HYUNDAI WIA 5-Axis Vertical Machining Center

THE WORLD BEST

When it comes to 5-axis machine tool technology, people tend to consider a product made in Japan, Germany and Switzerland to be the best.

In the past this may have been true, that is up until now.

Introducing the XF series. The Best 5-axis Vertical Machining Center in the World.

TECH CUBE, HYUNDAI WIA Europe Technical Center

In our determination to develop machine tools that deliver unrivalled satisfaction to our customers, and our unwavering commitment to grow into the world's best machine tool company, HYUNDAI WIA have established a technical support center in Germany.

Through its new European Technical Center, HYUNDAI WIA will not only enhance technical support for its European clients but also run a variety of marketing campaigns on the continent with the aim of growing into the leading machine tool brand in the entire European market.

Notably, the company will staff the R&D Center with world-class researchers who will take the lead in promoting the technological enhancement by developing new machine tools that far surpass the performance of existing machine tools in Europe.

HYUNDAI WIA is now set to become a global player.

Cutting Edge Technology

The XF series 5-axis vertical machining center in the world-best level, developed by HYUNDAI WIA Europe R&D Center. **XF series** are a perfect blend of machine and technology to realize the ultimate performance in composite machining and mold machining with the highest quality possible resultant of its cutting-edge design features such as the monoblock type bed structure, X/Z axis box-in-box structure, etc.

XF SERIES

XF6300

XF8500

THE INNOVATION

People ask: "How could machine tool be so innovative?"

The appearance of HYUNDAI WIA's XF series may look like an ordinary machine tool. However, XF series are designed with a high-tech monoblock type bed structure, box-in-box type structure and other advanced features to differentiate it from standard machine tools.

High accuracy and productivity are achieved through its innovative structure.

Basic Features

01

Column/Bed All-in-One Structure

XF series are designed with an integrated one piece column-bed structure provides superior stability when compared with separate structures.

The All-in-One structure delivers high rigidity and excellent vibration absorption providing exceptional performance and superior surface finishes.

<Monoblock Structure>

02

Box-in-Box Structure (X/Z Axis)

The pusher(head body) in the saddle of X-axis, which surrounds the spindle cartridge, is designed with box-in-box type. This thermal equilibrium structure helps minimize thermal deformation.

Built-In Spindle

03

The built-in spindle minimizes spindle vibration, enabling outstanding performance in a high-precision cutting environment such as mold products.

DDM Tilting Rotary Table

04

The DDM rotary table is designed to embody highly accurate high speed simultaneous 5-axis motion which allows for the machining of complex prismatic parts with superior accuracy and surface finishes.

Rack Type Magazine

05

A single step Rack type magazine of 34 tools is provided as a standard. 2 step 68 tools and 3 step 102 tools featured as an option.

XF630 :
Rack Type ATC

XF8500 :
Pickup Type ATC [Twin Arm]

01
XF Series

Body Structure

High-Precision & Speed 5-Axis Vertical Machining Center

The strength and rigidity of the base body structure is a direct link to the precision of a machine tool.

HYUNDAI WIA's advanced body design coupled with an integrated bed/column structure is the foundation of machining perfection.

The advantages of HYUNDAI WIA's body design is not limited only to extreme cutting speeds.

The integrated body remarkably reduces the minute vibration during machining ensuring high precision and superior surface finishes. The HYUNDAI WIA XF series will exceed all of your expectations.

Body Structure

Optimal Structural Analysis (FEM)

The XF series are designed to be the optimum structure through HYUNDAI WIA's exclusive structural analysis.

Column / Bed All-in-One Structure (Rigidity has improved by 130%)

The XF series are designed with an integrated one piece column-bed structure providing superior stability when compared with separate structures. The All-in-One structure delivers high rigidity and excellent vibration absorption providing exceptional performance and superior surface finishes.

