# OVERVIEW

This specifications document outlines the format in which IEX Members should correctly format their FIX messages for order entry as well the expected format for execution and drop copy messages received back from IEX.

IEX supports FIX 4.2 as a base protocol, with IEX-specific modifications detailed in this specification.

It is assumed that the reader is familiar with the FIX 4.2 protocol as described at <http://www.fixprotocol.org>. This document describes the differences between the IEX implementation and the FIX 4.2 standard.

See the [Investors Exchange Rule Book](#) for functional details.

## Hours of Operation

Refer to the Exchange website for the [IEX holiday schedule](#).

Orders entered prior to the start of the Pre-Market Session will be rejected. Orders entered prior to the start of the Regular Market Session which are accepted and designated to begin trading in the Regular Market Session will be queued. For more information on each order type's available Time in Force (sessions in which it will queue or trade), please see the TIF Matrix [\[Appendix E\]](#). Once the Regular Market Session begins, queued orders will be released to the book in time priority and will be eligible for matching. Refer to the IEX Regular Market Hours Opening Process in Exchange Rule 11.231 for more information.

Orders are rejected if they are received outside the hours IEX is available for trading. All orders remaining after the Post-Market Session will be cancelled automatically.

Session	Start and End Time (all times are Eastern Time)
Begin Order Entry Acceptance	8:00 a.m.
Pre-Market Session	8:00 a.m. – 9:30 a.m.
Regular Market Session	9:30 a.m. – 4:00 p.m.
Post-Market Session	4:00 p.m. – 5:00 p.m.
System Hours (trade matching and routing)	8:00 a.m. – 5:00 p.m.

# FIX TAGS

This section lists the FIX tags and values supported while transacting with IEX. Required tags for various message types are shown in further detail in the section titled **Message Types** below. The subsection titled **Trading Messages** indicates tag/value requirements and dependencies per order type supported at IEX.

## Session FIX Tags

### Header

Tag	Field Name	Details	Guidelines
8	BeginString	Identifies beginning of new message and protocol version 4.2. ALWAYS FIRST FIELD IN MESSAGE	
9	BodyLength	Message length, in bytes, forward to the CheckSum field. ALWAYS SECOND FIELD IN MESSAGE.	
35	MsgType	Defines message type. ALWAYS THIRD FIELD IN MESSAGE. Supported values: 0=Heartbeat 1=Test Request 2=Resend Request 3=Reject 4=Sequence Reset 5=Logout 8=Execution Report 9=Order Cancel Reject A=Logon D=Order Single F=Order Cancel Request G=Order Cancel/Replace Request UCC=IEX Trade Bust	
34	MsgSeqNum	Integer message sequence number.	
49	SenderCompID	IEX-assigned value used to identify firm sending message.	
52	SendingTime	Time of message transmission (always expressed in UTC (Universal Time Coordinated, also known as "GMT"). Higher resolution timestamps (i.e., microsecond or nanosecond level granularity) are available on IEX outbound messages and will reflect the User's port-level setting.	Applied on the port session level. Default format: <u>Millisecond</u> YYYYMMDD-HH:MM:SS.sss sss=000-999

			Members must opt in for more granular timestamps via the <a href="#">IEX Equities Port Request Form</a> by choosing one of the below settings per port session level:  <u>Microsecond</u> YYYYMMDD-HH:MM:SS.ssssss  <u>Nanosecond</u> YYYYMMDD-HH:MM:SS. sssssssss
56	TargetCompID	Members will target "IEXG"	

## Trailer

Tag	Field Name	Details	Guidelines
10	Checksum	Three byte, simple checksum. ALWAYS LAST FIELD IN MESSAGE; i.e., serves, with the trailing <SOH>, as the end-of-message delimiter. Always defined as three characters.	

## Duplicate Messages

Tag	Field Name	Details	Guidelines
43	PossDupFlag	Indicates possible retransmission of message with this sequence number	Default: Not sent. Only required for resend messages (PossDup or PossResend)
97	PossResend	Indicates that message may contain information that has been sent under another sequence number.	
122	OrigSendingTime	Original time of message transmission (always expressed in UTC (Universal Time Coordinated, also known as "GMT") when transmitting orders as the result of a resend request. Timestamp granularity (i.e. millisecond, microsecond or nanosecond) based upon User's port-level setting(s)	Applied on the port session level. Default format:  Millisecond YYYYMMDD-HH:MM:SS.sss sss=000-999  Members must opt in for more granular timestamps via the <a href="#">IEX Equities Port Request Form</a> by choosing one of the below settings per port session level:  <u>Microsecond</u> YYYYMMDD-HH:MM:SS.ssssss  <u>Nanosecond</u> YYYYMMDD-HH:MM:SS.SSSSSSSSS

# Order Transaction FIX Tags

## FIX Standard Tags

The highlighted portions below are not yet operative. IEX will issue a trading alert announcing implementation timing. Please see [IEX Trading Alert #2024-007](#) for details.

Tag	Field Name	Details	Guidelines
1	Account	If sent by Member, this value will be echoed back in execution reports	Max length: 16 chars
11	ClOrdID	Unique identifier, per session, per trading day for Order as assigned by the Member	Max length: 20 chars ASCII characters not permitted: @ - at sign , - comma " - double quotation   - pipe
18	ExecInst	d=Discretionary Peg (executes on IEX) f=ISO (executes on IEX) i=IEX Only (also known as Standard) j=Discretionary Limit (executes on IEX) M=Midpoint Peg (executes on IEX) o=Offset Peg (executes on IEX) P=Market Peg (executes on IEX) Q=Market Maker Peg (executes on IEX) R=Primary Peg (executes on IEX) u=Router ([r,s,t] are accepted and converted to [u]) y=Trade At ISO (executes on IEX) z=Corporate D-Peg (executes on IEX)	Only single values allowed  See the <a href="#">IEX Rule Book</a> for functional details.
21	HandlInst	1=Automated execution order, private, no Broker intervention	Optional. Value ignored, if present.
38	OrderQty	Number of shares ordered	1-10,000,000
40	OrdType	1=Market 2=Limit P=Pegged	Price (44) must be populated for [2]=Limit  OrdType (40) must be populated with [P]=Pegged when ExecInst (18) has any of the following values: [M]=Midpoint peg, [R] = Primary peg, [d] = Discretionary peg, [o] = Offset Peg, [z] = Corporate D-Peg,

Tag	Field Name	Details	Guidelines
			<p>[Q]=Market Maker peg, or [P]=Market Peg</p> <p>OrdType must be populated with [2]=Limit for Discretionary Limit orders (18=j)</p> <p>[P]=Pegged orders are not eligible to route (Tag 18 = u) unless members instruct IEX on the <a href="#">IEX Equities Port Request Form</a> to ignore their routing instruction and instead treat as a Midpoint Peg (FIX Tag 18=M).</p> <p>At the open and At the close orders (59=2,7) with 40=P will be rejected upon receipt.</p>
41	OrigCLOrdID	CLOrdID referencing the order to be cancelled or replaced	<p>Max length: 20 chars ASCII characters not permitted: @ - at sign , - comma " - double quotation   - pipe</p>

