

Balance performance and storage demands

The PowerEdge T440 tower server delivers powerful 2-socket performance, expandability and quiet operation to your small-to mid-sized business (SMB) and remote office/branch office (ROBO) sites. Outstanding efficiency helps you keep operating expenses in check as your requirements evolve.

Adapt and scale with an expandable, virtualization-ready platform

The PowerEdge T440 brings you flexibility with a rack-capable tower platform, short 22-inch depth and quiet acoustics that are right for your office or data center. The T440 is an excellent fit for a wide range of office workloads, including work group collaboration and productivity applications, mail and messaging, file and print serving, and web serving. Easily adapt to your dynamic business requirements with performance, capacity and I/O options.

- Boost performance with next-generation Intel® Xeon® Scalable processors.
- Drive application response times faster with 33% more capacity for data-in-memory.¹

Intuitive systems management with intelligent automation

PowerEdge servers with embedded iDRAC offer agent-free management right out of the box, delivering smart automation of routine tasks. The T440 is easily managed which frees up time for work priorities.

- Simplify and automate management of your Dell EMC infrastructure with OpenManage Enterprise.
- Increase IT data protection and integrity with the embedded security features of iDRAC9.

Rely on PowerEdge with integrated security

Every PowerEdge server is made with a cyber-resilient architecture, building security into all parts of a server's life cycle. The T440 uses these new security features so you can reliably and securely deliver the right data to where your customers are, no matter where they are. Dell EMC considers each part of system security, from design to end of life, to ensure trust and deliver worry-free, secure systems.

- Rely on a secure supply chain that protects servers from the factory to the data center.
- Maintain data safety with cryptographically signed firmware packages and Secure Boot.
- Protect your server from malicious malware with iDRAC9 Server Lockdown mode (requires Enterprise or Datacenter license).
- Wipe all data from storage media including hard drives, SSDs and system memory quickly and securely with System Erase.

PowerEdge T440

- Grow data over time with up to 8 x 3.5" or 16 x 2.5" HDD or SSD drive options
- Seamlessly scale as your workload requirements change with 5 x PCIe Gen3 I/O slots
- Boost performance and protect data with software and hardware RAID options