- > The monoblock design and integrated bed/column structure provides high rigidity ensuring outstanding dynamic characteristics
- > Highly rigid structure without holes on the side wall and a minimal number holes are required on the top and bottom top area
- > Casting rib structure optimized for high rigidity
- > The integrated rotary table A-axis/column structure ensures high rigidity and superior precision
- > The bed structure's agronomical design allows for easy access to the work area

02

XF Series

Slideway Features

High-Precision & Speed 5-Axis Vertical Machining Center

Symmetric Structure of Z-axis

Vibration and thermal displacement during travel can be minimized by symmetric structure of Z-axis where travel axis is aligned with the weight center of spindle.

Y-axis Double Ballscrew Structure

The Y-axis is driven by two ball screws and feed motors to provide unprecedented speed, accuracy, stability, and acceleration than general purpose machines.

XF6300

650/600/500 mm (25.6"/23.6"/19.7")
Travel (X/Y/Z)

XF8500

850/920/600 mm (33.4"/36.2"/23.6")
Travel (X/Y/Z)

4-Way Structure on X Axis (X-Carriage System)

X-axis of XF6300 has box-type saddle design with 4-way structure in a cross beam to realize improved strength and minimal thermal displacement.

- Two damping bars for the X and Z axis slide providing rigid and stable support of the ram

- | | |
|---------------------|-------------------------------|
| ① X-carrier | ④ Spindle |
| ② X-carriage-system | ⑤ Drive for Y-carriage-system |
| ③ Z-ram | |

High-Speed Roller LM Guideway

The XF series features roller type LM guideway to reduce non-cut time with faster acceleration while providing high rigidity.

⦿ Feed Axis Acceleration/Deceleration (X/Y/Z axis)

XF6300 - 1.0G/0.8G/1.0G XF8500 - 0.6G/0.6G/0.8G

❖ Acceleration/deceleration is slightly different when you choose HEIDENHAIN PLC.

High-Precision Linear Scale (Standard)

The XF series are equipped with linear scales on all axes providing high precision positioning accuracy and compensates for ball screw thermal displacement ensuring extremely precise machining.

In addition, the absolute type linear scale is installed in close proximity to the ball screw of each axis. During operation an added benefit is not being require to home the machine.

03
XF Series

Built-in Spindle

Long Lasting High Accuracy & Excellent Performance
5-Axis Vertical Machining Center

Built-in Spindle

Built-in Spindle

The built-in spindle minimizes spindle vibration, enabling outstanding performance in a high-precision cutting environment such as mold products.

Spindle Cooling

Spindle temperature is controlled by the use of a spindle oil chiller. This ensures consistent spindle temperature which minimizes thermal displacement.

HSK Tool Holder

HSK tool holder is utilized for precise positioning with less expansion in the spindle taper during high speed rotation. This ensures an excellent level of precision for die mold machining.

Through Spindle Coolant {20/30/70 bar (290/435/1,015 psi)} **OPTION**

Spindle Heat Displacement Sensor

By attaching a hardware heat displacement sensor to the spindle cartridge, the amount of thermal displacement generated during machining is directly recognized and corrected by the displacement amount.

Heat Displacement Sensor Calibration + Displacement Sensor Calibration

Spindle

04

XF Series

Tilting Rotary Table

Super Quality & Productivity
5 Axis Vertical Machining Center

Column-Integrated Table

The A-axis table is designed to be integral to the column. To do so the table is secured using HYUNDAI WIA's proprietary method of injecting a specially formulated epoxy resin into a gap between column and table.

This assembly technic delivers excellent clamping force and shock absorption are provided from the column.

XF6300

Max. load capacity

Tilting Rotary Table

DDM Tilting Rotary Table

The XF series has a **tilting rotary table** is designed to embody highly accurate high speed simultaneous 5-axis motion which allows for the machining of complex prismatic parts with superior accuracy and surface finishes.