Tag	Field Name	Details	Guidelines
44	Price	Required for Limit Orders	<p>The Minimum Price Variation (“MPV”) for orders entered into the System shall be \$0.01 for orders priced \$1.00 or greater, and \$0.0001 for orders priced below \$1.00.</p> <p>Only valid for OrdType (40) of [2]=Limit or [P]=Peg</p>
47	OrderCapacity	A=Agency P=Principal R=Riskless Principal	Option to default on a session level without needing to send per message
54	Side	Side of Order 1=Buy 2=Sell Long 5=Sell Short 6=Sell Short Exempt	LocateReqd (114) must be populated with [N] for [5]=Sell Short and [6]=Sell Short Exempt
55	Symbol	Ticker symbol	<p>The entire symbol (root and suffix, if applicable) needs to be sent if using Nasdaq symbology. CMS symbology can be sent either via 55/65 combo or concatenated using 55 alone.</p> <p>Please consult Appendix A</p>
58	Text	Free form text. Will not be processed and will not be echoed back on execution reports.	
59	TimeInForce	0=Day 2=At the open 3=IOC 4=FOK 5=Good ‘til Extended Day 6=Good ‘til Time 7=At the close M=System Hours	<p>TIFs function differently for certain order types. Please see the TIF Details and Guidelines in the Trading Messages section for specific order type details.</p> <p>Please reference the <a href="#">TIF Matrix [Appendix E]</a> for accepted order entry</p>

Tag	Field Name	Details	Guidelines
			<p>parameters in the Pre, Post and Regular Market Sessions.</p> <p>[0]=Day orders can be sent, and will be acknowledged before the start of Regular Market Hours starting at 9:30 am, but will only be eligible to trade between 9:30 am – 4 pm</p> <p>[5]=Good 'til Extended Day can be sent, and will be acknowledged before the start of Regular Market Hours starting at 9:30 am, but will only be eligible to trade between 9:30 am – 5 pm</p> <p>Pegged orders ([40]=P) and Discretionary Limit Orders ([40]=2),([18]=j) entered in the pre-market must have a TimeInForce of [0]=DAY; orders with all other TimeInForce values will be rejected</p> <p>Market Day orders received before the start of the Regular Market Session will be rejected unless the order is for an IEX listed security</p> <p>[3]=IOC not compatible with Discretionary Limit</p>

Tag	Field Name	Details	Guidelines
			<p>Orders (18=j) or Offset Peg orders (18=o)</p> <p>[4]=FOK not compatible with routable orders (18=r, s, t, u), Discretionary Limit Orders (18=j), or Offset Peg orders (18=o)</p> <p>[6]=Good 'til Time requires ExpireTime (126)</p> <p>[2,7]=At the open, At the close orders submitted for non-IEX-listed securities will be rejected upon receipt.</p> <p>All unexecuted orders at end of corresponding trading sessions will receive Unsolicited Cancels.</p>
60	TransactTime	Time of order creation (expressed in UTC)).	<p>Applied on the port session level. Default format:</p> <p><u>Millisecond</u></p> <p>YYYYMMDD-HH:MM:SS.sss</p> <p>sss=000-999</p> <p>Members must opt in for more granular timestamps via the <a href="#">IEX Equities Port Request Form</a> by choosing one of the below settings per port session level:</p> <p><u>Microsecond</u></p> <p>YYYYMMDD-HH:MM:SS.ssssss</p>

Tag	Field Name	Details	Guidelines
			<u>Nanosecond</u> YYYYMMDD-HH:MM:SS. Sssssssss
65	SymbolSfx	Additional information about the security (e.g., preferred, warrants, etc.).	Not available for Nasdaq format, available for CMS only. Please consult Appendix A.
110	MinQty	Minimum quantity size of an order to be executed.	<p>Only available for non-displayed IEX-only orders (18=i, j, M, R, d, P, o, z), but not valid for orders with 18=M and 9416=T or F (RLP or Fixed Midpoint Peg orders). Not valid for routable orders (18=r, s, t, u), ISO orders (18=f, y) or displayed Discretionary Limit Orders (18=j).</p> <p>At the open or At the close orders (59=2,7) with MinQty greater than 0 will be rejected upon receipt.</p>
111	MaxFloor	<p>Quantity to display (for a reserve order).</p> <p>If not populated, order is fully displayed.</p> <p>If MaxFloor(111) = 0, limit order is non-displayed.</p>	<p>For Reserve orders: A value of [0] indicates a non-displayed order.</p> <p>Omitting the MaxFloor(111) tag or submitting MaxFloor (111) = OrderQty (38) indicates a fully displayed order.</p> <p>MaxFloor may be a fixed amount of shares; or an odd, mixed, or round lot quantity. A Random Replishment feature is also</p>

Tag	Field Name	Details	Guidelines
			<p>supported, please see FIX tag section 8020 for more details.</p> <p>For odd lot reserve orders, set to a value &lt; 1 round lot and &lt; OrderQty (38)</p> <p>Discretionary Limit Orders (18=j) can be fully displayed (omit MaxFloor) or non-displayed (11=0). Reserve functionality is also supported for Discretionary Limit Orders.</p> <p>Accepted for At the open and At the close orders (59=2,7), but not enforced during auction match.</p> <p>Not compatible with IOC or FOK.</p>
114	LocateReqd	Required for Sell Short and Sell Short Exempt orders. N=Locate not required	[N] is the only accepted valid value. Lack of (114) or values other than 114=[N] for Sell Short or Sell Short Exempt orders will be rejected.
115	OnBehalfOfCompID	IEX-assigned value used to identify firm sending message. Applicable for Service Bureau connections.	
126	ExpireTime	Required for GTT orders. Must be today's date with a valid value within the remaining trading time.	
7928	Anti-Internalization Qualifiers (AIQ) ID	Anti-Internalization "AIQ group" must be enabled at the port level first in order for the AIQ identifiers and modifiers to be properly enforced if sent per order. Users have the choice of setting AIQ on a Member Affiliate, User or MPID basis. If an order is submitted	<p>1<sup>st</sup> and 2<sup>nd</sup> character AIQ identifier Level:</p> <p>Each character can be "0-9", "A-Z", "a-z".</p>

Tag	Field Name	Details	Guidelines
		<p>on a port that is not AIQ enabled, this FIX tag will be disregarded.</p> <p>3 Characters for self trade prevention:</p> <ul style="list-style-type: none"><li>• First 2 characters are the AIQ identifier to prevent orders that share the same value and originate from the same Member Affiliate (two or more Members that are affiliates), User (Member) or MPID (as set at the port level) from executing against each other.</li><li>• 3<sup>rd</sup> character is the 1 character AIQ modifier, which specifies the type of AIQ behavior</li></ul>	<p>Case sensitive (i.e., 5B != 5b).</p> <p>If 7928 is omitted, and AIQ is enabled for the order entry port, the order will still be subject to AIQ. To disable AIQ for an order submitted on an AIQ-enabled port, User should input either “_” or “---” – which signifies “free-to-trade” (Anti-Internalization disabled for this order). Users can also completely disable their AIQ on a port level for all orders via the <a href="#">JEX Equities Port Request Form</a>.</p> <p>3<sup>rd</sup> character AIQ Modifier: N – Cancel newest O – Cancel oldest B – Cancel both S – Cancel smaller D – Decrement larger original order quantity and cancel smaller</p> <p>Missing 3<sup>rd</sup> character modifier indicates default behavior of cancel oldest (O).</p> <p>Routable orders (18=u) with a 3<sup>rd</sup> character of “D” (Decrement Larger) will be rejected upon receipt.</p> <p>Accepted for At the open and At the close orders (59=2,7), but not enforced.</p>

