Intelligent dashboards to enable better forecasting and investment decisions

Calibrate Consulting delivers a liquidity-management dashboard for a tier-one bank's treasury and liquidity customers. The tool provides a consolidated view of total cash positions globally.

The customer requirement

A global bank wanted to give its liquidity clients a next-generation dashboard with enhanced visualisation and data-analytics tools. The challenge was to integrate complex data from multiple sources and deliver to 45+ markets in one launch.

The Calibrate Consulting Solution

Calibrate Consulting, delivered a next-generation dashboard for the tier-one bank. It gives banking customers powerful, new visualisation and data analysis tools. The complex application extracts data from multiple sources and integrates seamlessly with the bank's internal architectures.

The outcomes and benefits

Delivered on time in just 9 months, the web-based liquidity-management dashboard brought a banking-industry award to the bank's liquidity team shortly after launch. For customers, the new tools provided greater transparency, deeper insights and improved workflows.

KEY DETAILS

Customer Sector:
Financial services

Geographies
EMEA, Americas, APAC

Customer business areas impacted
Product and service delivery
