

# Garage Rendlen

---

## Solid reinforced concrete skeleton construction

The garage building was constructed below an existing garden. The procedure for the earthworks and the ground plan contour were specially coordinated so that the planting and the tree population of the existing garden above the garage building could be preserved.

## Project details:

Year: 2001

---

Location: Korntal, Germany

---

Building owner: Private

---

Client: Private

---

Services: Structural design

---

Other parties involved: Duder Kiess, Stuttgart