Tag	Field Name	Details	Guidelines
8020	DisplayRange	Quantity range to display (for a reserve order)	<p>Must be accompanied with a MaxFloor (111) if DisplayRange (8020) is populated</p> <p>Cannot have DisplayRange that is <math>\geq</math> MaxFloor</p> <p>May either be a round lot multiple or <math>&lt;</math> than one round lot (odd lot)</p> <p>If MaxFloor = round lot multiple, DisplayRange must be a round lot multiple <math>&lt;</math> MaxFloor</p> <p>*e.g., If MaxFloor = 200, DisplayRange = 100</p> <p>If MaxFloor = 400, DisplayRange can =100, 200, or 300</p> <p>If MaxFloor <math>&lt;</math> a round lot select DisplayRange one or more shares <math>&lt;</math> Maxfloor</p> <p>*e.g., Can be <math>\leq 99</math> shares, but not a single round lot (100 shares) If MaxFloor = 99, DisplayRange can = 1-98 shares</p> <p>*If DisplayRange + MaxFloor are <math>\geq</math> to a round lot, the replenishment range is capped at 99 shares</p> <p>*Examples assume a round lot size = 100 shares. Same logic applies for symbols with other round lot sizes.</p>
8484	Investor ID	Unique string per "investor" on whose behalf the Member is acting. Will not be echoed back on execution reports.	Max length: 20 chars

Tag	Field Name	Details	Guidelines
9140	DisplayInst	P=Post Only -None	<p>Only applicable when ExecInst(18) = 'i' or 'j'.</p> <p>9140=[P] only if OrdType(40) = '2', MaxFloor(111) is omitted or equal to OrderQty(38), and Price(44) is equal to \$1.00 or more.</p> <p>None is the default DisplayInst.</p> <p>DisplayInst value will override any values set at the port level; if DisplayInst is omitted the default port session setting will be enforced.</p>
9303	RoutingInst	N=Trade Now On -Trade Now opt-out	<p>9303 can only be populated if:</p> <p>OrdType(40)=[P] when ExecInst(18) has any of the following values:</p> <p>[o]=Offset peg, [P]=Market peg [M]=Midpoint peg (including Fixed Midpoint Peg: ExtendedExecInst (9416)=[F])</p> <p>Trade Now On is the default RoutingInst.</p> <p>RoutingInst will override any values set at the port level; if RoutingInst is omitted the default port session setting will be enforced.</p>
9416	ExtendedExecInst	R = Retail T = Retail Liquidity Provider (RLP) F = Fixed Midpoint Peg  This value will be echoed back in execution reports	<p>9416= "T" or "F" will only be accepted when ExecInst(18) = "M".</p> <p>9416= "R" will only be accepted when ExecInst(18)= "M" or "d"; OrdType (40) = "P"; OrderCapacity (47) = "A" or "R"; and</p>

Tag	Field Name	Details	Guidelines
			<p>TimeInForce (59) = 3 (IOC), 4 (FOK)</p> <p>“R” may be assigned by IEX based on a port configuration setting instruction from an approved Retail Member Organization.</p>
9500	MinQtyInstruction	<p>C=Composite</p> <p>M=Minimum Execution Size with Cancel Remaining; once LeavesQty &lt; MinQty, order will cancel</p> <p>A=Minimum Execution Size with AON Remaining; once LeavesQty &lt; MinQty, Open shares become All or None</p>	<p>Only valid if 110 (MinQty) is sent.</p> <p>Will not be echoed back in execution reports.</p> <p>Not changeable via Cancel/Replace</p>
9692	DisplayPrice	Displayed Order book price if different than Limit Price(44)	Only applicable when order is displayed
20003	CancellInsteadOfSlide	<p>0=Slide</p> <p>3=Cancel order instead of slide</p>	<p>Only applicable for when DisplayInst (9140) = 'P'.</p> <p>Sliding is the default behavior.</p> <p>CancellInsteadOfSlide will override any values set at the port level; if CancellInsteadOfSlide is omitted the default port session setting will be enforced.</p>
20050	CxIPxBack	<p>N=No Action</p> <p>C=Cancel order</p> <p>U=Re-price to the less aggressive of the order's limit price or the NBB (for buys)/NBO (for sells)</p> <p>Above is the behavior to enforce upon expiration of a set timer.</p>	<p>Only applies to Discretionary Limit orders (18= j) that have been price adjusted due to a CQI event, if 10 ms after the CQI event, the order is priced less aggressively than the NBB (for buy orders)/NBO (for sell orders).</p>

Tag	Field Name	Details	Guidelines
			CxlPxBack value will override any values set at the port level; if CxlPxBack is omitted the default port session setting will be enforced.
20067	SigVersion	Signal version  1 = Signal v5 2 = Signal v6	For D-Peg, P-Peg and C-Peg orders only.  If omitted the value will be the requested default on the <a href="#">IEX Equities Port Request Form</a> . If no default is specified then Signal v5[1] will be used.

#### FIX Tags / Values from IEX Executions

Tag	Field Name	Details	Guidelines
6	AvgPrice	Calculated average price of all fills on this order	
14	CumQty	Total number of shares filled	
17	ExecID	Unique identifier of execution message	Case sensitive alpha-numeric free format string. (i.e., ABC != abc).  Can include any character or punctuation
19	ExecRefID	Referenced ExecID of execution to apply trade correction to	
20	ExecTransType	Identifies transaction type  0=New 1=Cancel	
30	LastMkt	Market of execution for last fill.	4 character code. See Appendix D.
31	LastPx	Price of this (last) fill.	
32	LastShares	Quantity of shares executed on this (last) fill.	

Tag	Field Name	Details	Guidelines
37	OrderID	Unique IEX Order ID	
39	OrderStatus	0=New 1=Partial fill 2=Fill 4=Canceled 5=Replace 6=Pending Cancel (e.g., result of Order Cancel Request) 8=Rejected E=Pending Replace (e.g., result of Order Cancel/Replace Request)	Identifies current status of order.
42	OrigTime	Indicates TransactTime (60) of original execution. Applicable for Trade Busts. Timestamp granularity (i.e. millisecond, microsecond, or nanosecond) based upon User's port-level setting(s).	Applied on the port session level. Default format: <u>Millisecond</u> YYYYMMDD-HH:MM:SS.sss sss=000-999  Members must opt in for more granular timestamps via the <a href="#">IEX Equities Port Request Form</a> by choosing one of the below settings per port session level:  <u>Microsecond</u> YYYYMMDD-HH:MM:SS.ssssss  <u>Nanosecond</u> YYYYMMDD-HH:MM:SS.Sssssssss
102	CxlRejReason	0=Too late to cancel 1=Unknown order 2=Exchange Option 3=Already Pending Cancel or Pending Replace	Code to identify reason for cancel rejection.
103	OrdRejReason	0=Broker option 1=Unknown symbol 2=Exchange closed	Code to identify reason for order rejection.

Tag	Field Name	Details	Guidelines
		3=Order exceeds limit 4=Too late to enter 5=Unknown order	
128	DeliverToCompID	IEX-assigned value used to identify firm the message is intended for. Applicable for Service Bureau connections.	
150	ExecType	0=New 1=Partial fill 2=Fill 4=Canceled 5=Replace 6=Pending Cancel (e.g., result of Order Cancel Request) 8=Rejected D=Restated E=Pending Replace (e.g., result of Order Cancel/Replace Request)	Describes the specific Execution Report (e.g., Pending Cancel) while OrdStatus will always identify the current order status (i.e., Partially Filled)
151	LeavesQty	Number of shares open for further execution.	
375	ContraBroker	Identifies contra broker (denoted with value "IEXG").	
382	NoContraBrokers	The number of ContraBroker (375) entries (denoted with value "1").	
434	CxlRejResponseTo	1=Order Cancel Request 2=Order Cancel/Replace Request	Identifies the type of request that a Cancel Reject is in response to.
851	LastLiquidityInd	1=Added Liquidity 2=Removed Liquidity 3=Routed 4=Auction 9=Removed Liquidity on Recheck	Identifies source of execution and whether an execution on IEX resulted from liquidity provision or removal, or from a single-price cross (e.g., auction).
9416	ExtendedExecInst	R=Retail T=Retail Liquidity Provider (RLP) F=Fixed Midpoint Peg  This value will be echoed back in execution reports	9416="T" or "F" will only be accepted when ExecInst(18) = "M".  9416="R" will only be accepted when ExecInst(18)="M" or "d"; OrdType (40) = "P"; OrderCapacity (47) = "A" or "R"; and TimeInForce (59) = 3 (IOC), 4 (FOK)

