

PROJECT PROFILE

PEDIATRICS CLINIC AND TRAINING FACILITY

CLIENT

- > West Gippsland Regional Hospital

LOCATION

- > Warragul, Victoria

ARCHITECT / DESIGNER

- > CABA Design

VALUE

- > \$410k

SUMMARY

- > The West Gippsland Regional Hospital chose Kubale Constructions to extend and refurbish their existing pediatrics facilities at their site in Warragul, Victoria. Works included the consulting suites and the internal fit-out and renovation of the Monash University Medical Training facility to a total value of \$600k. While the construction methods were conventional, the project was challenging because the building being renovated was in continual use. Construction staff needed to pay particular attention to noise, safety, access and the presentation of the site.

CONSTRUCTION HIGHLIGHTS AND TECHNIQUES

- > Operational site with safety complexities
- > Construction completed with minimal noise
- > Largely conventional techniques