The direct drive system utilizes **direct drive motor (DDM)** delivering high precision and high speed for improved productivity. The integrated A-axis housing/column design ensures high rigidity.

❖ The XF series may cause some interference in the machining area.
Please check the interference area chart on page 36 of the catalog.

DDM TABLE (Simultaneous 5-Axis)

- ① A-axis built-in motor (tandem type)
- ② C-axis built-in motor

- ⊙ A/C indexing angle : **+30°~-120°/360°**
- ⊙ XF6300 A/C indexing speed : **70/110 rpm**
- ⊙ XF8500 A/C indexing speed : **50/100 rpm**

A/C-Axis Rotary Scales Standard

Scale integrated YRTM bearing is assembled directly to the C-axis rotary table providing high precision positioning accuracy and repeatability

- ⊙ **A-axis : Rotary Scales** (5 sec. precision)
- ⊙ **C-axis : YRTM Bearing** (Scale embedded bearing)

ATC & Magazine

High-Precision & Speed 5-Axis Vertical Machining Center

ATC & Tool Magazine

Tool change time (chip-to-chip) of 4.5 seconds is the best in its class. The rack type tool change mechanism was developed to add unprecedented extra-large capacity tool for vastly complex 5 axis machining applications.

A single step rack magazine of 34 tools is provided standard. 68 and 102 tool capacity are optional.

<XF8500 : Multi Step Rack Type Magazine & TWIN ARM ATC - Option>

Rack Type Magazine

34 [68, 102] ea
No. of tools

4.5 sec
Tool change time (C-C)

❖ C-C : XF6300 - 3kg (6.6lb) tool base

Tool Handling System (2-Axis Loading)

The modular tool magazine of XF6300 is designed as a 2-axis controlled tool loading system for quick tool change.

<XF8500 : Option>

- ① Rack Type Tool Magazine
- ② Tool Handling System
- ③ ATC (Twin Arm)

Magazine

The tool magazine and machining area are completely separated by a shutter door to prevent coolant and chip contamination out of the tool storage area maintaining high precision and cleanliness. Minimal tool change distance between the tool changer and work area permits for a rapid tool change.

In addition, collision is avoided regardless of A-axis position eliminating the need for homing of A-axis.

- ⊙ Max. Tool Dia. (W/T Adjacent Tool) : $\text{Ø}90/\text{Ø}125$ ($\text{Ø}3.5"/\text{Ø}4.9"$)
- ⊙ Max. Tool Length : 300 mm (11.8")
- ⊙ Max. Tool Weight : 8 kg (17.6 lb) [40K : 1.5 kg (3.3 lb)]

FAST & DYNAMICS & CONVENIENCE

- Highest level of acceleration and deceleration (FAST): Acc./Dec. time-1G
- High performance built-in 15,000 rpm spindle (DYNAMIC) supplying 153 N·m (113 lbf·ft) of torque : Breaking the mold regarding high speed spindle and high torque
- The 19" monitor allows for easy viewing and accessibility through its ergonomic design (CONVENIENCE)

Those are just some of the values that the XF series pursues.

06

XF Series

SIEMENS Controller

The Powerful CNC Platform for Machine Tools

SIEMENS

DIFFERENTIATED CAPABILITIES, INTEGRATED ENGINEERING SEAMLESSLY INTERLINKED

SIEMENS 840D sl is the latest generation CNC controller with the capability of running up to 20 axes on a single machine.

The powerful 80-bit controller reduces processing time and increases productivity. It supports the preparation of a variety of programs and setup functions for ease of operation.