Tag	Field Name	Details	Guidelines
			'R' may be assigned by IEX based on a port configuration setting instruction from an approved Retail Member Organization.
9730	TradeLiquidityIndicator	<p><b><u>Base Character(s)</u></b> MI=Add Non-Displayed Continuous Execution ML=Add Displayed Continuous Execution TI=Remove Non-Displayed Continuous Execution TL=Remove Displayed Continuous Execution X=Opening Process O=Opening Auction C=Closing Auction H=Halt / Volatility Auction P=IPO Auction</p> <p><b><u>Appended Characters</u></b> D=Execution of displayed Continuous Book interest in a cross or auction (applied with X, O, or C, only) R=Retail order removes liquidity A=Member adds liquidity against a Retail order with a Retail Liquidity Provider order W=Resting order removes against Post Only order Y=Post Only order executes on entry</p> <p>[Passed through value from Market Centers if LastMkt is not IEX; See Appendix F for details about tag mapping.]</p>	<p>To be used in conjunction with LastMkt(30) to determine trading costs. If LastMkt is a non-IEX market, this field will pass through the Indicator value sent by that market center.</p> <p>Opening, Closing, IPO, Halt, and Volatility Auctions are conducted for IEX-listed securities. See the <a href="#">IEX Auction Process Specification</a> for details about each auction type.</p> <p><a href="#">Opening Process</a> is conducted for non-IEX-listed securities.</p>
9882	FeeCode	<p>Specific fee code associated with execution on a non-IEX market.</p> <p>[Passed through value from Market Centers if LastMkt is not IEX; See Appendix F for details about tag mapping.]</p>	<p>To be used in conjunction with LastMkt(30) to determine trading costs. If LastMkt is a non-IEX market, this field will pass through the Indicator value sent by that market center.</p>

# MESSAGE TYPES

All messages below will be preceded by the standard FIX header and followed by the standard FIX trailer. **Bolded** text indicates required tags for the message type in question, unbolded text indicates optional tags.

## Session Messages

### Logon

The logon message authenticates a user establishing a connection to a remote system. Must always be initiated by Member to IEX.

Tag	Field Name	Details	Guidelines
<b>35</b>	<b>MsgType</b>	<b>A</b>	
<b>108</b>	<b>HeartBtInt</b>	<b>Heartbeat interval in seconds</b>	<b>Low values (e.g., 30) are recommended</b>

### Heartbeat

The Heartbeat monitors the status of the communication link and identifies when the last of a string of messages was not received.

Tag	Field Name	Details	Guidelines
<b>35</b>	<b>MsgType</b>	<b>0</b>	

### Test Request

The test request message forces a heartbeat from the opposing application.

Tag	Field Name	Details	Guidelines
<b>35</b>	<b>MsgType</b>	<b>1</b>	
<b>112</b>	<b>TestReqID</b>	<b>Required when the heartbeat is the result of a Test Request message.</b>	

## Resend Request

The resend request is sent by the receiving application to initiate the retransmission of messages. This function is utilized if a sequence number gap is detected, if the receiving application lost a message, or as a function of the initialization process.

Tag	Field Name	Details	Guidelines
35	MsgType	2	
7	BeginSeqNo	Message sequence number of first message in range to be resent	
16	EndSeqNo	Message sequence number of last message in range to be resent. If request is for a single message BeginSeqNo = EndSeqNo. If request is for all messages subsequent to a particular message, EndSeqNo = "0" (representing infinity).	

## Session Reject

The reject message should be issued when a message is received but cannot be properly processed due to a session-level rule violation.

Tag	Field Name	Details	Guidelines
35	MsgType	3	
45	RefSeqNum	MsgSeqNum of rejected message	
373	SessionRejectReason	Code to identify reason for a session-level Reject message. 0=Invalid tag number 1=Required tag missing 2=Tag not defined for this message type 3=Undefined Tag 4=Tag specified without a value 5=Value is incorrect (out of range) for this tag 6=Incorrect data format for value 7=Decryption problem 8=Signature problem 9=CompID problem 10=SendingTime accuracy problem 11=Invalid MsgType	
58	Text		

## Sequence Reset

The sequence reset message is used by the sending application to reset the incoming sequence number on the opposing side.

Tag	Field Name	Details	Guidelines
35	MsgType	4	
36	NewSeqNo	Next sequence number to expect	
123	GapFillFlag	Indicates that the Sequence Reset message is replacing administrative or application messages which will not be resent. Y=Gap Fill Message, MsgSeqNum field valid	

## Logout

The logout message initiates or confirms the termination of a FIX session.

Tag	Field Name	Details	Guidelines
35	MsgType	5	
58	Text		

## Trading Messages

**Bolded** text indicates required tags for the message type in question, unbolded text indicates optional tags.

The highlighted portions below are not yet operative. IEX will issue a trading alert announcing implementation timing. Please see [IEX Trading Alert #2024-007](#) for details.

### Sent to IEX – Single Order

#### Market

Must be IOC or FOK, or DAY. Can be enriched with MinQty. Compatible with Routing. Not compatible with MaxFloor or ISO.

Tag	Field Name	Details	Guidelines
35	<b>MsgType</b>	<b>D</b>	
11	<b>ClOrdID</b>	<b>Unique identifier, per session, per trading day for Order as assigned by the Member</b>	<b>Max length: 20 chars</b> ASCII characters not permitted: @ - at sign , - comma " - double quotation   - pipe

110	MinQty		Only non-displayed orders (111=0) may have a MinQty  Not compatible with ISO  Not compatible with FOK
111	MaxFloor	Quantity to display (for a reserve order).  If not populated, order is fully displayed.  If MaxFloor(111) = 0, D-Limit order is non-displayed.	For Reserve orders: A value of [0] indicates a non-displayed order.  Omitting the MaxFloor(111) tag or submitting MaxFloor (111) = OrderQty (38) indicates a fully displayed order.  MaxFloor may be a fixed amount of shares; or an odd, mixed, or round lot quantity. A Random Replishment feature is also supported, please see FIX tag section 8020 for more details.

Tag	Field Name	Details	Guidelines
			<p>For odd lot reserve orders, set to a value &lt; 1 round lot and &lt; OrderQty (38)</p> <p>Discretionary Limit Orders (18=j) can be fully displayed (omit MaxFloor) or non-displayed (111=0). Reserve functionality is also supported for Discretionary Limit Orders.</p> <p>Accepted for At the open and At the close orders (59=2,7), but not enforced during auction match.</p>
114	LocateReqd	<p>Required for Sell Short and Sell Short Exempt orders.</p> <p>N=Locate not required</p>	<p>[N] is the only accepted valid value. Lack of (114) or values other than 114=[N] for Sell Short or Sell Short Exempt orders will be rejected.</p>
7928	Anti-Internalization Qualifiers (AIQ) ID	<p>Anti-Internalization "AIQ group" must be enabled at the port level first in order for the AIQ identifiers and modifiers to be properly enforced if sent per order. Users have the choice of setting AIQ on a Member Affiliate, User or MPID basis. If an order is submitted on a port that is not AIQ enabled, this FIX tag will be disregarded.</p> <p>3 Characters for self trade prevention:</p> <ul style="list-style-type: none"> <li>First 2 characters are the AIQ identifier to prevent orders that share the same value and originate from the same Member Affiliate (two or more Members that are affiliates), User (Member) or MPID (as set at the port level) from executing against each other.</li> <li>3<sup>rd</sup> character is the 1 character AIQ modifier, which specifies the type of AIQ behavior</li> </ul>	<p>1<sup>st</sup> and 2<sup>nd</sup> character Unique ID Level:</p> <p>Each character can be "0-9", "A-Z", "a-z". Case sensitive (i.e., 5B != 5b).</p> <p>User should input either "--" or "---" - which signifies "free-to-trade" (Anti-Internalization disabled for this order). Users can also completely disable their AIQ on a port level for all orders via the <a href="#">IEX Equities Port Request Form</a>.</p> <p>3<sup>rd</sup> character AIQ Modifier:</p> <p>N - Cancel newest O - Cancel oldest B - Cancel both S - Cancel smaller D - Decrement larger original order quantity and cancel smaller</p> <p>Missing 3<sup>rd</sup> character modifier indicates default behavior of cancel oldest (O).</p> <p>Routable orders (18=u) with a 3<sup>rd</sup> character of "D" (Decrement Larger) will be rejected upon receipt.</p>

