DRIVER TURNOVER COST CALCULATOR

1. Number of total trucks in total fleet
2. Number of company trucks idle & without Drivers =
3. Average Revenue per "operating" truck per week (excluding FSC) =
4. Average operating days per week & month =
4. Average operating days per week & month –
5. Average % of Gross Profit (Reveue minus Variable Expenses/Revenue) =
or / tvorage // er erees r rent (rtereas minas tanasis Expenses/rterenas)
6. Average Gross Profit Margin per truck per month =
7. Average working days needed to find replacement drivers =
8. Driver Recruiting / Orientation Staff and Budget Expenses:
A. Manager
B. Recuiter(s)
C. Orientation Staff Members
D. Admin. / Support Staff Members
Total Average Salaries
E. Average % cost of Payroll Taxes & Benefits
F. Average monthly advertising expense
G. Average monthly cost of promotional material / supplies=
H. Average monthly cost of Travel / Meals / Entertainment =
I. Average monthly cost of Other Dept. Expenses
Total Departmental Expenses
9. Annualized Driver Turnover rate
Number of Drivers Needed per month
COST RESULTS & STATISTICS:
1. Recruiting Costs per month per Driver
2. Monthly Recruiting Costs
3. Cost of Lost Productivity during Driver recruitng/replacement cycle =
Recruiting Costs per Driver
Total Cost per Month of Recruiting Drivers
4. Cost / Month (reduced gross profit) of Idle Driverless Trucks.
Total Cost per Month of recruiting and driverless, Idle Trucks
Total Cost / Year of recruiting and Idle Trucks =