SIEMENS Controller

SIEMENS Technology

Shop Mill

- Dialogue-type programming, simple and convenient
- Effective specifications for small quantity batch production
- Step-by-step operation possible without knowledge of the DIN/ISO code

Real Time 3D Simulation

- Real time 3D simulation is possible
- 2D simulation offered standard
- Possible to confirm NC program thru simulation

Easy Screen

- Create an easy screen
- Insert text and pictures
- Max. 5-screen configuration
- PLC variables and PLC interface with read/write support

SIEMENS MDynamics

SIEMENS MDynamics is required for a variety of CNC mold processing software solutions which is combined into one package achieving the highest processing rates

ISO Code Programming

If the ISO Dialect (G291) is ordered, JIS-based G-code programs can be used. (Standard)

07

HYUNDAI-iTROL⁺

The Powerful CNC platform for Machine Tools

HYUNDAI - iTROL⁺

HYUNDAI Intelligent Control

- 01 19 inch Multi-touch Monitor
- 02 Convenience enhanced White Grip
- 03 Quick Function Bar
- 04 Keyboard/MCP Integrated Panel that enables 30° folding (Keypad LED Lighting)

Tilting Angle

30°

HYUNDAI-iTROL+ Native Smart Software

Standard Specification

Home screen	A launcher function similar to the smart device's home screen
Remote viewer	Remote access to other devices, office PCs, etc., and management of access lists
Manual viewer	PDF manuals for machines, PC, and iTROL+
Calculator	2-points or 3-points center calculation, machining condition calculation
Machine monitoring	Visualized machining status
Job document viewer	Viewer function designed to check work documents such as work instruction and work schedule
Factory monitoring	Real-time monitoring of the machining status of other in-factory machines connected via OPC-UA
Regular check	Inspection list by period, and informs about impending inspections
Energy saving	Energy saving functions (such as Machine Ready power save and work light automatic off), and graphic expression of energy consumption
Machining history	Real-time storage of important machine information (spindle load, tool number, etc.)
Touch MCP	Physical MCP implemented in HMI to resolve the physical limitations
Side screen	All-time display of the frequently used coordinate system, frequently-used expressions, etc. on the left to improve work convenience
ATC recovery	Help screen designed to solve the tool change problems
Tool monitoring & AFC	Real-time monitoring of tool status, and control of machining speed adjustment according to load
Alarm Guidance	Provide corrective measure for the alarm with PLC I/O status and save 4-month history of the alarm

HYUNDAI-iTROL⁺ Smart Function

Smart Factory

You can improve work efficiency by checking the contents of the work order before machining, and effectively understand the information on current equipment operation by checking the current machining information, status, production information, etc.

- Provides access to work information in advance through the work document viewer
- Helps check the machining load, feed rate, and other equipment statuses during machining through the equipment monitoring app

Smart Programming

It can be used to analyze equipment abnormalities with the equipment state and processing state data collection function, and it can be used as a reference for operation of energy-saving equipment through energy consumption monitoring.

- Helps collect important equipment/machining status data through the machining history monitoring app
- Provides data on energy consumption and other statistics through the energy monitoring app

Smart Operation

Productivity can be improved with a separate calculator available, and the equipment status can be quickly restored to a normal state by using the information on measures to take for currently triggered alarm, I/O status, relevant parameters, etc.

- Helps calculate machining conditions and workpiece setup data using a machining calculator
- Minimizes the time-to-action with Alarm Guidance

Smart Machining

Convenience has been improved with tool monitoring (TM) and adaptive feed control (AFC).

- Tool monitoring (TM) and adaptive feed control (AFC)

Smart Diagnosis

By providing the electronic manual and regular equipment inspection function, measures can be taken immediately for equipment abnormalities, and optimal equipment status can be maintained through regular inspection of each element within the equipment.

- Convenient search and access with electronic manual
- Timely equipment status check available using the regular inspection app

Smart Network Service

Smart Network Services, that can monitor the operating status of machining tools in the factory, can perform documentations and CAC/CAM through remote access to user PC.

- Monitor the status of factory operation
- Remote access to other equipment and office PCs

08

XF Series

HEIDENHAIN

TNC Contouring Control with Drive System

HEIDENHAIN

The TNC 640 is compact and easy to read.

