## HEPA Filters, Bag Filters & Pleated Panel Filters

At AAC Eurovent we can supply a full range of high quality Hepa Filters, Bag Filters and Pleated Panel Filters.

### HEPA Filters

Our low cost HEPA Filters are suitable for Air Filtration in a wide range of applications including: Clean Rooms, Research & Medical Laboratories, Pharmaceutical Establishments, Electro technology & Micro technology sites.

#### HEPA Filter Classification:

- Filter class H10
- Filter class H11
- Filter class H12
- Filter class H13
- Filter class H14

### Features

Our range of HEPA filters is available in several versions:

- HEPA - Wedge Shaped Filter
- HEPA - Compact Cassette Filter
- HEPA - Filter Box

AAC Hepa, Bag & Pleated Panel Filters

All our HEPA Filters are tested according to EN 1822, are humidity resistant up to 100% r.h ( depending on version), and are temperature resistant to max 700°C and contain no silicone.

### Bag Filters

We offer an extensive range of robust Bag Filters (Pocket Filters). Manufactured using the latest technology, our Bag Filters are suitable for a wide range of Air and Dust Filtration, in a range of Industrial and Commercial applications. Available in four efficiencies, as well as a number of configurations, these synthetic Bag Filters are ideal for use as a second stage Filter.

Our Bag Filters are used in the following applications:

- Fine Filtration in Heat Ventilation & Air Conditioning Devices
- Office Intake Systems
- Hospitals & Laboratories
- Pharmaceutical Industry
- Computer Centres

### Pleated Panel Filters

Our Pleated Panel Filters are suitable for temperatures up to 1000°C. These Synthetic Filters are made from a blend of cotton and polyester, bonded with a flame retardant binder and laminated to a galvanised mesh, and are suitable for a wide range of Industrial and Commercial applications.
