

# PROJECT PROFILE

## BAW BAW SHIRE COUNCIL OFFICES

### CLIENT

> Fonterra

### LOCATION

> Cobden, Victoria

### ARCHITECT / DESIGNER

> Site Engineers

### VALUE

> \$4.08m

### SUMMARY

> The scope of works included the installation of all refrigeration plant and equipment including heavy transport bays and dock levellers. Works also included earthworks to raise the slab above the existing levels, roadside curbing, foot paths and basic landscaping around the building. Hydraulic refrigerated lines were laid throughout the extensive slab as part of the coolroom function. In total, the site measured approximately 1500 sqm. The timeline was very tight and the site needed to remain operational which included significant traffic management.

### CONSTRUCTION HIGHLIGHTS AND TECHNIQUES

- > Hydraulic refrigeration in a large slab
- > Tight timeframe in a complex and operational site
- > Structural steel, tilt slab and coolroom panelling