Tag	Field Name	Details	Guidelines
			Accepted for At the open and At the close orders (59=2,7), but not enforced.
8020	DisplayRange	Quantity range to display (for a reserve order)	<p>Must be accompanied with a MaxFloor (111) if DisplayRange (8020) is populated</p> <p>Cannot have DisplayRange that is <math>\geq</math> MaxFloor</p> <p>May either be a round lot multiple or <math>&lt;</math> than one round lot (odd lot)</p> <p>If MaxFloor = round lot multiple, DisplayRange must be a round lot multiple <math>&lt;</math> MaxFloor</p> <p>*e.g. If MaxFloor = 200, DisplayRange = 100</p> <p>If MaxFloor = 400, DisplayRange can =100, 200, or 300</p> <p>If MaxFloor <math>&lt;</math> a round lot select DisplayRange one or more shares <math>&lt;</math> Maxfloor</p> <p>*e.g. Can be <math>\leq 99</math> shares, but not a single round lot (100 shares) If MaxFloor = 99, DisplayRange can = 1-98 shares</p> <p>*If DisplayRange + MaxFloor are <math>\geq</math> to a round lot, the replenishment range is capped at 99 shares</p> <p>*Examples assume a round lot size = 100 shares. Same logic applies for symbols with other round lot sizes.</p>
8484	Investor ID	Unique string per “investor” on whose behalf the Member is acting. Will not be echoed back on execution reports.	Max length: 20 chars

Tag	Field Name	Details	Guidelines
9140	DisplayInst	P=Post Only -None	9140=[P] only if OrdType(40) = '2', MaxFloor(111) is omitted or equal to OrderQty(38), and Price(44) is equal to \$1.00 or more.  None is the default DisplayInst.  DisplayInst value will override any values set at the port level; if DisplayInst is omitted the default port session setting will be enforced.
9500	MinQtyInstruction	C=Composite  M=Minimum Execution Size with Cancel Remaining; once LeavesQty < MinQty, order will cancel  A=Minimum Execution Size with AON Remaining; once LeavesQty < MinQty, Open shares become All or None	Only valid if 110 (MinQty) is sent.  Will not be echoed back in execution reports. Not changeable via Cancel/Replace.
20003	CancellInsteadOfSlide	0=Slide 3=Cancel order instead of slide	Only applicable for when DisplayInst (9140) = 'P'.  Sliding is the default behavior.  CancellInsteadOfSlide will override any values set at the port level; if CancellInsteadOfSlide is omitted the default port session setting will be enforced.
20050	CxIPxBack	N=No Action C=Cancel order U=Re-price to the less aggressive of the order's limit price or the NBB (for buys)/NBO (for sells)  Above is the behavior to enforce upon expiration of a set timer.	Only applies to Discretionary Limit orders (18= j) that have been price adjusted due to a CQI event, if 10 ms after the CQI event, the order is priced less aggressively than the NBB (for buy orders)/NBO (for sell orders).  CxIPxBack value will override any values set at the port level; if CxIPxBack is omitted the default port session setting will be enforced.

## Corporate D-Peg

## Market Maker Peg

This order type essentially functions as a one-sided displayed limit order that allows for quoting at a defined "Market Maker Peg Designated Percentage" away from the NBB or NBO, as applicable. This order type can only be sent by IEX Registered Market Makers. Please refer to the [IEX Market Maker Specification](#) for complete details. ExecInst must be [Q]=Market Maker Peg. Not compatible with ISO. Incompatible with MinQty or MaxFloor and will be rejected if either is populated.

## Retail Order

Retail orders are accepted during the Regular Market Session and designated based on ExtendedExecInst (9416) = 'R' (Retail Order) which can be assigned by IEX based on session configuration instruction from an IEX-approved Retail Member Organization. Retail orders are eligible for interaction with Retail Liquidity Provider orders and Retail Price Improvement Program fees when the following conditions are satisfied: ExecInst (18) is either [d]=Discretionary Peg or [M]=Midpoint Peg; OrdType (40) = 'P' (Pegged); OrderCapacity (47) = A (Agency) or R (Riskless Principal); and TimeInForce (59) = 3 (IOC), 4 (FOK). Can be enriched with MinQty (subject to guidelines below - not applicable to FOK).

Retail orders (ExtendedExecInst (9416) = 'R') that do not conform to the above or below Retail order specifications are disregarded as being from Retail investors and are handled in accordance with corresponding IEX FIX Specifications for the order type (non-Retail) and handled in accordance with the [General Trading Rules of the IEX Rulebook](#).

Retail orders are not compatible with ISO and do not queue pre-market.

Retail orders will be rejected if received during a Halt, Volatility or IPO auction.

## Retail Liquidity Provider Order

Retail Liquidity Provider (RLP) orders are based on ExtendedExecInst (9416) = 'T' (Retail Liquidity Provider) and will only interact with eligible Retail orders as described in this FIX Specification. Retail Liquidity Provider orders must satisfy the following conditions: ExecInst (18) = M (Midpoint Peg), OrdType (40) = P (Pegged); OrderCapacity (47) = P (Principal), A (Agency), or R (Riskless Principal); TimeInForce (59) = 0 (Day), M (SYS), 6 (GTT), and 5 (GTX). Day orders submitted Pre-Market will queue up for trading during the Regular Market Session. SYS, GTT, and GTX orders will not be accepted in the Pre-Market.

Open RLP orders may not be modified to remove or update Tag 9416. Non-RLP orders may not be modified to update Tag 9416 = 'T'.

RLP orders cannot be enriched with MinQty (110).

18	ExecInst	i=IEX Only (a.k.a. Standard)	
21	HandInst	Instructions for order handling.	Value ignored, if present.
38	OrderQty	Number of shares ordered	1-10,000,000
40	OrdType	2=Limit	
44	Price	The MPV for orders entered into the System shall be \$0.01 for orders priced \$1.00 or greater, and \$0.0001 for orders priced below \$1.00.	
47	OrderCapacity	A=Agency P=Principal R=Riskless Principal	Option to default on a session level without needing to send per message
54	Side	Side of Order 1=Buy 2=Sell Long 5=Sell Short 6=Sell Short Exempt	LocateReqd (114)=[N] must be populated for [5]=Sell Short and [6]=Sell Short Exempt
55	Symbol	Ticker Symbol	The entire symbol (root and suffix, if applicable) needs to be sent if using Nasdaq symbology. CMS symbology can be sent either via 55/65 combo or concatenated using 55 alone.  Please consult Appendix A.
59	TimeInForce	7=At the close	
60	TransactTime	Time of order creation expressed in UTC	
1	Account		
58	Text		

Tag	Field Name	Details	Guidelines
65	SymbolSfx	Additional information about the security (e.g., preferred, warrants, etc.).	Not available for Nasdaq format, available for CMS only. Please consult Appendix A.
111	MaxFloor	O=Non-Displayed  If MaxFloor is populated order will still be treated as non-displayed.	Not enforced during auction match.
114	LocateReqd	Required for Sell Short and Sell Short Exempt orders. N=Locate not required	[N] is the only accepted valid value. Lack of (114) or values other than 114=[N] for Sell Short or Sell Short Exempt orders will be rejected.
8484	Investor ID	Unique string per “investor” on whose behalf the Member is acting. Will not be echoed back on execution reports.	Max length: 20 chars

## Order Cancel / Replace Request

The only amendable properties of IEX orders are:

- Order Quantity (38)
- Price (44) (for Peg and Limit orders)
- MinQty (110)
- Account (1)
- PegDifference (211)

Priced Peg orders and Limit orders may freely change their prices. Unpriced Peg orders may be amended to include a price. No priced orders, Limit or Peg, can be amended to remove the price.

