

Event Management

Track, schedule, manage and execute your events with precision and clarity with an end-to-end Event Management solution

Modern event management can be a harrowing task at the best of times with many moving parts that need to be accounted for. From scheduling venues to resource allocation, to guest management – any edge that can be provided to smoothen the process is a valuable tool for organizations to leverage. Technology stands to be that tool, with over 73.6% of event planners being more skilled in technology usage to further bolster their enterprise's events.¹

A streamlined event management system ensures complete transparency and resource allocation capabilities that can guarantee success.

TMA Systems' Event Management module allows enterprises to assign resources for an event including buildings, equipment, and vehicles. Furthermore, it can also be linked to WebTMA Projects* for estimating and scheduling the many work-related activities and requirements necessary to successfully execute an event.

The Features

Streamlined visualization of monthly events by viewing them on a graphical calendar

Ability to convert scheduled event items to reservations**

Simple and quick scheduling of event resources including equipment, assets, and vehicles

Access to vital event information such as:

- General setup requirements
- Foodservice requirements
- Security, electrical, and environmental requirements
- Attendant requirements
- Floral requirements

Tracking for all event expenses and work activities using WebTMA Projects*

Timely notifications to technicians regarding conflicts with pending events when creating work orders on spaces reserved or scheduled

The Benefits

Easy and quick management of dates, facilities, and resources for events

Complete transparency into all your enterprise's event information available from event reports, project reports, and work order reports

Recording of all necessary event information in one central location

Effective Estimation of event setup requirements and costs

End-to-End event management from one singular platform

Discover how WebTMA can transform your organization.
