HEAVY DUTY CUTTING & HIGH ACCURACY

MAIN SPINDLE

Spindle Ideal for Heavy Cutting

The thermally symmetrical headstock has a special heat insulation board which blocks the heat and maintains high accuracy during long and continuous operations. To accomplish advanced stability even during heavy duty cutting, a combination of P4 double cylindrical roller bearings and angular bearings are adopted.

The double locking device separates the spindle bearing and pulley to prevent a decrease in spindle bearing pretension during interrupted cutting, heavy duty cutting, chuck cylinder operation, and by belt pulley tension.

C-Axis Control ('M' Type)

The C axis is capable of 0.001° control when milling turret is applied. Machining capability is strengthened with turning and milling operations.

2-Step Gear Box

A two-step driving method is applied inside the main spindle as standard on non mill turrets. It provides powerful torque at low speeds and stable rotation at high speeds.

Standard feature of L400MC/LMC spindle (gear-driven) is unable to control 0.001° due to mechanical characteristic. If the contouring control is needed, please select belt-type (gearless) spindle. (L400MA : Belt-type as a standard)

BIG BORE SPINDLE (L400C Series)

The big bore spindle of $\varnothing 181\text{mm}$ (7.1") provides excellent performance during pipe machining. Also, spindle torque of 2,705N·m(1,995.1lbf·ft) is optimal for heavy duty cutting.

Chuck Size : 10"

Spindle Speed : 3,000 rpm

Bore : Ø75 (Ø2.9")

HIGH PRECISION SYSTEM

Automatic Q-Setter

Quick and accurate tool calibration can be done by contacting the tool tip with the sensor.

Steady Rest

For long parts, such as shafts, the steady rest increases rigidity and minimizes vibration.

Linear Scale

Linear scales increase positioning accuracy and reduce distortion caused by thermal growth, thus ensuring a more accurate finished part

Long Boring Tool holder

When using long boring tool holder, deeper inner diameter machining is possible, enabling faster and more precise machining.
