

CRANE AWARENESS TRAINING FOR INDUSTRY

Program Overview:

This training will provide participants with the knowledge and needed to operate an overhead crane safely and efficiently as a competent person. The course covers a variety of industrial type cranes including bridge, jib, gantry cranes, and monorails. This program teaches in-class theory with the option of a practical evaluation of the trainee's current crane operation capabilities. Training is based on the OHSA, Regulation 851 and CSA Z 167-16. The course is intended for Industrial Operators in the workplace

Training Content:

- Regulations, the OHSA and Standards
- Types of Cranes
- Cranes vs Hoists
- Equipment and Design
- Inspections – Daily, Monthly, Yearly
- Safe Practices
- Hand Signals
- Practical Assessment

Course Duration: Four (4) to Eight (8) Hours dependent upon number of participants and if a practical valuation is requested.