If MinQty tag is not present IEX will preserve the original value for the order (no change to MinQty). MinQty=0 will remove the condition from the order altogether.

IEX accepts cancel requests for Market orders and orders marked with a TIF of IOC or FOK, however amendments are rejected for these types of orders

The IEX OrderID (37) need not be referenced, as IEX will validate the order using ClOrdID (11) and OrigClOrdID (41).

Changes to ExtendedExecInst (9416) are not accepted on RLP orders.

Discretionary Limit modifications to CxlPxBack (20050) will be ignored.

Discretionary Peg, Primary Peg, and Corporate Discretionary Peg modifications to SigVersion (20067) will be ignored.

**All required FIX tags/values from original order need to be preserved and resent in the Cancel / Replace request, optional tags/values may be omitted.**

Orders in a terminal state (fully executed, cancelled, rejected) may not be cancel/replaced.

All Cancel / Replace requests must happen in sequence. If IEX receives consecutive Cancel / Replace requests before the initial Cancel / Replace request can be processed, the subsequent requests will be rejected.

Cancel / Replace requests are rejected for specific order types after an auction's Lock-In time:

- *Opening Auction Lock-In Time (9:28 a.m.):* Reject Cancel / Replace requests to LOO, MOO, Limit / Market with TIF of Day, and Limit with a TIF of Good 'til Extended Day.
- *Closing Auction Lock-In Time (3:50 p.m.):* Reject Cancel / Replace requests to LOC and MOC.

Tag	Field Name	Details	Guidelines
35	MsgType	G	
11	ClOrdID	Unique ID of cancel/replace request	
18	ExecInst	Must match original ExecInst	
21	HandInst	Instructions for order handling.	Value ignored, if present.
38	OrderQty	Requested total shares for order to be amended to	Cannot be less than currently executed quantity
40	OrdType	Must match original OrdType	

41	OrigClOrdID	ClOrdID referencing the order to be replaced	
47	OrderCapacity	Must match original OrderCapacity	
54	Side	Must match original Side.	
55	Symbol	Must match original Symbol	
59	TimeInForce	Must match original TimeInForce	
60	TransactTime	Time of cancel/replace creation expressed in UTC	
1	Account	Value received will overwrite Account value from original order. If original order was received with an Account value, and 35=G is sent without the Account tag, tag 1 will not be echoed back for the rest of the order	
44	Price	Requested price for the order to be amended to	
65	SymbolSfx	Must match original SymbolSfx, if applicable	
110	MinQty	If MinQty tag is not present IEX will preserve original value for the order (no change to MinQty).  MinQty=0 will remove the condition from the order altogether.	
9416	ExtendedExecInst	T=Retail Liquidity Provider orders	

## Order Cancel Request

Tag	Field Name	Details	Guidelines
35	MsgType	F	
11	ClOrdID	Unique ID of cancel request	
38	OrderQty	Must match original order quantity	
41	OrigClOrdID	ClOrdID referencing the order to be cancelled	
54	Side	Must match original side.	
55	Symbol	Must match original symbol	
60	TransactTime	Time of cancel/replace creation expressed in UTC	
65	SymbolSfx	Must match original SymbolSfx, if applicable	

## Received from IEX – Execution Report

In addition to the below fields common to all Execution Reports from IEX, please see sections below for Order Status specific fields.

Tag	Field Name	Details	Guidelines
35	MsgType	8=ExecutionReport	
6	AvgPrice	Calculated average price of all fills on this order	
11	ClOrdID	Will match confirmed ClOrdID of current order chain	
14	CumQty	Total number of shares filled	
17	ExecID	Unique identifier of execution message	
18	ExecInst	Will match original order	
37	OrderID	Unique IEX Order ID	
38	OrderQty	Will reflect last accepted value	
40	OrdType	Will match original order	
47	OrderCapacity	Will match original order	
54	Side	Will match original order	
55	Symbol	Will match original order	
59	TimeInForce	Will match original order	
60	TransactTime	Time of execution creation (in UTC)	
151	LeavesQty	Number of shares open for further execution.	
1	Account	Will match original order	
44	Price	Will reflect last accepted value	
58	Text		
65	SymbolSfx	Will match original order	
110	MinQty	Will reflect last accepted value	
111	MaxFloor	Will match original order	
126	ExpireTime	Will match original order	
9416	ExtendedExecInst	Will match original order	

Tag	Field Name	Details	Guidelines
9690	EffectiveLimitPrice	New effective limit price of the order due to CQI price change	<p>Only sent when ExecInst[18]=j Discretionary Limit</p> <p>If effective limit price was adjusted due to a CQI event, the adjusted effective limit price will be reported here.</p> <p><b>Effective limit price will always be reported unless Member opts-out of receiving restatement messages via the <a href="#">IEX Equities Port Request Form</a>.</b></p>

Tag	Field Name	Details	Guidelines
		[Passed through value from Market Centers if LastMkt is not IEX; See Appendix F for details about tag mapping.]	
9882	FeeCode	<p>Specific fee code associated with execution on a non-IEX market.</p> <p>[Passed through value from Market Centers if LastMkt is not IEX; See Appendix F for details about tag mapping.]</p>	To be used in conjunction with LastMkt(30) to determine trading costs. If LastMkt is a non-IEX market, this field will pass through the Indicator value sent by that market center.

## Canceled

Tag	Field Name	Details	Guidelines
20	ExecTransType	0=New	
31	LastPx	0.00	
32	LastShares	0	
39	OrderStatus	4=Cancelled	
41	OrigClOrdID	ClOrdID used to identify the referenced order in cancel request.	
150	ExecType	4=Cancelled	
151	LeavesQty	0	

## Unsolicited Cancel

Tag	Field Name	Details	Guidelines
20	ExecTransType	0=New	
11	ClOrdID	ClOrdID of the cancelled order.	
31	LastPx	0.00	
32	LastShares	0	
39	OrderStatus	4=Cancelled	
41	OrigClOrdID	ClOrdID of the cancelled order, used to identify the referenced order in cancel request.	
150	ExecType	4=Cancelled	
151	LeavesQty	0	

## Anti-Internalization Cancel/Restatement

Tag	Field Name	Details	Guidelines
35	MsgType	8=ExecutionReport	
11	ClOrdID	Will match confirmed ClOrdID of current order chain	
37	OrderID	Unique IEX Order ID	
60	TransactTime	Time of execution creation (in UTC)	
1	Account	Will match original order	
31	LastPx	Price of this (last) fill.	<p>This field is always provided on AIQ canceled/restated messages, but Members must opt in to receive the actual value associated with this field.</p> <p>On an AIQ canceled/restated message, this is the price of the shares that would have matched.</p> <p>If the AIQ cancel pertains to a routable order (18=u), the value for LastPx will be 0.</p>
32	LastShares	Quantity of shares executed on this (last) fill.	<p>This field is always provided on AIQ canceled/restated messages, but Members must opt in to receive the actual value associated with this field.</p> <p>On an AIQ canceled/restated message, this the quantity of shares that would have matched.</p> <p>If the AIQ cancel pertains to a routable order (18=u), the value for LastShares will be 0.</p>
39	OrderStatus	0=New 1=Partial fill 2=Fill 4=Canceled	Identifies current status of order.

