

PROJECT PROFILE

GIPPS AERO HANGAR

CLIENT

> Latrobe City Council

LOCATION

> Traralgon, Victoria

ARCHITECT / DESIGNER

> CABA Design

VALUE

> \$1.20m

SUMMARY

> This D&C project was built for the manufacturing of a new type of aircraft for Mahindra Air Services. We produced a winning design through careful discussions with our associated architect, design team and members of the Latrobe City Council. The hangar measures 52 metres long and 25 metres wide containing an internal office space of 110m² and an external office and amenities area of 100m². We're very proud of our design and the council representatives were extremely happy with our management of the project in a highly active and dangerous area.

CONSTRUCTION HIGHLIGHTS AND TECHNIQUES

- > Design and Construct project
- > Collaborative project with successful outcomes for all
- > Complex and dangerous construction environment
- > 22m wide door and 23m wide gantry crane