The TNC 640 is a versatile contouring control system that can control a 19-inch screen and up to 18 axes.

Its flexible workshop-friendly programming functions, Heidenhain interactive programming and offline programming, allow the user to create the optimal machining environment.

dynamic + **precision**

Portable Handwheel >>

Perfect 5-Axis Machining

- Powerful motion control shows its strength in 5-axis machining
- ADP (Advanced Dynamic Prediction) for high surface quality and contour accuracy
- Interpolation turning / hobbing of external gears

Detailed Simulation

- PDF files, drawings, etc. can be opened directly on the control
- high resolution, finely detailed 3D simulation function
- 0.5ms block processing time / 21G of storage
- Calculates the geometry ahead of time in order to adjust the feed rate (5,000 blocks).

HW-MCG (Machine Guidance)

PC S/W for various user conveniences such as machine control, maintenance, monitoring and etc.

HW-TDC

HYUNDAI WIA Thermal
Displacement Compensation

- Thermal displacement compensation designed to minimize machining deviations caused by changes in the external.
- Overcooling control when the main spindle stops.
- Direct compensation by the displacement sensor.
- Same HMI structure as FANUC/SIEMENS for operational convenience.

HW-WARMUP

HYUNDAI WIA
Tool Monitoring

- Main spindle stop time check → automatic setting of warm-up time.
- Interlock disables the machining cycle if warm-up is not performed.
- Customer machining program in the warm-up auto mode.
- Automatic warm-up logic when the cycle start begins.
- Same HMI structure as FANUC/SIEMENS for operational convenience.

09

XF Series

Mold Package

Powerful Mold Package, HYUNDAI-WIA Die Mold All in One

HYUNDAI-WIA Mold Package

The XF series are equipped with the HW mold package for efficient mold machining.

The die mold package includes MDynamics, the most advanced mold software prepared by SIEMENS. Spindle thermal displacement compensation, and automatic tool measuring system ensure high quality mold machining.

SIEMENS 840D sl

- 1 MDynamics
(High speed/High accuracy function)
- 2 Automatic Power Off Device
- 3 PCU50.5 (Hard Disk Included)

4 Main Spindle Cooling Device (8-channel)

Spindle temperature monitored with embedded thermal sensors

5 Cutting Air Blow

Mold machining without coolant

6 Auto Tool Measuring Device Renishaw (NC4)

BLUM (Laser Control Micro Compact)
Sets tool length and detects wear

SIEMENS MDynamics 5-Axis Package

- Shop mill
- Remaining material sensing
- Real-time 3D simulation
- Spline interpolation
- 5-axis processing package
- 3D tool radius compensation
- 1,000 block look ahead
- Advanced surface
- Transmitting and circumferential shift
- Measurement cycles
- Compact Flash Card ready
- Coordinate measurement system

Advanced Surface

- Advanced surface software for high speed, high accuracy mold processing
- 80-bit floating-point calculation accuracy is superior to nano-interpolation
- A brand new filter for speed and acceleration control - Minimizes errors generated from irregular CAM data
- Standard jerk-restriction function to ease deceleration impact - Minimized vibration and high-speed deceleration
- Standard feed-forward function for speed control - Improves contouring accuracy by correcting the following error before setting point output

10

XF Series

User Convenience

Various Devices for User Friendly

Large 19" Monitor

The XF series adopts a 19" monitor for improved visibility of SIEMENS's main NC functions including shop mill and 3D simulation.

19 inch Monitor size **120 deg** Indexing angle

1,450 mm (57") Height From the screen center

Ergonomic Operation Panel

The XF series are designed to be 1,450mm (57") high for ease of operation while setting up and running a workpiece.

In addition, the PC keyboard ensures user convenience.

120° (±60°)

1 Improved Accessibility to Table

The short distance (XF6300 : 685mm [27"], XF8500 : 676mm [26.6"]) between the front of bed and the center of table facilitates easy workpiece and fixture setup.