Tag	Field Name	Details	Guidelines
		5=Replace 6=Pending Cancel (e.g., result of Order Cancel Request) 8=Rejected E=Pending Replace (e.g., result of Order Cancel/Replace Request)	Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.
102	CxlRejReason	0=Too late to cancel 1=Unknown order 2=Exchange Option 3=Already Pending Cancel or Pending Replace	Code to identify reason for cancel rejection.  Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.
150	ExecType	0=New 1=Partial fill 2=Fill 4=Canceled 5=Replace 6=Pending Cancel (e.g., result of Order Cancel Request) 8=Rejected D=Restated E=Pending Replace (e.g., result of Order Cancel/Replace Request)	Describes the specific Execution Report (i.e., Pending Cancel) while OrdStatus will always identify the current order status (i.e., Partially Filled)  Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field. Value of D will be used for AIQ decrement ("D") values
151	LeavesQty	Number of shares open for further execution.	Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.  On an AIQ restated message this is what the liquidity values would have occurred on the trade.
851	LastLiquidityInd	1=Added Liquidity 2=Removed Liquidity 3=Routed 4=Auction 9=Removed Liquidity on Recheck	Identifies source of execution and whether an execution on IEX resulted from liquidity provision or removal, or from a single-price cross (e.g., auction).  Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.

Tag	Field Name	Details	Guidelines
			<p>On an AIQ canceled/restated message, this is what the liquidity values would have been on the trade.</p> <p>If the AIQ cancel pertains to a routable order (18=u), LastLiquidityInd will not be provided.</p>
7928	Anti-Internalization Qualifiers (AIQ) ID	<p>Anti-Internalization "AIQ group" must be enabled at the port level first in order for the AIQ identifiers and modifiers to be properly enforced if sent per order. Users have the choice of setting AIQ on a Member Affiliate, User or MPID basis. If an order is submitted on a port that is not AIQ enabled, this FIX tag will be disregarded.</p> <p>3 Characters for self trade prevention:</p> <ul style="list-style-type: none"> <li>First 2 characters are the AIQ identifier to prevent orders that share the same value and originate from the same Member Affiliate (two or more Members that are affiliates), User (Member) or MPID (as set at the port level) from executing against each other.</li> <li>3<sup>rd</sup> character is the 1 character AIQ modifier, which specifies the type of AIQ behavior</li> </ul>	<p>1<sup>st</sup> and 2<sup>nd</sup> character AIQ identifier Level:</p> <p>Each character can be "0-9", "A-Z", "a-z". Case sensitive (i.e., 5B != 5b).</p> <p>User should input either "--" or "---" - which signifies "free-to-trade" (Anti-Internalization disabled for this order). Users can also completely disable their AIQ on a port level for all orders via the <a href="#">IEX Equities Port Request Form</a>.</p>
9730	TradeLiquidityIndicator	<p><b><u>Base Character(s)</u></b></p> <p>MI=Add Non-Displayed Continuous Execution ML=Add Displayed Continuous Execution TI=Remove Non-Displayed Continuous Execution TL=Remove Displayed Continuous Execution X=Opening Process O=Opening Auction C=Closing Auction H=Halt / Volatility Auction P=IPO Auction</p> <p><b><u>Appended Characters</u></b></p>	<p>To be used in conjunction with LastMkt(30) to determine trading costs. If LastMkt is a non-IEX market, this field will pass through the Indicator value sent by that market center.</p> <p>Opening, Closing, IPO, Halt, and Volatility Auctions are conducted for IEX-listed securities. See the IEX Auction Process</p>

Tag	Field Name	Details	Guidelines
		<p>D=Execution of displayed Continuous Book interest in a cross or auction (applied with X, O, or C, only)</p> <p>R=Retail order removes liquidity</p> <p>A=Member adds liquidity against a Retail order with a Retail Liquidity Provider order</p> <p>W=Resting dark order removes against Post-Only</p> <p>Y=Post Only adds/removes upon booking</p> <p>[Passed through value from Market Centers if LastMkt is not IEX; See Appendix F for details about tag mapping.]</p>	<p>Specification for details about each auction type.</p> <p>Opening Process is conducted for non-IEX-listed securities.</p> <p>Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.</p> <p>On an AIQ canceled/restated message, this is what the liquidity values would have been on the trade.</p> <p>If the AIQ cancel pertains to a routable order (18=u), TradeLiquidityIndicator will not be provided.</p>
198	SecondaryOrderId	IEX OrderID (FIX Tag 37 of the contra order)	<p>New field on AIQ cancel messages which represents the contra side order ID that order would have traded against.</p> <p>Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.</p>
378	ExecRestatementReason	4=State Change	Only present when 150=D
21004	STPReason	<p>N - Cancel newest</p> <p>O - Cancel oldest</p> <p>B - Cancel both</p> <p>S - Cancel smaller</p> <p>D - Decrement larger original order quantity and cancel smaller</p>	<p>On an AIQ canceled/restated message, this is the AIQ scenario that caused the "execution".</p> <p>Must request opt-in at firm or port level for "Report AIQ Fields" to receive this field.</p>

## Replaced

Tag	Field Name	Details	Guidelines
20	ExecTransType	0=New	
31	LastPx	0.00	
32	LastShares	0	
39	OrderStatus	5=Replaced	
41	OrigClOrdID	ClOrdID of the replaced order, used to identify the referenced order in replace request.	
115	OnBehalfOfCompID	IEX-assigned value used to identify firm sending message. Applicable for Service Bureau connections.	
150	ExecType	5=Replaced	
151	LeavesQty	OrderQty - CumQty	

## D-Limit Restatement (Slide / Reprice)

Tag	Field Name	Details	Guidelines
11	CIOrdID	Unique identifier, per session, per trading day for Order as assigned by the Member	Max length: 20 chars
150	ExecType	D=Restated	Restatement message will be sent to user
378	ExecRestatementReason	3=Repricing of order	Only present when 150=D
9690	EffectiveLimitPrice	New effective limit price of the order due to CQI price change	<p>If effective limit price was adjusted due to a CQI event, the adjusted effective limit price will be reported here.</p> <p>Effective limit price will always be reported unless Member opts-out of receiving restatement messages via the <a href="#">IEX Equities Port Request Form</a>.</p>

## Display Price Restatement

Tag	Field Name	Details	Guidelines
11	CIOrdID	Unique identifier, per session, per trading day for Order as assigned by the Member	Max length: 20 chars
150	ExecType	D=Restated	Restatement message will be sent to user whenever the display book price is adjusted, for any incoming displayed order that is not able to book at its limit price.  Must request opt-in at port level to receive Display Price Restatement message via the <a href="#">IEX Equities Port Request Form</a> .
378	ExecRestatementReason	3=Repricing of order	Only present when 150=D
9692	DisplayPrice	Displayed order book price if different than Limit Price(44)	Only applicable when order is displayed

## Pending Cancel

Tag	Field Name	Details	Guidelines
20	ExecTransType	0=New	
31	LastPx	0.00	
32	LastShares	0	
39	OrderStatus	6=Pending Cancel	
41	OrigCIOrdID	CIOrdID of the pending cancel order, used to identify the referenced order in cancel/replace requests.	
150	ExecType	6=Pending Cancel	
151	LeavesQty	OrderQty - CumQty	

## Rejected

Tag	Field Name	Details	Guidelines
20	ExecTransType	0=New	
31	LastPx	0.00	
32	LastShares	0	
39	OrderStatus	8=Rejected	
103	OrdRejReason	0=Broker option 1=Unknown symbol 2=Exchange closed 3=Order exceeds limit 4=Too late to enter 5=Unknown order	Code to identify reason for order rejection.
150	ExecType	8=Rejected	
151	LeavesQty	0	

## Pending Replace

Tag	Field Name	Details	Guidelines
20	ExecTransType	0=New	
31	LastPx	0.00	
32	LastShares	0	
39	OrderStatus	E=Pending Replace	
41	OrigClOrdID	ClOrdID of the pending replace order, used to identify the referenced order in cancel/replace requests.	
150	ExecType	E=Pending Replace	
151	LeavesQty	OrderQty - CumQty	

## Trade Bust

IEX currently supports Trade Busts via a custom message type “UCC” that can be enabled at the port level. Trade Busts do not alter live order state.

