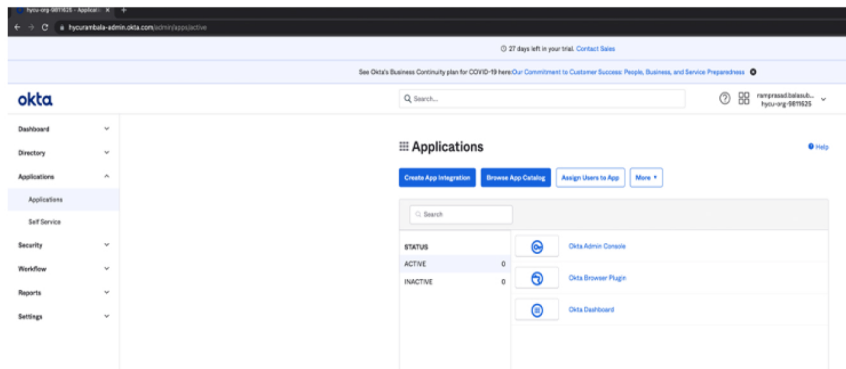

Ensure backup data's recoverability via HYCU's change-rate monitoring and sophisticated backup validation.

Okta is the leading independent identity provider. The Okta Identity Cloud enables organizations to securely connect the right people to the right technologies at the right time. With more than 7,000 pre-built integrations to applications and infrastructure providers, Okta provides simple and secure access to people and organizations everywhere, giving them the confidence to reach their full potential. More than 16,000 organizations, including JetBlue, Nordstrom, Siemens, Slack, Takeda, Teach for America, and Twilio, trust Okta to help protect the identities of their workforces and customers.

HYCU is the fastest-growing leader in the multi-cloud data protection as a service industry. By bringing true SaaS-based data backup and recovery to both on-premises and cloud-native environments, the company provides unparalleled data protection, migration, disaster recovery, and ransomware protection to thousands of companies worldwide. As an award-winning and recognized visionary in the industry, HYCU solutions eliminate complexity, risk, and the high cost of legacy-based solutions, providing data protection simplicity to make the world safer. With an industry-leading NPS score of 91, customers experience frictionless, cost-effective data protection, anywhere, everywhere. HYCU has raised \$140M in VC funding to date and is based in Boston, Mass.