2 Convenient Tool Change

The magazine cabinet located at the rear of the machine simplifies tool change.

3 Separate Coolant Tank

A coolant tank holding up to 1,200 l [317 gal] (optimal capacity: 800 l [211 gal]) is provided.

The coolant tank is a separated from the heat source not allowing heat to be transferred to the machine, resulting in precision improvement.

4 Wedge Wire Chip Conveyor (Integrated **Scraper and Hinge Type**) **OPTION**

A combined structure of a scraper type chip conveyor and hinge type rail allows general chips and fine chips to be disposed of at all times.

5 Auto Pivot Compensation

It can be easily self-calibrate the A-axis and C-axis displacement due to processing conditions and surroundings are always able to maintain a high accuracy.

<Pivot Compensation software (HW-TPC) : Std. Probe & Datumball : Opt.>

THE PRECISION

How precise should an exceptional machine tool be?

The XF6300 is the best in the world. it's ultra-precision is also the best in the world. What's stopping you benefitting from ultra-precision machining using the HyunDai Wia XF6300?

CONTROLLER

HYUNDAI-iTROL⁺ | SIEMENS 840D sl

[] : Option ☆ Needed technical consultation

Controlled axis / Display / Accuracy Compensation	
Control axes	8 axes (X1, Y1, Z1, A1, C1, WR, WD, WL)
Simultaneously controlled axes	Max. 5 axes
Least setting Unit	X, Y, Z axes : 0.001 mm (0.0001 inch), B, C, A axes : 0.001 deg
Least input increment	X, Y, Z axes : 0.001 mm (0.0001 inch), B, C, A axes : 0.001 deg
Inch / Metric changeover	G70 (inch) / G71 (metric)
Interlock	All axes / Each axis
Machine lock	All axes
Backlash compensation	
Pitch error compensation	
Feedforward control (Torque control)	
LCD / MDI	19 inch color LCD (With Touch panel)
Keyboard	QWERTY full keyboard
Stored stroke check	Over travel
Operation	
Automatic operation (Memory)	
MDI operation	
Program restart	
Program check function	Dry run / Program check / Machine lock
Single block	
Block search	Block search
Reposition	
Working area limit	Working area limitations
Interpolation functions	
Positioning	G00
Linear interpolation	G01
Circular interpolation	Circular interpolation CW (G02) Circular interpolation CCW (G03)
Exact position stop	Single block exact stop (G09) Exact stop G60 (G601, G602, G603)
Dwell	Dwell (G04)
Reference position return	Return to reference point Return to 2nd reference point
Helical interpolation	
Spline interpolation	Non-uniform rational B splines
Compressor (Improving machining quality)	Compacd / Compcurv (Cycle 832)
Feed function / Acc. & Dec. control	
Manual feed	Rapid traverse Jog Manual handle Reference position return
Cutting Feed command	Direct input F code
Feedrate override	0 ~ 120% (☆ 0 ~ 200%)
Rapid traverse override	1%, 25%, 50%, 100%
Feed per minute	G94
Feed per revolution	G95
Look-ahead block	3,000 block (With Mdynamics)
Program input	
ISO correspondence	G291(ISO)/G290 (SIEMENS) (ISO G Code system-A)
Optional block skip	8 ea (0~7)
Absolute / Incremental program	G90 / G91
Program stop / end	M00, M01 / M02, M30
Maximum command unit	± 999,999,999 mm, ± 99,999,9999 inch
Plane selection	X-Y : G17, X-Z : G18, Y-Z : G19 G54 ~ G57, G505~G549
Workpiece coordinate system	G500 (Basic frame - setable zero offset) G53 (Work offset non modal) G153 (basic frame non modal)
Sub program call	16 folds nested
G code preventing buffering	STOPRE
Drilling/Milling cycle	with programing support
☆ Turning Cycle	with programing support
User cycle	