Tag	Field Name	Details	Guidelines
35	MsgType	UCC	
11	ClOrdID	Will match original execution	
17	ExecID	Unique identifier of execution message	
19	ExecRefID	Referenced ExecID of execution to apply trade bust to	
20	ExecTransType	1=Cancel	
31	LastPx	Price on the original trade being cancelled	
32	LastShares	Quantity of shares on the original trade being cancelled	
37	OrderID	Will match original execution	
42	OrigTime	Indicates TransactTime (60) of original execution.	
54	Side	Will match original execution	
55	Symbol	Will match original execution	
60	TransactTime	Time of trade bust expressed in UTC	
375	ContraBroker	Denoted with value “IEXG”.	
382	NoContraBrokers	Denoted with value “1”.	
9730	TradeLiquidityIndicator	Will match original execution	
9882	FeeCode	Will match original execution	
1	Account	Will match original order	
65	SymbolSfx	Will match original order	

## Cancel Reject

Tag	Field Name	Details	Guidelines
35	MsgType	9=OrderCancelReject	
11	ClOrdID	Will match cancel request	
37	OrderID	IEX Order ID, or "NONE" if this is an unknown order to IEX	
39	OrdStatus	OrdStatus value after this cancel reject is applied	
41	OrigClOrdID	ClOrdID of the referenced order which could not be cancelled	
102	CxlRejReason	0=Too late to cancel 1=Unknown order 2=Exchange Option 3=Already Pending Cancel or Pending Replace	
434	CxlRejResponseTo	1=Order Cancel Request	
1	Account	Will match original order	
58	Text	Reason for cancel reject	
65	SymbolSfx	Will match original order	

## Replace Reject

Tag	Field Name	Details	Guidelines
35	MsgType	9=OrderCancelReject	
11	ClOrdID	Will match cancel/replace request	
37	OrderID	IEX Order ID, or "NONE" if this is an unknown order to IEX	
39	OrdStatus	OrdStatus value after this cancel/replace reject is applied	
41	OrigClOrdID	ClOrdID of the referenced order which could not be replaced.	
102	CxlRejReason	0=Too late to cancel 1=Unknown order 2=Exchange Option 3=Already Pending Cancel or Pending Replace	
434	CxlRejResponseTo	2=Order Cancel/Replace Request	
1	Account	Will match original order	
58	Text	Reason for cancel/replace reject	
65	SymbolSfx	Will match original order	

# DROP COPY

IEX will provide drop copies to another session specified by the Member. All execution report (35=8) messages from the original order entry line will be sent on the drop copy connection. In addition to the original execution report details, the drop copy messages will contain the below tags to help the Member identify the message sequence from the original order entry session.

Tag	Field Name	Details	Guidelines
109	ClientID	<b>4 Character MPID if original order was sent via Service Bureau session (i.e., ABCD). 4 Character MPID + 3 digit integer representing original SenderCompID if original order was sent via Direct connection (i.e., ABCD001)</b>	

# APPENDIX A: SYMBOLOGY

Requires corresponding Symbology election to be enabled at the port level

Suffixes, when needed, are supported using 3 formats: 1) Tag 55 using Nasdaq Integrated 2) Tag 55 using CMS format (with SPACE delimited between the root and suffix) 3) Tag 55/65 using CMS format.

# APPENDIX B: COMMON CERTIFICATION ISSUES

- Not sending required tag ExecInst (18)
- IEX Market orders sent with a TIF (59) of GTT (only accepted TIFs are IOC, FOK, or DAY)
- Routable Market orders sent with a TIF (59) of Day, GTT, or FOK (only accepted TIF is IOC)
- Using Minimum Quantity (110) with any routing instructions
- Using Minimum Quantity (110) with FOK TIF (59)
- Midpoint Peg Order (18=M), Primary Peg Order (18=R), Discretionary Peg Order (18=d) sent without the value "P" sent in OrdType (40)
- ISO orders (18=f, y) with anything other than OrdType (40)=2(Limit) and TIF (59)=3(IOC)
- Not enabling case sensitivity for ExecID (17)

# APPENDIX C: ORDER REJECT AND CANCEL REASONS

The description of the reject or cancel will be sent back by IEX via “Text” (tag 58). The below lists common reasons and may not be exhaustive.

## Order Cancel Reasons

- AdminCancel
- CrossedTradeThroughPrevented
- DiscretionaryLimitCancel
- ExceededMaxChildOrders
- ExceededMaxSnapshots
- IexOrderCollar
- InvalidBookPrice
- InvalidOrderQty
- MidpointTouched
- OrderExceedsLimit
- OrderSizeLessThanMinQty
- PostOnlyCancelled
- SelfTradePrevention
- UnmatchedIneligibleToRest
- UnmatchedIOC

## Order Reject Reasons

- BrokerOption
- ExceededMaxNotionalPerOrder
- ExceededMaxSharesPerOrder
- ExchangeClosed
- InvalidAuctionOrder
- InvalidExecInst
- InvalidGoodTillTimeOrder
- InvalidOddLot
- InvalidSignalChoice
- InvalidPrice
- InvalidTagCombinationForDiscretionaryLimit
- InvalidTagCombinationForDiscretionaryPeg
- InvalidTagCombinationForIOC
- InvalidTagCombinationForMarketOrder
- InvalidTagCombinationForMidpointPeg
- InvalidTagCombinationForMinQty
- InvalidTagCombinationForOffsetPeg
- InvalidTagCombinationForPostOnlyOrder
- InvalidTagCombinationForPrimaryPeg
- InvalidTradeNowInstruction
- MarketOrdersNotAllowed
- MissingLocate
- MPIDUnknownOrDisabled
- OnlyTestSymbolsAllowed
- OrderInvalidInCurrentMarketSession
- OrderInvalidInPreMarketSession
- PostMarketNotAllowed
- PreMarketNotAllowed
- SymbolHalted
- SymbolNotActive
- TooLateToEnter

- UnknownSymbol

\* IEX Members must request that their order-entry session(s) be enabled to accept Market Orders with a TIF of Day. These orders submitted in the Pre-Market will queue up for the Regular Market session and be processed with an IOC TIF.

\* IEX Members must request that their order-entry session(s) be enabled to participate in Pre-Market and Post-Market Sessions.

\* IEX Members must submit Retail orders (Tag 941 6 = 'R') as Discretionary Peg (18=d) or Midpoint Peg (18=M) with TIF = (FOK or IOC) and apply to become Retail Member Organizations to qualify for Retail Price Improvement program.

# APPENDIX F: TAG MAPPING

If LastMkt is a non-IEX market, TradeLiquidityIndicator (9730) and FeeCode (9882) will pass through the value sent by that market center. Below is the mapping from the away market center into either TradeLiquidityIndicator (9730) or FeeCode (9882):

Venue	LastMkt<30>	TradeLiquidityIndicator<9730>	FeeCode<9882>