Auxiliary function / Spindle speed function	
Auxiliary function	M Code 4 digit
Spindle speed function	S Code 5 digit
Spindle override	0% ~ 120%
Spindle orientation	SPOS
Rigid tapping	
Automatic mode Interchange	Spindle / Axis mode
Constant surface speed control	G96, G97
Spindle speed limitation	LIMS
Tool function / Tool compensation	
Tool function	Tool number & Tool name
Tool life management	
Tools in tool list	1,500 ea
Cutting Edges in tool list	3,000 ea
Tool radius compensation	ISO (G40, G41, G42)
Geometry / Wear compensation	
Measurement of tool length	
Tool management function	
Editing function	
Part program storage size	10MB
External Storage devices	USB
Background editing	
Extended part program editing	Copy, move and change of NC program
Memory card program edit	
Data input / output & Interface	
I/O interface	USB memory interface Embedded Ethernet memory interface
Screenshot	
Built-in PC	Industrial PC (IPC427E)
Setting, display and diagnosis	
Self-diagnosis function	
History display & Operation	Alarm & Operator message & Operation
Run hour / Parts count display	
Regular maintenance screen	
Actual speed display	
Display of spindle speed / T code	
Graphic display	
Operating monitor screen	Spindle / Servo load etc.
Multi language display	Support 7 languages Chinese, English, French, German, Italian, Korean, Spanish
LCD Screen Saver	Screen saver & Motion sensing
Function	
ShopMill	Machining step programming for milling
3D simulation	
Real time simulation	
Option	
Multi language display	☆ 20 Support languages : Inquiry need

Figures in inch are converted from metric values.

The SIEMENS controller specifications are subject to change based on the policy of company CNC supplying.

SPECIFICATIONS

HEIDENHAIN TNC640 Standard

Axes	
Controlled axes	10 Axes (Max. 18 Axes)
Simultaneously controllable axes	5 Axes.
Rotary Controlled axes	3 Axes (Max. 3 Axes)
Least command increment	0.0001 mm / 0.0001 ° (Option : 0.00001 mm / 0.00001 °)]
Display unit	19-inch color TFT (Option : 15-inch color TFT)]
Program memory	21GB (SSDR solid state disk)
Block processing time	0.5 ms
Path interpolation time	3 ms
Fine interpolation time	0.2 ms
Position controller time	0.2 ms
Speed controller time	0.2 ms
Current controller time	100 us (5000 hz)
Encoder	Absolute EnDat 2.2
Commissioning and diagnostics	
Data interface	Ethernet 2x1000 BASE-T 4xUSB 3.0 RS-232-C (max. 115200 baud)
Machine Function	
Look ahead	5,000 Block
HSC filters	
Switching the traverse ranges	
User Function	
Program input	HEIDENHAIN conversational DIN/ISO
Position entry	Nominal position for lines and arcs in Cartesian / Polar coordinates Incremental / absolute dimensions Display / entry in mm or inch
Tool compensation	Tool radius in th working plane and tool length Radius-compensated contour for up o 99 blocks (M120) 3-dimensional tool-radius compensation for changing tool data without having to recalculate an existing program
Tool tables	Multiple tool tables with any number tools
Cutting data	Automatic calculation of spindle speed, cutting speed, feed per tooth / revolution
Constant contour speed	Relative to the path of the tool center Relative to the tool's cutting edge
Parallel operation	Creating program with graphical support while another program is being run Motion control with smoothed jerk
3D machining	3D tool compensation through surface normal vectors Tool Center Point Management (TCPM) Keeping the tool normal to the contour Tool radius compensation normal to the tool direction Manual traverse in the active tool-axis
Rotary table machining	Programming of cylindrical contours as if in two axes Feed rate in distance per minute
Contour elements	Straight line Chamfer Circular path Circle center Circle radius Tangentially connecting circular arc Corner rounding
FK free contour programming	in HEIDENHAIN conversational format with graphic support for workpiece drawings not dimensioned for NC
Program jumps	Subprograms Program section repeats Calling any program as a subprogram
Coordinate transformation	Datum shift, rotation, mirror image, scaling factor (axis-specific)
Q parameters programming with variables	Mathematical functions Logical operations Calculating with parentheses
Q parameters programming with variables	Absolute value of a number, constant n, negation, truncation of digits Functions for calculation of circles Functions for text processing

Figures in inch are converted from metric values.

The SIEMENS controller specifications are subject to change based on the policy of company CNC supplying.

SPECIFICATIONS

HEIDENHAIN TNC640 Standard

User Function	
Fixed cycle	Drilling, tapping, rigid tapping
	Peak drilling, reaming, boring, centering
	Milling internal and external threads
	Clearing level and oblique surfaces
	Multioperation machining of straight and circular slots
	Multioperation machining of rectangular and circular pockets
	Cartesian and polar point patterns
	Contour train, contour pocket
	Contour slot with trochoidal milling
	Engraving cycle
Programming aids	Calculator
	Complete list of all current error messages
	Context-sensitive help function for error
	TTCguide : The integrated help system
	Graphic support for programming cycles
CAD viewer	Display of CAD data formats on th TNC
Teach-In	Actual positions can be transferred directly into the NC program
Test graphics Display modes	Graphic simulation
	Plan view /projection in 3planes /3D view
	Magnification of details
3D line graphics	For verification of programs created offline
2D pencil-trace graphics	2D pencil-trace graphics
Program-run graphics display moded	Graphic simulation during real-time maching
	Plan view /projection in 3planes /3D view
Machining time	Calculation of machining time in the Test Run operating mode
Machining time	Display of the current machining time in the Program Run operating modes
Returning to the contour	
Datum management	One table for storing reference point
Datum tables	Multiple datum tables for storing workpiece-specific datums
Language	English / German / Korean / French / Italian / Spanish / Portuguese / Swedish / Danish / Finnish / Dutch /
	Polish / Hungarian / Russian / Chinese / Chinese_Trad /Slovenian / Norwegian / Czech / Romanian / Slovak / Turkish
Interpolation	
Linear	5 Axes
Circular	3 Axes
Spline	(Max. 5 Axes)
Helical	
Cylinder surface	
Rigid tapping	

HEIDENHAIN S/W OPTION (As a standard)

Advanced function set 1	1. Rotary table machining / 2. Coordinate transformations / 3. Interpolation
Advanced function set 2	1. 3-D machining / 2. Interpolation
DCM : Dynamic Collision Monitoring	Manual / automatic collision monitoring for safety machining operation
Kinematic Opt	Easy calibration of rotary axes

HEIDENHAIN S/W OPTION (Customer Option)

Display step (micron control)	Linear axis : 0.1 μm (std) \rightarrow 0.01 μm (with option #23) / Angular axis : 0.0001° (std) \rightarrow 0.00001° (with option #23)
DXF converter	Importing contours and machining options from DXF files
AFC : Adaptive Feed Control	Controls the feed rate depending on the machine situations
Kinematic comp (3-D spatial compensation)	Improves machine accuracy by compensation of geometry errors
CTC : Cross Talk Compensation	Compensation of position errors through axis coupling to improve quality and accuracy
PAC: Position Adaptive Control	Position-dependent adaptation of control parameters
LAC : Load Adaptive Control	Adjust the parameters of the feedforward control to the current mass of the workpiece
ACC : Active Chatter Control	Reduces chattering during heavy cutting to decrease tool mark and machine load
AVD : Active Vibration Damping	Vibration damping by adjusting of the jerk for better surfaces

Figures in inch are converted from metric values.

The SIEMENS controller specifications are subject to change based on the policy of company CNC supplying.
